Preface

Read *Introduction* to get familiar with INFACore and to learn about the tasks you can perform using INFACore in your development environment.

Informatica Resources

Informatica provides you with a range of product resources through the Informatica Network and other online portals. Use the resources to get the most from your Informatica products and solutions and to learn from other Informatica users and subject matter experts.

Informatica Documentation

Use the Informatica Documentation Portal to explore an extensive library of documentation for current and recent product releases. To explore the Documentation Portal, visit https://docs.informatica.com.

If you have questions, comments, or ideas about the product documentation, contact the Informatica Documentation team at infa_documentation@informatica.com.

Informatica Intelligent Cloud Services web site

You can access the Informatica Intelligent Cloud Services web site at http://www.informatica.com/cloud. This site contains information about Informatica Cloud integration services.

Informatica Intelligent Cloud Services Communities

Use the Informatica Intelligent Cloud Services Community to discuss and resolve technical issues. You can also find technical tips, documentation updates, and answers to frequently asked questions.

Access the Informatica Intelligent Cloud Services Community at:

https://network.informatica.com/community/informatica-network/products/cloud-integration

Developers can learn more and share tips at the Cloud Developer community:

https://network.informatica.com/community/informatica-network/products/cloud-integration/cloud-developers

Informatica Intelligent Cloud Services Marketplace

Visit the Informatica Marketplace to try and buy Data Integration Connectors, templates, and mapplets:

https://marketplace.informatica.com/

Data Integration connector documentation

You can access documentation for Data Integration Connectors at the Documentation Portal. To explore the Documentation Portal, visit https://docs.informatica.com.

Informatica Knowledge Base

Use the Informatica Knowledge Base to find product resources such as how-to articles, best practices, video tutorials, and answers to frequently asked questions.

To search the Knowledge Base, visit https://search.informatica.com. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

Informatica Intelligent Cloud Services Trust Center

The Informatica Intelligent Cloud Services Trust Center provides information about Informatica security policies and real-time system availability.

You can access the trust center at https://www.informatica.com/trust-center.html.

Subscribe to the Informatica Intelligent Cloud Services Trust Center to receive upgrade, maintenance, and incident notifications. The Informatica Intelligent Cloud Services Status page displays the production status of all the Informatica cloud products. All maintenance updates are posted to this page, and during an outage, it will have the most current information. To ensure you are notified of updates and outages, you can subscribe to receive updates for a single component or all Informatica Intelligent Cloud Services components. Subscribing to all components is the best way to be certain you never miss an update.

To subscribe, go to https://status.informatica.com/ and click **SUBSCRIBE TO UPDATES**. You can then choose to receive notifications sent as emails, SMS text messages, webhooks, RSS feeds, or any combination of the four.

Informatica Global Customer Support

You can contact a Customer Support Center by telephone or online.

For online support, click **Submit Support Request** in Informatica Intelligent Cloud Services. You can also use Online Support to log a case. Online Support requires a login. You can request a login at https://network.informatica.com/welcome.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at https://www.informatica.com/services-and-training/support-services/contact-us.html.

CHAPTER 1

Introducing INFACore

INFACore is an open, extensible, and embeddable intelligent data management solution for democratizing data management in data-driven applications.

It is an Informatica Intelligent Cloud Services solution available as a low-code data management plug-and-play framework that you can seamlessly integrate into your development environment. The built-in features help you manage data end-to-end and make it easier to process your data faster within your development environment without the need to switch between applications.

You can use INFACore to leverage data management capabilities from the Informatica Intelligent Cloud Services platform in your preferred programming language and development environment. INFACore enables AI-powered data management capabilities and empowers your application to consume, transform, and prepare data from any source within your development environment.

INFACore also simplifies the creation of data pipelines by turning voluminous code into a single function, so you can quickly harness high-quality relevant data to build and train machine learning models.

Key benefits

You can use INFACore to access data from diverse data sources, explore data, apply functions, transform the data, and deliver quality data to your business.

The simplified user interface developed for low-code personas for specific development environments additionally helps optimize the entire development process. INFACore drastically speeds up delivery with zero maintenance and helps accelerate time to market.

You can use INFACore to leverage the following functionalities:

- Access data using a wide variety of connectors.
- Employ built-in functions for complex data integration needs.
- Embed data management capabilities to parse unstructured and semi-structured data that your application can consume.
- Make use of CLAIRE, Informatica's AI engine, machine learning capabilities for maximum automation for schema matching, intelligent recommendations, and intelligent structure discovery.
- Operationalize seamlessly at scale with fully integrated Informatica Intelligent Cloud Services capabilities.
- Prepare data to build machine learning models.

INFACore components

INFACore components work together to help you interact with INFACore and manage your data within your development workspace.

You can access INFACore using the following components:

SDKs

The INFACore SDK libraries help you programmatically access INFACore services and manage data from your development environment.

Extensions

The extension is a user-facing graphical interface layer tailor-made for the development environment. The extension is an additional layer over the SDK that gives you interactive controls to access the INFACore functionality.

The extension works alongside the SDK and gives you the ability to perform simple actions from the user interface such as to log in to INFACore, connect to a data source, and apply functions to your data. When you perform an action in the user interface extension, the relevant SDK code is added to the development environment and you can then use the SDK to leverage the rest of the functionalities. The interface simplifies working with INFACore and reduces the amount of code you need to write and increases your productivity.

You can choose to use the SDK independently without the extension.

Extensions and SDKs

INFACore is available as a JupyterLab extension on Windows and Linux. The INFACore SDK is available for the Python programming language for use in any Python-based development environment.

INFACore SDK for Python

You can install and use the INFACore SDK for Python to access INFACore functionalities programmatically and manage your data in a Python application. This is the public SDK for INFACore and supports Python versions 3.8.0 to 3.11.x.

Development environment: Any Python-based development environment such as Databricks, JupyterLab, Microsoft Fabric, Visual Studio Code, and PyCharm. For JupyterLab, an extension is also available with the SDK.

Download: The INFACore SDK for Python is available for download in Informatica Marketplace.

Reference documentation: To get started with the INFACore Python SDK, see the *INFACore SDK Reference for Python*.

JupyterLab extension for INFACore

You can install the JupyterLab extension for INFACore to interact with INFACore and manage your data from within your JupyterLab development environment. The JupyterLab extension for INFACore is an additional layer over the INFACore SDK that provides you with a simple user interface to log in toINFACore and make use of the functions from your JupyterLab environment.

The JupyterLab version must be 3.4.2 to 3.x. Use a secure version of JupyterLab to mitigate any potential security vulnerabilities in the application or user environment.

Download: The JupyterLab extension for INFACore is available for download in Informatica Marketplace.

Reference documentation: To get started, head over to the installation instructions in the *INFACore Installation*. To learn how to use the INFACore user interface in JupyterLab, see *JupyterLab extension for INFACore*.
