Abstract

Read this article to learn how to use configure Azure Native ISV Service for use with Informatica's Cloud Data Integration-Free. Follow the appropriate topic depending on whether you are new to IDMC or are an existing user.

Supported Versions

- Informatica Intelligent Cloud Services November 2024

Table of Contents

Overview. 2
New IDMC users: Create a new organization on Azure Native ISV Service. 2
Current IDMC users: Link an existing organization to Azure Native ISV Service. 5

Overview

This article explains how to configure the Informatica Azure Native ISV Service.

Prerequisites

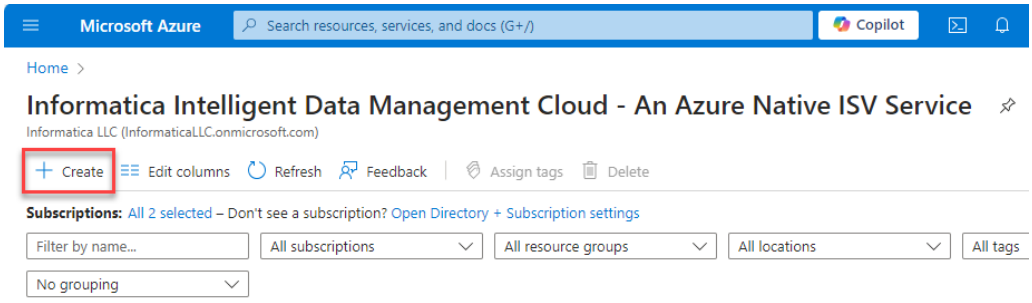

You must have the Microsoft Azure subscription ID and Tenant ID configured to access the Azure Native ISV Service - Data Integration-Free.

The Informatica organization created by configuring Azure Native ISV Service isn't eligible for creating serverless runtime environments.

New IDMC users: Create a new organization on Azure Native ISV Service

Users new to Informatica can create an organization on Azure Native ISV Service so that they can start trying out Informatica Intelligent Data Management Cloud.

1. You can begin from either of the following entry points:
   - If you are on the Azure Portal home page, select **Marketplace** from the list of Azure services and then proceed to step 2.
   - If you have already discovered the Informatica Azure Native ISV Service, click **Create** from the console and then proceed to step .5

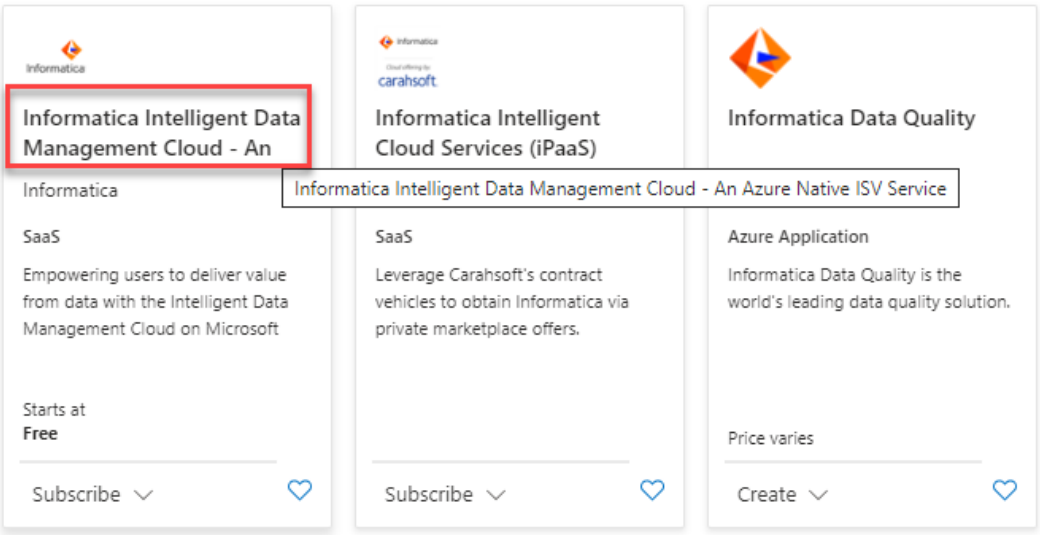

2. Search for **Informatica**.

   You might see several plans with "Informatica" in their names.

3. Select the plan named **Informatica Intelligent Data Management Cloud - An Azure Native ISV Service**.

   If you are in tile or list view, the name is truncated. To confirm that you've selected the correct plan, hover over the name. The following image shows the correct plan:

4. Select the **Informatica CDI** plan, click **Subcribes** > **Yes, continue**.

   The **Create an Informatica organization** page is displayed.

