Read the *Data Integration Release Notes* to learn about known limitations and third-party limitations for Data Integration. For limitations regarding a connector, see the connector release notes.

For information about new features and enhancements, see *What's New*.

Fixed issues

The tables in this section describe recent fixed issues for Data Integration. Note that some releases might not include fixes.

October 2026 fixed issues

Issue	Description
CLDDI-50191	If you run a mapping task at the same time IDMC experiences a service interruption, the task fails with the following error: `503 Service Unavailable: "upstream connect error or disconnect/reset before headers. reset reason: connection termination"`
CLDDI-35990	When you delete the null character in a fixed-width file format and then save the fixed-width format, the null character is saved as an asterisk (*).

Known issues

The tables in this section describe known issues for Data Integration. Not all monthly releases include known issues.

October 2026 known issues

Issue	Description
CLDDI-54464	If you are assigned the read-only role and try to view the Dynamic Mapping Task step details of a taskflow on the Monitor page, the Current Run tab fails to load. This issue doesn't occur if you are assigned the Admin role or have execute permissions for the taskflow. Workaround: To view the Dynamic Mapping Task step details, use an account that is assigned an Admin role or has execute permissions for the taskflow.

July 2026 known issues

Issue	Description
CBDM-40360	When you use the text value `'NONE'` as input to certain functions in a mapping in SQL ELT mode, expression validation fails with a "failed to parse" error. The same function runs successfully directly on the cloud data warehouse, such as Snowflake. Workaround: Use an alternative text value in place of `'NONE'`, such as `'N/A'` or `'EMPTY'`.
CLDDI-51190	If you try to create a database ingestion and replication task with a Microsoft Fabric Data Warehouse, Open Table, or Salesforce Data 360 target in CLAIRE Copilot for Data Integration, Copilot responds that the target type is not valid and doesn't allow you to proceed, even though these target types are supported in manual task creation outside of Copilot. Copilot does not yet support these target types.

April 2026 known issues

Issue	Description
CLDDI-49878	After you run a taskflow with a Data Task step that contains a dynamic mapping task, the taskflow instance detail page doesn’t display the task execution details.

Informatica Global Customer Support

You can contact a Global Support Center through the Informatica Network or by telephone.

To find online support resources on the Informatica Network, click **Contact Support** in the IDMC Help menu to go to the **Cloud Support** page. The **Cloud Support** page includes system status information and community discussions. Log in to Informatica Network and click **Need Help** to find additional resources and to contact Informatica Global Customer Support through email.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at https://www.informatica.com/services-and-training/support-services/contact-us.html.
