NOTICES

This Informatica product (the "Software") includes certain drivers (the "DataDirect Drivers") from DataDirect Technologies, an operating company of Progress Software Corporation ("DataDirect") which are subject to the following terms and conditions:

1. THE DATADIRECT DRIVERS ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.
2. IN NO EVENT WILL DATADIRECT OR ITS THIRD PARTY SUPPLIERS BE LIABLE TO THE END-USER CUSTOMER FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES ARISING OUT OF THE USE OF THE ODBC DRIVERS, WHETHER OR NOT INFORMED OF THE POSSIBILITIES OF DAMAGES IN ADVANCE. THESE LIMITATIONS APPLY TO ALL CAUSES OF ACTION, INCLUDING, WITHOUT LIMITATION, BREACH OF CONTRACT, BREACH OF WARRANTY, NEGLIGENCE, STRICT LIABILITY, MISREPRESENTATION AND OTHER TORTS.

Step 4. Configure and publish the AzureStorageAccountConnection connection 9

Step 5: Configure and publish the processes 10

Step 6. Publish and run the guide 10

Preface

Use *Ingest Files to Azure AI Search Index using Guides* to learn how to upload files to the Azure Data Lake Storage (ADLS) container and run the indexer automatically to populate the index with the data from the uploaded files. This guide assumes that you have an understanding of the Azure AI Search Connector concepts.

CHAPTER 1

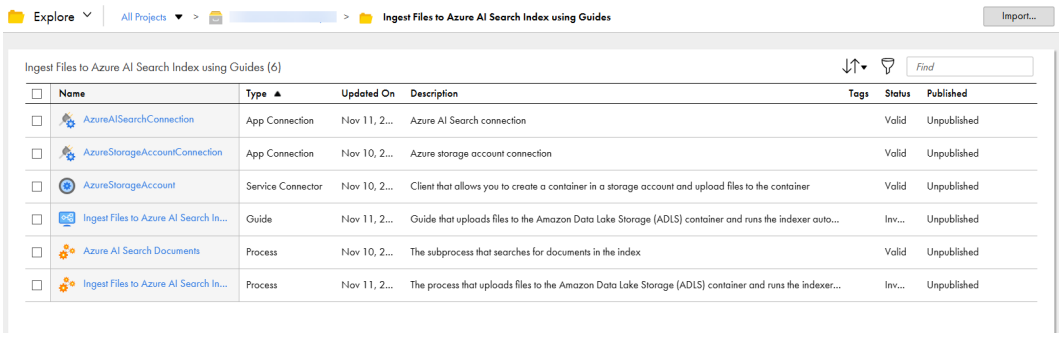

Introduction to Ingest Files to Azure AI Search Index using Guides recipe

The Ingest Files to Azure AI Search Index using Guides recipe is based on REST and SOAP APIs. Use the recipe to upload files to the Azure Data Lake Storage (ADLS) container and run the indexer automatically to populate the index with the data from the uploaded files.

Ingest Files to Azure AI Search Index using Guides recipe contents

The recipe contains multiple assets, such as service connectors, app connections, processes, and a guide.

The following image shows the assets that the Ingest Files to Azure AI Search Index using Guides recipe package contains:

Ingest Files to Azure AI Search Index using Guides recipe assets

The following table lists the assets that the Ingest Files to Azure AI Search Index using Guides recipe package contains:

Asset Name	Asset Type	Description
AzureStorageAccount	Service connector	Client that allows you to create a container in a storage account and upload files to the container.
AzureStorageAccountConnection	App connection	Azure storage account connection.
AzureAISearchConnection	App connection	Azure AI Search connection.
Azure AI Search Documents	Process	Subprocess that searches for documents in the index.
Create Index	Process	Subprocess that creates an index or updates an existing index.
Ingest files to Azure AI search Index	Process	Uploads files to the Azure Data Lake Storage (ADLS) container and runs the indexer automatically to populate the index with the data from the recently uploaded files.
Ingest files to Azure AI search Index using Guide	Guide	Uploads files to the Azure Data Lake Storage (ADLS) container and runs the indexer automatically to populate the index with the data from the recently uploaded files.

