Read the *Operational Insights Release Notes* to learn about fixed issues and known issues for Operational Insights.

For information about new features and enhancements, see *What's New*.

Fixed issues

The tables in this section describe recent fixed issues for Operational Insights. Note that some releases might not include fixes.

July 2026 fixed issues

Issue	Description
IOI-14875	On Windows-based Secure Agents that use the AWS library Kinesis Producer, you don't receive PowerCenter alerts for domains. Workaround: Use a Linux-based Secure Agent to receive PowerCenter alerts for domains.

Known issues

The tables in this section describe known issues for Operational Insights. Not all monthly releases include known issues.

July 2025 known issues

Issue	Description
MDMN-171684	When you view the usage metrics of business applications or Reference 360, the Last Updated field displays the end time of the refresh MDM SaaS usage metrics job instead of the start time. This issue occurs regardless of whether the job succeeds or fails.
