Preface

Read *What's New* to learn about new features, enhancements, and behavior changes in Data Profiling.

Informatica Resources

Informatica provides you with a range of product resources through the Informatica Network and other online portals. Use the resources to get the most from your Informatica products and solutions and to learn from other Informatica users and subject matter experts.

Informatica Network

The Informatica Network is the gateway to many resources, including the Informatica Knowledge Base and Informatica Global Customer Support. To enter the Informatica Network, visit https://network.informatica.com.

As an Informatica Network member, you have the following options:

- Search the Knowledge Base for product resources.
- View product availability information.
- Create and review your support cases.
- Find your local Informatica User Group Network and collaborate with your peers.

Informatica Knowledge Base

Use the Informatica Knowledge Base to find product resources such as how-to articles, best practices, video tutorials, and answers to frequently asked questions.

To search the Knowledge Base, visit https://search.informatica.com. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

Informatica Documentation

Use the Informatica Documentation Portal to explore an extensive library of documentation for current and recent product releases. To explore the Documentation Portal, visit https://docs.informatica.com.

If you have questions, comments, or ideas about the product documentation, contact the Informatica Documentation team at infa_documentation@informatica.com.

Informatica Product Availability Matrices

Product Availability Matrices (PAMs) indicate the versions of the operating systems, databases, and types of data sources and targets that a product release supports. You can browse the Informatica PAMs at https://network.informatica.com/community/informatica-network/product-availability-matrices.

Informatica Marketplace

The Informatica Marketplace is a forum where you can find solutions that extend and enhance your Informatica implementations. Leverage any of the hundreds of solutions from Informatica developers and partners on the Marketplace to improve your productivity and speed up time to implementation on your projects. You can find the Informatica Marketplace at https://marketplace.informatica.com.

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:
https://www.informatica.com/services-and-training/customer-success-services/contact-us.html.

To find online support resources on the Informatica Network, visit https://network.informatica.com and select the eSupport option.

CHAPTER 1

October 2026

The October 2026 release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following updates.

New features and enhancements

The October release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following new features and enhancements.

Microsoft Fabric Data Warehouse connections for source mapplets

You can run a profile on source mapplets that use Microsoft Fabric Data Warehouse connections.

CHAPTER 2

July 2026

The July 2026 release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following updates.

New features and enhancements

The July release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following new features and enhancements.

Enhanced handling of blank values in inferred insights

When you approve an insight of the type Completeness Check or Completeness Variation, the Data Quality rule template applies the TRIM function to string values before checking for blank values. After the TRIM function runs, the associated rule specification treats any empty values as blank and marks them incomplete.

CHAPTER 3

October 2025

The October 2025 release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following updates.

Important notices

The October 2025 release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following important notices.

JSON web tokens and session IDs

Effective November 3, 2025, your organization administrator can change the authentication type used for REST API requests. If the administrator selects the JSON Web Token (JWT) authentication type, custom scripts need to handle automatic re-authentication before or after the token expires. For more information, see the JWT Support Knowledge article.

CHAPTER 4

July 2025

The July 2025 release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following updates.

New features and enhancements

The July release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following new features and enhancements.

Support for Structure Parser transformations in source mapplets

You can run a profiling task on a source mapplet that includes a Structure Parser transformation.

Support for multiple schemas in Microsoft SQL Server and Oracle

You can run a profiling task that reads data from objects in multiple schemas in a Microsoft SQL Server or Oracle database.

Support for rule occurrence name updates after a profile run

After you run a profiling task with a rule occurrence, you can edit the name of the rule occurrence in the profiling task.

Advanced options for ODBC, Microsoft SQL Server, and Oracle

You can configure advanced options when you create a profiling task that reads data from source objects over an ODBC, Microsoft SQL Server, or Oracle connection.

Changed behavior

The July release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following changed behavior.

Metadata access control for rule occurrences and scorecards

To create rule occurrences and view scorecard metrics, you need the following permissions:

- Create, Read, Update, and Delete for the Data Profiling Task asset type on your user role. An administrator can set the Data Profiling Task permissions for you in the Administrator service.

- Create, Update, Delete, and Manage Access for the Data Quality Rule Occurrence asset type on your user role policy and stakeholder role policy definitions. An administrator can configure the user role and stakeholder role policies for you in Metadata Command Center.

Previously, you needed the Stakeholdership feature privilege for Data Governance and Catalog to create rule occurrences and view scorecard metrics.

Note: Stakeholders don't get automatically assigned to Data Quality Rule Occurrence assets. When there are no stakeholders assigned, the creator of the asset gets a notification for every change in the score trend. After you assign a stakeholder, only the stakeholder is notified.

CHAPTER 5

April 2025

The April 2025 release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following updates.

New features and enhancements

This release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following new features and enhancements.

Support for Parquet and CSV external data in Databricks

You can run a profiling task on external data in a Parquet table or a CSV file.

IAM role authentication for Amazon S3 on advanced clusters

You can now use the IAM role authentication mechanism for an Amazon S3 connection on an advanced cluster.

Support for MariaDB and MySQL source data

You can create and run a profiling task that reads data from MariaDB or MySQL source objects using a MySQL connector.

Support for SAP HANA source data

You can create and run a profiling task that reads data from a SAP HANA source object.

Support for column with nvarchar(max) data in Microsoft SQL Server

You can run a profiling task on columns that contain data of type nvarchar(max) from a Microsoft SQL Server source object.

Changed behavior

This release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following changed behavior.

Pagination of profile results

Data Profiling paginates the records on the **Results** tab when the number of records that the profiling job returns exceeds 50.

Previously, Data Profiling displayed all of the records in the profile results on a single pane in the **Results** tab.

CHAPTER 6

February 2025

The February 2025 release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following updates.

Changed behavior

This release of Informatica Intelligent Cloud Services℠ Data Profiling includes the following changed behavior.

Support for custom dimensions in scorecards

You can group the scores in a scorecard dashboard on the custom dimensions that an underlying rule specification defines in addition to the built-in dimensions on the rule specification.

Previously, you grouped the scores based on built-in dimensions only.