5. Enter the following information on the **Basics** tab:

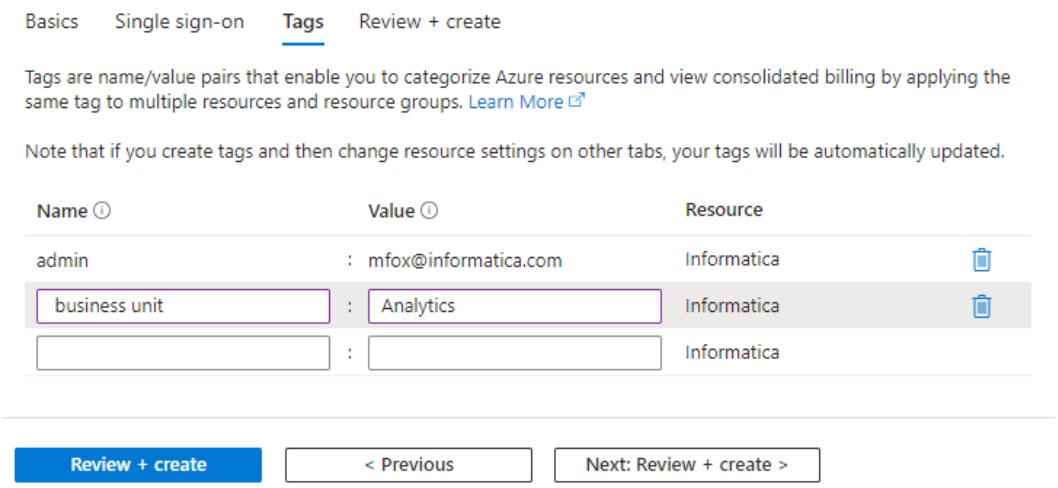

Field	Value
Subscription	Select the Azure subscription you want to use to create the Informatica organization. You must have an owner or contributor role for this subscription.
Resource group	Select a resource group or create a new one. You must have a contributor role to this resource group. A resource group is a container that holds related resources for an Azure solution.
Resource Name	Enter a name for the Azure resource.
Region	Select the region where the resource of type "Informatica organization" will be provisioned.
Informatica Region	Select the region that is closest to you. This determines the POD where your Informatica organization will be created.
Organization	Select **Create a new organization**.
Plan	The plan you selected.

6. Click **Next: Tags**, and optionally define attributes to help you categorize Azure resources.

   The following are examples of tags:

   - Name: <name of admin>, Value: <email address>

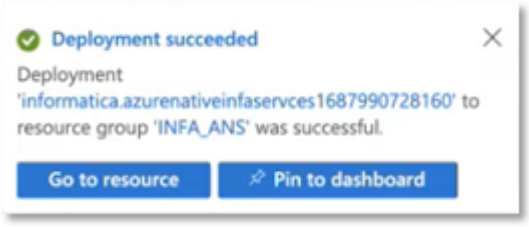

- Name: <business unit>, Value: <user's business unit>

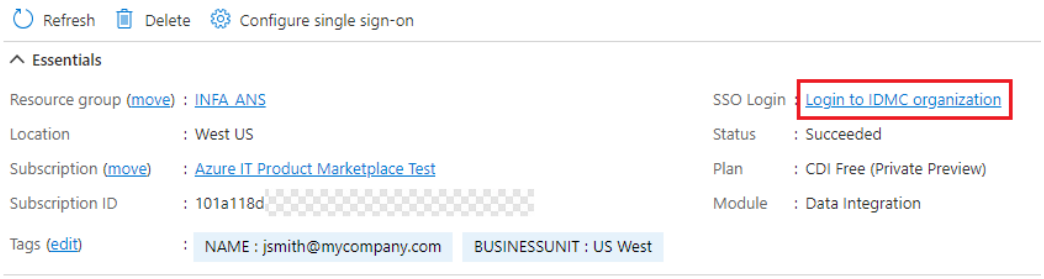

7. Click **Next: Review + create**.

   Review the information for accuracy and ensure that **Validation passed** displays at the top of the page.
8. Click **Create** to begin the deployment process.

   The deployment is complete when you see "Deployment succeeded."

9. Click **Go to resource** to see the resource dashboard for your organization.
10. Click **Login to IDMC organization** on the resource dashboard.

