Read the *Data Profiling Release Notes* to learn about the known limitations and fixed limitations in Data Profiling.

Fixed Issues

The tables in this section describe recent fixed issues for IDMC℠ Data Profiling. Not all releases include fixed issues.

The following table lists the fixed issues in the October 2026 release:

Issue	Description
CP-14712	When you schedule profiling tasks to run at regular intervals on multiple source mapplets, the tasks run indefinitely.

The following table lists the fixed issues in the April 2026 release:

Issue	Description
CP-14372	When you add a filter to a profiling task and run the task on an SAP Table connection, Data Profiling doesn't honor the filter conditions.

The following table lists the fixed issues in the October 2025 release:

Issue	Description
CP-14185	An exception task fails in the following scenario: - The task contains rule specifications that use different precision values. - The task writes exception data to local storage.
CP-14015	You can't select a source mapplet in a data profiling task if you specify only Read permission for mapplets on the Data Integration service in the runtime environment.
CP-13820	When you delete filters from a data profiling task that you previously imported and you re-import the task, Data Profiling duplicates any rule occurrence that the previous task created in Data Governance and Catalog.
CP-13787	When you specify the instance name in a Microsoft SQL Server connection and you run a profiling task that reads data over the connection, the task fails.

Issue	Description
CP-13723	When you re-import a data profiling task that includes filters, Data Profiling creates duplicate filters and the import fails.
CP-12948	When you run a profiling task on a source mapplet that uses an Amazon Redshift connection, the task fails. This issue occurs when you configure the direct read mode as an advanced property on the Amazon Redshift source.
CP-4123	Onscreen profile elements such as the **Definition** tab and the profile run results on the **Results** tab can take longer than expected to load. The issue occurs if your organization has a large number of connections, such as over 1,000 connections.
CP-12681	When you re-import a data profiling task that includes rule occurrences, Data Profiling doesn't retain primary and secondary data elements attached to the rule occurrences in Data Governance and Catalog.
CP-12665	When you run profile on a mapplet that includes a Snowflake source object with a custom query, the job fails with the following error: `Profile job failed with error null.`
CP-12385	When you create a profile for a JDBC V2 source with the JDBCV2_MariaDB connection, and apply a filter on the Date or Timestamp column, the profiling task fails with an error. (April 2024)
CP-12120	You can download logs for profiling jobs if the **Logs - View and Download** feature is not enabled for your role on the Monitor service.

Known Issues

The tables in this section describe recent known issues for IDMC℠ Data Profiling. Not all releases include new known issues.

There are no new known issues in the October 2025 release of IDMC℠ Data Profiling.

The following table describes IDMC℠ Data Profiling known issues in the February 2025 release:

Issue	Description
CP-13407	A profiling task import fails if the data quality rule occurrence dimension that the task uses doesn't exist in the target organization.

Informatica Global Customer Support

You can contact a Global Support Center through the Informatica Network or by telephone.

To find online support resources on the Informatica Network, click **Contact Support** in the IDMC Help menu to go to the **Cloud Support** page. The **Cloud Support** page includes system status information and community discussions. Log in to Informatica Network and click **Need Help** to find additional resources and to contact Informatica Global Customer Support through email.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at https://www.informatica.com/services-and-training/support-services/contact-us.html.
