Cloud Data Integration for PowerCenter (CDI-PC) Update Schedule

This document provides an overview of the types and frequency of updates to Informatica® Cloud Data Integration for PowerCenter (CDI-PC).

Where data & AI come to LIFE

CDI-PC Updates

An update is a domain update that you perform in CDI-PC. An update can be mandatory, optional, or a patch, and each type can include new features, security patches, or EBFs. CDI-PC aligns with the major IDMC release in April to deliver new features and enhancements. The April major release is a mandatory update for CDI-PC.

CDI-PC uses a yearly update model with one mandatory update in April and one optional update in October.The April update is mandatory and includes a 90-day update window. The October update is optional — you can skip it and roll forward to the next April update, which includes all the updates from the previous October. Choose the October update if you need specific PAM updates or critical security fixes delivered in that release. Otherwise, plan to update in the upcoming April release. Informatica maintains both the April and October releases, giving you flexibility while keeping the release schedule predictable and supportable.

The following table describes mandatory, optional, and patch updates:

Mandatory Update

Frequency: April.

Includes: Features, security fixes, bug fixes, and PAM updates for cloud and on-premises components.

Domain update: Required.

Grace period: A 90-day period from the availability of the update. The mandatory update must be applied within the 90-day period from the availability of the update.

Due date: The last day of the grace period.

Post grace period: All domains that are not updated are marked as obsolete.

Optional Update

Frequency: October or as needed.

Includes: Cloud and/or on-premises security and bug fixes, and PAM updates.

Domain update: Required when October update is applied.

Grace period: Does not apply.

Due date: Does not apply.

EBF or Patch Update

Frequency: As needed.

Includes: CDI-PC standard EBFs (mandatory or optional) and cumulative critical production EBFs on the existing supported update.

Domain update: Not required.

Grace period: Does not apply.

Due date: Does not apply.

Mandatory update

Mandatory updates require you to update your domains to the new version by the due date. When a mandatory update becomes available, you have a 90-day grace period to complete it. The last day of this period is the due date.

You can schedule an update to run at a date and time of your choice, up to the due date for mandatory updates.

Domains that you don't update by the due date become obsolete. On an obsolete domain, you can't run jobs, perform tasks, or update from Informatica Intelligent Cloud Services. Contact **Informatica Global Customer Support** to resolve an obsolete domain.

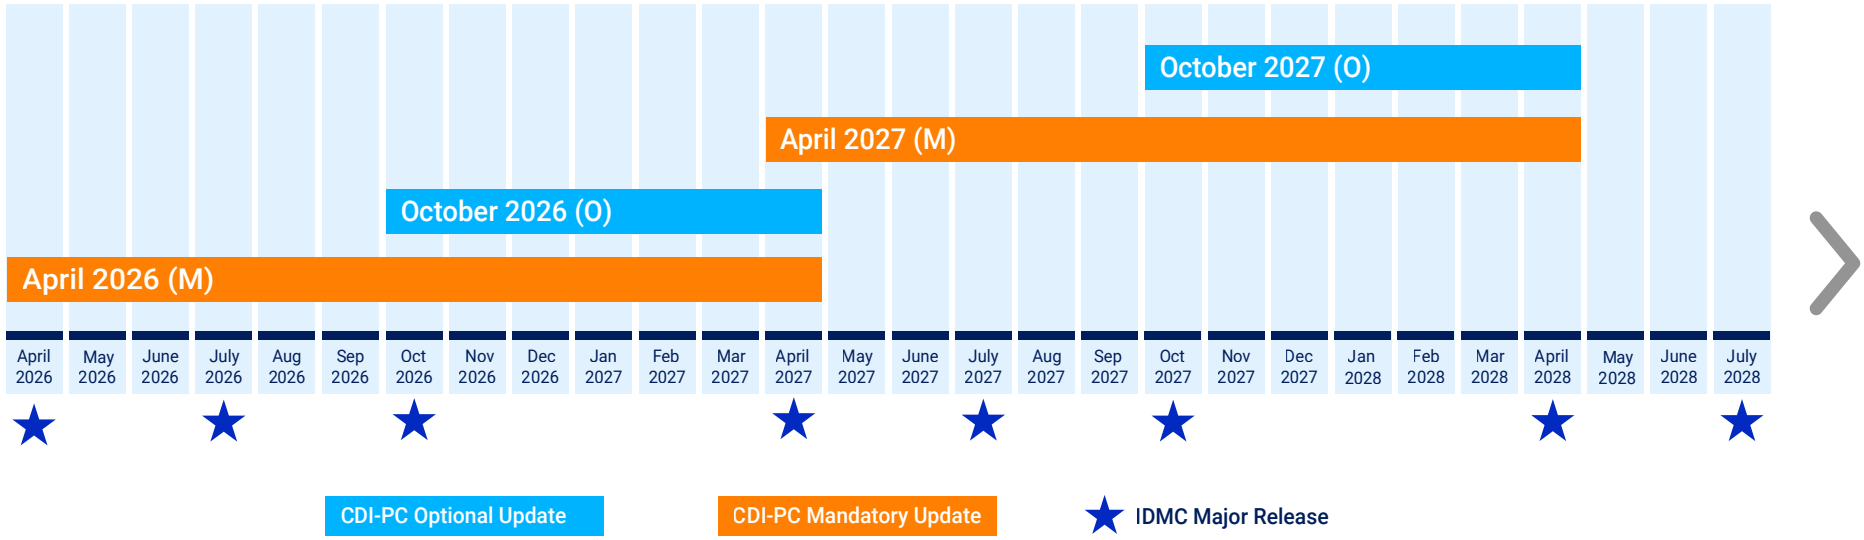

Optional update

For an optional CDI-PC update, you choose whether to update your domains based on your domain requirements. Usually, an optional update is a cloud-only update and doesn't impact on-premises packages. The grace period doesn't apply to an optional update, and your domains don't become obsolete even if you don't apply the update.

EBF or Patch update

Patch updates include emergency bug fixes (EBFs) for bugs that CDI-PC customers or Informatica found. Patch updates typically do not include new features.

CDI-PC Release and Update Schedule

Disclaimer: Informatica may, at its discretion, modify the scope of, change the schedule for, or cancel an update, if required.

About Us

About Informatica

Informatica from Salesforce is a leader in AI-powered enterprise cloud data management. Its Intelligent Data Management Cloud (IDMC) platform enables organizations to connect, manage and unify AI-ready data across the enterprise. With capabilities spanning data cataloging, integration, governance, quality, privacy, metadata management and master data management, Informatica supports a broad partner ecosystem and helps customers unlock the full value of their data and AI initiatives.

About Salesforce

Salesforce is the #1 AI CRM, empowering companies to connect with their customers in a whole new way through the power of artificial intelligence, data, and trust. For more information about Salesforce (NYSE: CRM), visit: **www.salesforce.com**.