CHAPTER 2

Using the Ingest Files to Azure AI Search Index using Guides recipe

To use the Ingest Files to Azure AI Search Index using Guides recipe, you must perform the following steps manually:

1. Copy and access the recipe
2. Publish the AzureStorageAccount service connector
3. Configure and publish the AzureAISearchConnection connection
4. Configure and publish the AzureStorageAccountConnection connection
5. Publish the processes
6. Publish and run the guide

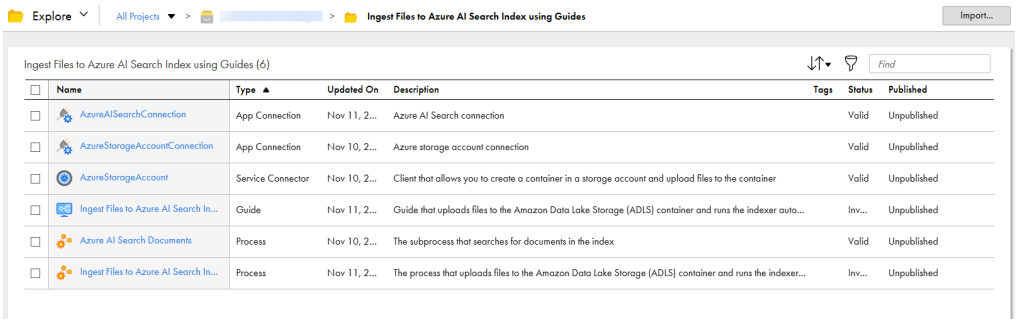

Step 1. Copy and access the recipe content

Copy the pre-configured assets in the recipe to a separate project or folder.

1. Open the **Ingest Files to Azure AI Search Index using Guides** recipe and click **Use**.
2. Select the location where you want to copy the recipe, and then click **Continue**.
3. In the **Copying the recipe** dialog box, click **OK**.

   It might take some time for the recipe to get copied. You will receive a notification when the recipe is ready for use.
4. After the recipe is copied, click **Explore** to access the recipe content.
5. Navigate to the project or folder where you copied the recipe or enter the recipe name in the **Find** box.

   All the assets in the recipe are displayed as shown in the following image:

Step 2. Publish the AzureStorageAccount service connector

To publish the **AzureStorageAccount** service connector, open the **AzureStorageAccount** service connector and click **Publish**.

Step 3. Configure and publish the AzureAISearchConnection connection

Configure the host name and the API key connection to connect to the service, and then publish the AzureAISearchConnection connection.

1. Open the **AzureAISearchConnection** connection.
2. From the **Type** list, select **Azure AI Search**.
3. From the **Runtime Environment** list, select **Cloud Server or any Secure Agent**.
4. In the **Connection Properties** section, enter values for the following properties:

Property	Description
Host_Name	Required. The host name of the search service that you want to connect to. You can find the value in **Microsoft Azure Search Service** > **Overview**, and copy the **Url** field value.
API_Key	Required. The admin API key to authenticate Azure AI Search connection requests. You can find the value in **Microsoft Azure search service** > **Settings** > **Keys**, and copy the primary or secondary admin key.

5. Save and publish the connection.

Step 4. Configure and publish the AzureStorageAccountConnection connection

Configure the host name and SAS token to authorize a request to connect to the Azure storage account, and then publish the AzureStorageAccountConnection connection.

1. Open the **AzureStorageAccountConnection** connection.
2. From the **Type** list, select **AzureStorageAccount** from the recipe assets folder.
3. From the **Runtime Environment** list, select **Cloud Server or any Secure Agent**.

4. In the **Connection Properties** section, enter values for the following properties:

Property	Description
Host Name	The host name to connect to the Azure storage account.
SAS Token	The query string includes all the required information to authorize a request. The token specifies the resource that a client can access, the permissions granted, and the period during which the signature is valid.

5. Save and publish the connection.

Step 5: Configure and publish the processes

To publish the following processes, click **Actions** in the row that contains the processes in the order specified and select **Publish**.

1. Azure AI Search Documents
2. Ingest files to Azure AI search Index

Step 6. Publish and run the guide

You can upload files to the Azure Data Lake Storage (ADLS) container and run the indexer automatically to populate the index with the data from the uploaded files.

1. Open the **Ingest files to Azure AI search Index using Guide** guide.
2. On the **Start** tab of the Start step, ensure that the **Run As** field is set to **Current User**.
3. Save and publish the guide.
4. On the **Actions** menu, click **Run**. Alternatively, you can copy the execution URL from the **Properties Details** dialog box to run the guide.
5. On the **Instructions** page, add the following information:
   - In the **Enter Input Details** section, enter the container name, file name, indexer name, API version, and index name.
   - In the **Upload File** section, select one or more files that you want to upload from your machine to the Azure Data Lake Storage (ADLS) container.
6. Click **Continue**.

You can also use the embed code to embed the guide into an HTML document of a third-party application.
