Informatica

Administer CLAIRE GPT

As an organization administrator, you can review the licenses that are set up for your organization, configure runtime environments and connections, and manage users and roles in your organization.

To set up CLAIRE® GPT for users in your organization, complete the following tasks:

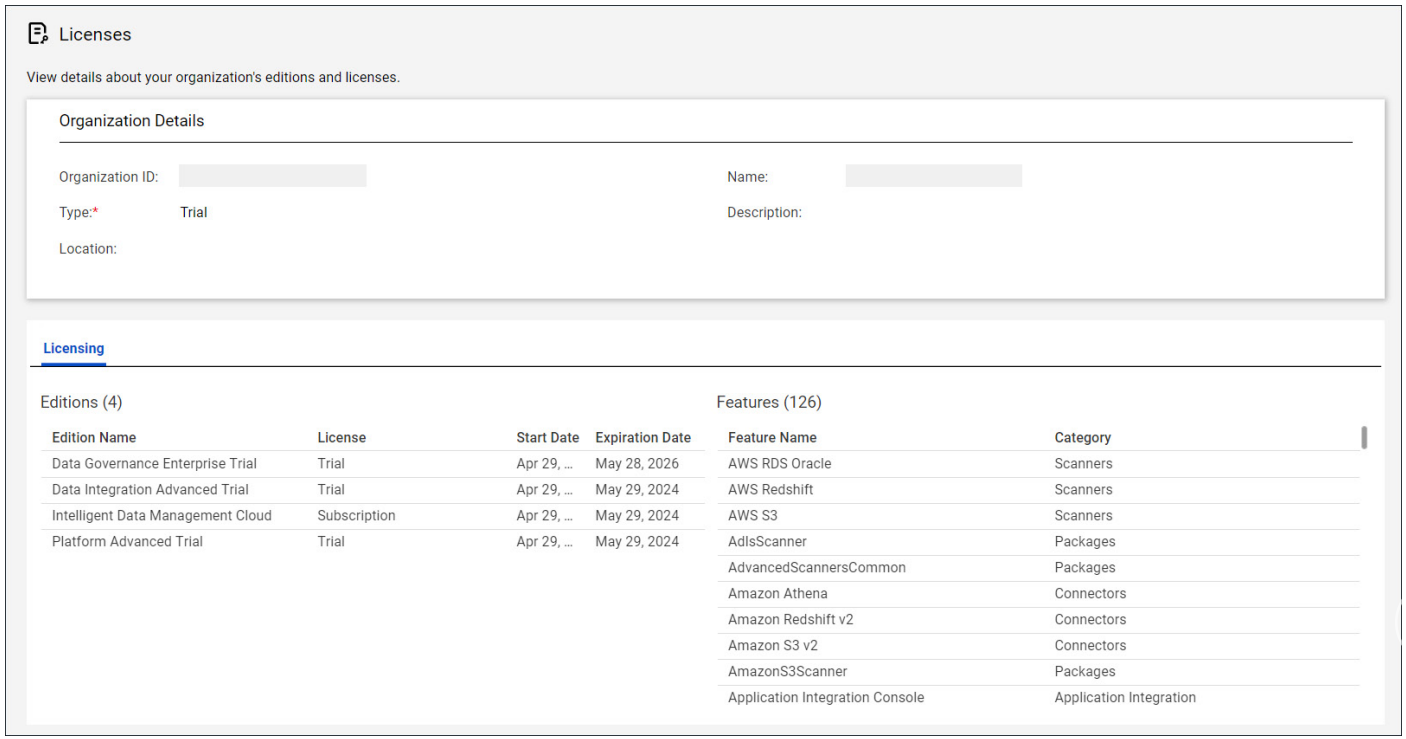

Where data & AI come to LIFE

Review Licenses

To access CLAIRE GPT, ensure that your organization administrator has set up the Informatica® Intelligent Data Management Cloud™ license for your organization.

To view the licenses set up for your organization, see the **Licenses** page in Administrator.

For detailed information about licenses for CLAIRE GPT, see **Review licenses** in the Administration help.

