CHAPTER 1

October 2026

The following topics provide information about new features, enhancements, and behavior changes in the October 2026 release of Monitor.

Changelog October 2026

Read the changelog to learn about significant changes to this publication for this release.

The following table describes changes in this publication:

Publication Date	Type of Change	Section Title
September 10, 2026	Initial publication	

Changed behavior

The October 2026 release of Monitor contains the following changes.

Error messages

When Monitor reports error messages for individual sources in a mapping task, it reports error messages only for the source where the error occurred.

This feature was introduced in the April 2026 release for certain connectors. The October 2026 release extends support to all connector types.

Previously, Monitor reported error messages for all sources regardless of where the error occurred.

CHAPTER 2

October 2025

The following topics provide information about new features, enhancements, and behavior changes in the October 2025 release of Monitor.

New features and enhancements

The October 2025 release of Monitor includes the following new features.

Throughput details in monitoring job properties

Throughput details are now displayed in the **Individual Source/Target Results** section on the **Job Details** page under the following new columns:

- **Bytes**
- **Throughput (Bytes/Sec)**
- **Throughput (Rows/Sec)**

For more information, see *Monitoring Jobs*.

CHAPTER 3

July 2025

The following topics provide information about new features, enhancements, and behavior changes in the July 2025 release of Monitor.

New features and enhancements

The July 2025 release of Monitor includes the following new features.

Job statistics for Amazon S3 V2, Google Cloud Storage V2, and Microsoft Azure Data Lake Storage Gen2 connections

When you view job details for a mapping task or dynamic mapping task, success row information is now available for Amazon S3 V2, Google Cloud Storage V2, and Microsoft Azure Data Lake Storage Gen2 connections.

CHAPTER 4

November 2024

The following topics provide information about new features, enhancements, and behavior changes in the November 2024 release of Monitor.

New features and enhancements

The November 2024 release of Monitor includes the following new features and enhancements.

Rows processed

When you run a job that is based on a mapping in advanced mode, Monitor displays the number of rows processed on the **All Jobs** and **My Jobs** pages.