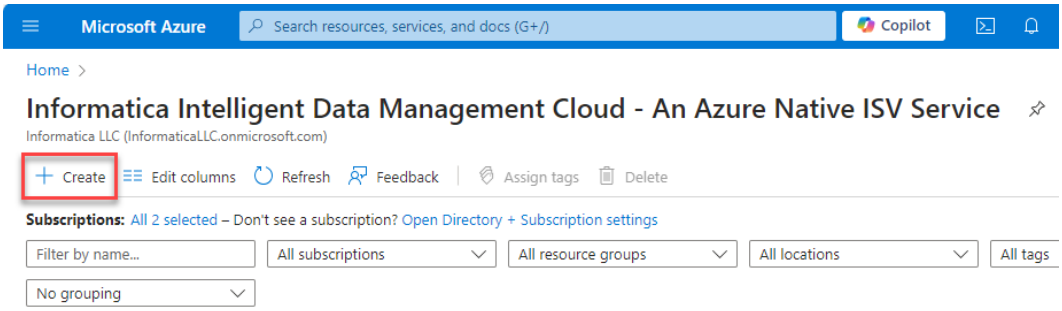

11. Verify that your personal information is accurate and confirm that you agree to the subscription agreement.
12. Click **Confirm** to log in to your IDMC organization.

    You are now ready to start trying out Cloud Data Integration-Free. For more information, see Getting Started with Informatica Cloud Data Integration.

Current IDMC users: Link an existing organization to Azure Native ISV Service

Existing Informatica Intelligent Data Management Cloud (IDMC) users can link your organization to Azure Native ISV Service. Repeat the procedure for each organization that you want to use with Azure Native ISV Service.

1. From the Azure Portal home page, open the Informatica Intelligent Data Management console.
2. Click **Create**.

   The **Create an Informatica Azure Native ISV Resource** page opens.
3. Enter the following information on the **Basics** tab:

Field	Value
Subscription	Select the Azure subscription you want to use to create the Informatica organization. You must have an owner or contributor role for this subscription.
Resource group	Select a resource group or create a new one. You must have a contributor role to this resource group. A resource group is a container that holds related resources for an Azure solution.
Resource Name	Enter a name for the Azure resource.
Region	Select the region where the resource of type "Informatica organization" will be provisioned.
Informatica Region	Select the region that is closest to you. This determines the POD that you'll connect to.
Organization	Select **Link to an existing organization (continue with the existing Informatica Billing)**. **Note:** You can only link to a parent organization that has an Intelligent Data Management Cloud subscription license. You can't link to a sub-organization and you must have an Organization Administrator role. For more information, see *Organization Administration*.
Organization name	Click **Link to an existing Informatica organization** and then log in to the organization that you wish to link.

4. Click **Next: Tags**, and optionally define attributes to help you categorize Azure resources.

The following are examples of tags:

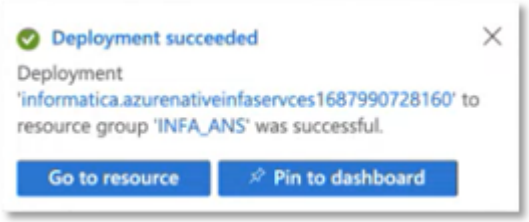

- Name: <name of admin>, Value: <email address>
- Name: <business unit>, Value: <user's business unit>

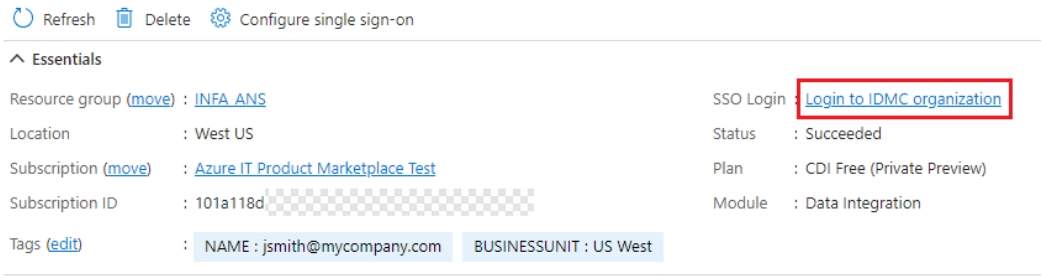

5. Click **Next: Review + create**.

   Review the information for accuracy and ensure that **Validation passed** displays at the top of the page.
6. Click **Create** to begin the deployment process.

   The deployment is complete when you see "Deployment succeeded."

7. Click **Go to resource** to see the resource dashboard for your organization.
8. Click **Login to IDMC organization** on the resource dashboard.

9. Verify that your personal information is accurate and confirm that you agree to the subscription agreement.
10. Click **Confirm** to log in to your IDMC organization.