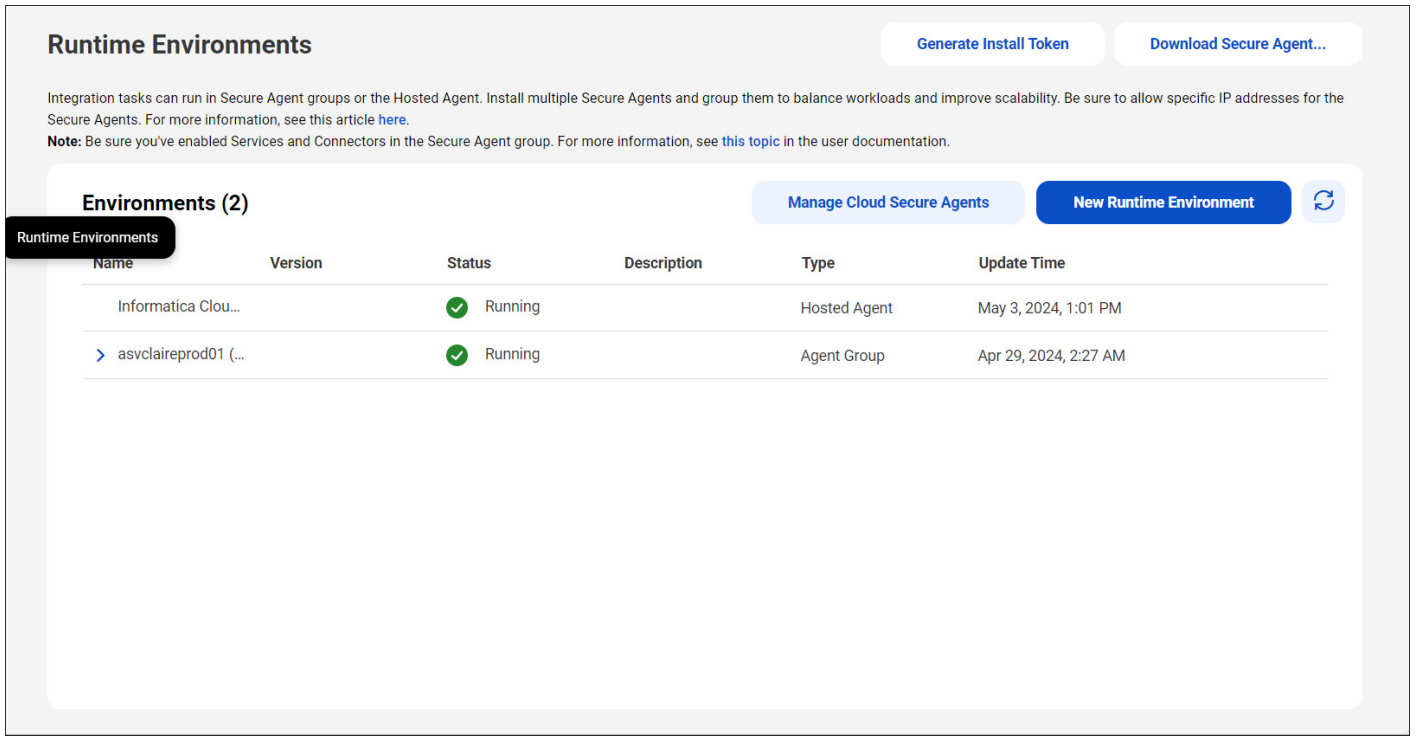

View your organization's licenses.

Configure Runtime Environments

A runtime environment is the execution platform where you run CLAIRE GPT tasks. A runtime environment can consist of one or more Secure Agent services. The runtime environment that your organization uses depends on your licenses and the services that your organization uses. You can configure runtime environments on the **Runtime Environments** page in Administrator.

For detailed information about configuring runtime environments for CLAIRE GPT, see **Configure runtime environments** in the Administration help.

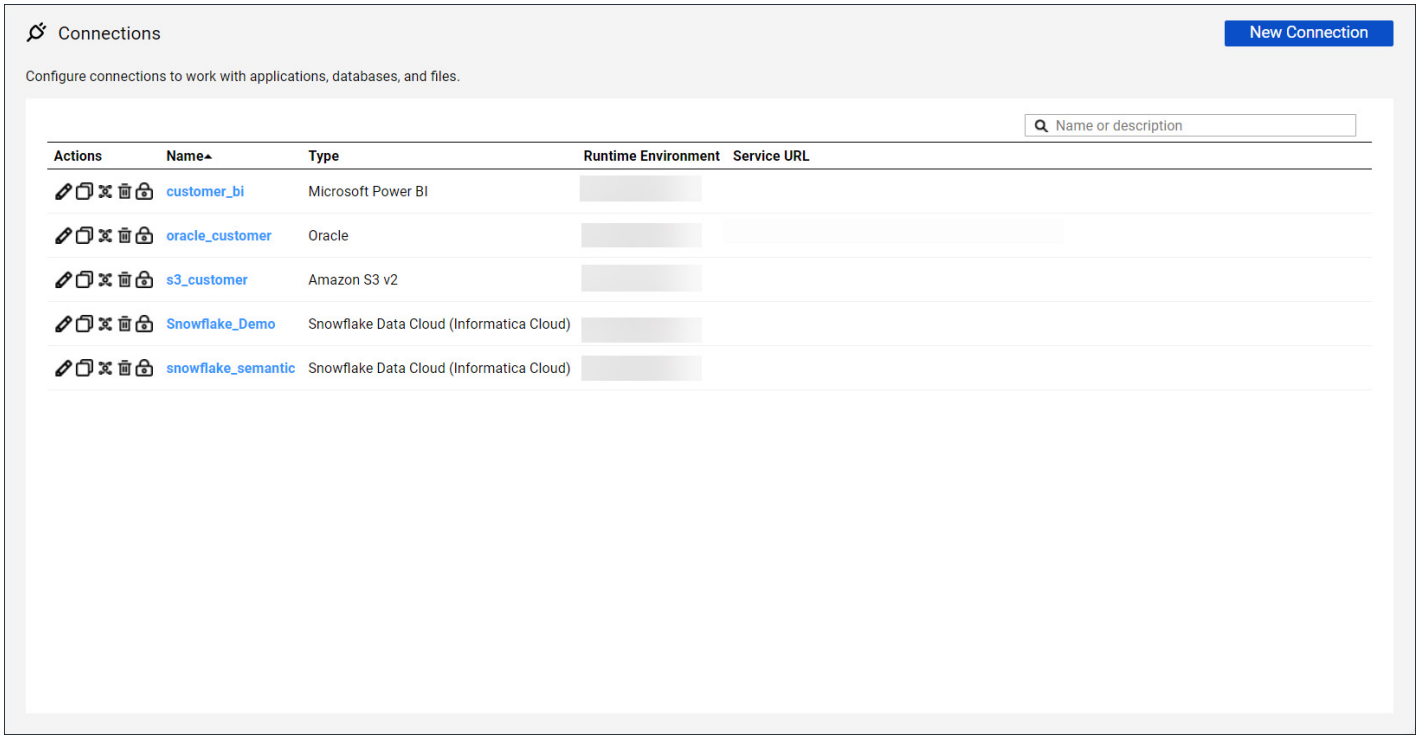

Configure runtime environments.

Configure Connections

Connections provide access to data in cloud applications, platforms, databases, and flat files. On the **Connections** page in Administrator, you can use connectors to create connections to various source systems.

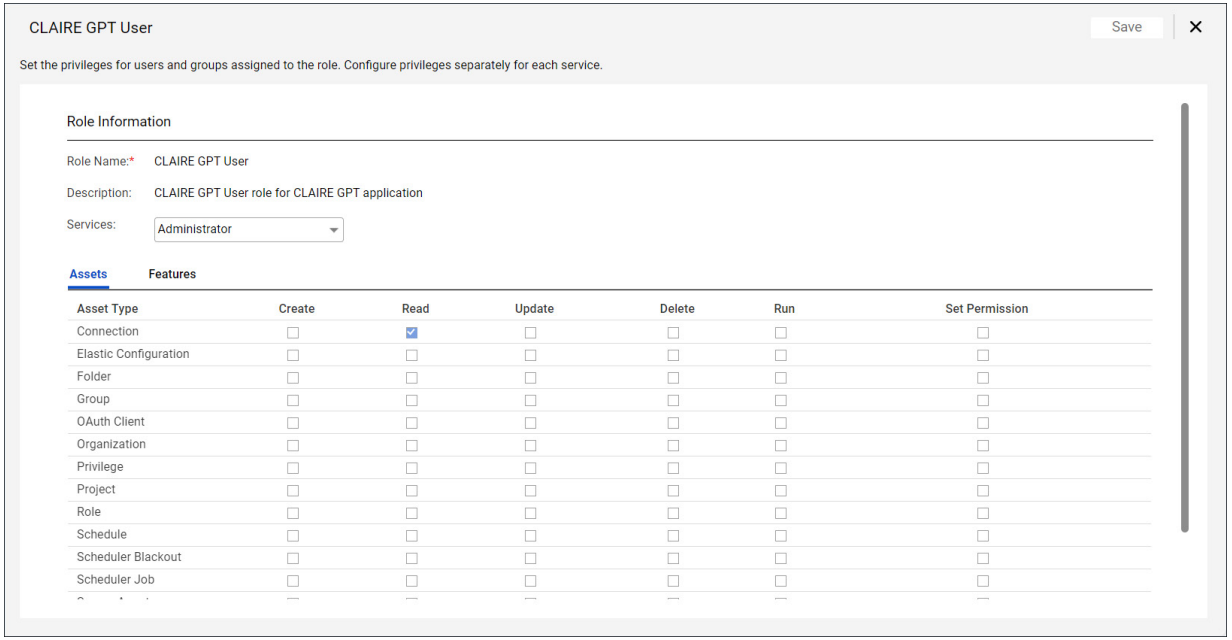

For detailed information about configuring connections for CLAIRE GPT, see **Configure connections** in the Administration help.

Configure connections to source systems.

Add Users and Assign Roles

Add new users and assign users to appropriate roles in Administrator so that users in your organization can work with CLAIRE GPT.

Add new users and assign roles.

For detailed information about managing users and roles for CLAIRE GPT, see **Add users and assign roles** in the Administration help.

CLAIRE GPT provides the **CLAIRE GPT User** role by default. The following feature privileges are enabled by default for the CLAIRE GPT User role:

- Access CLAIRE GPT Application
- Create Transformation Pipelines
- Data Download
- Data Exploration
- Data Preview
- Run Data Profiling
- Run Data Quality

Send a *Welcome* Email to New Users

When you add users to CLAIRE GPT, use the following sample template to send a *Welcome* email to the new users:

Subject: Welcome to CLAIRE GPT – Your Access is Enabled

Hi [User name],

We're glad to let you know that we've enabled your access to CLAIRE GPT. We encourage you to explore its features and capabilities.

If you have any questions or encounter any issues, please let us know. We would greatly appreciate your feedback.

Here's some information to help you get started:

- **CLAIRE GPT documentation**
- **CLAIRE GPT online help**

Thank you!
