Abstract

Use this article as a reference to understand the task flow to integrate the Informatica domain with the Hadoop environment or with Azure Databricks while you read the *Informatica Big Data Management 10.2.2 Integration Guide*. This reference includes integration and upgrade task flow diagrams for the Databricks environment as well as the following Hadoop distributions: Amazon EMR, Azure HDInsight, Cloudera CDH, Hortonworks HDP, and MapR.

Supported Versions

- Big Data Management 10.2.2

Overview

Through Big Data Management®, you can integrate the Informatica domain with the Hadoop environment or the Databricks environment. Supported Hadoop distributions include Amazon EMR, Azure HDInsight, Cloudera CDH, Hortonworks HDP, and MapR.

The integration process for each distribution includes the following high-level tasks:

Before you begin tasks

Complete these tasks to prepare the Hadoop or Databricks and domain environments for integration.

Integration tasks

Complete these tasks to import cluster configuration to the domain, create and configure connections, and enable mappings to run in the Hadoop or Databricks environment.

If you are integrating the domain with a Hadoop cluster for the first time or with Azure Databricks, refer to the integration task flow diagram for the distribution. If you are upgrading from a previous version of Big Data Management in a Hadoop environment, refer to the upgrade task flow diagrams for the distribution.

For more information about each task, refer to the Informatica® Big Data Management 10.2.2 Integration Guide.

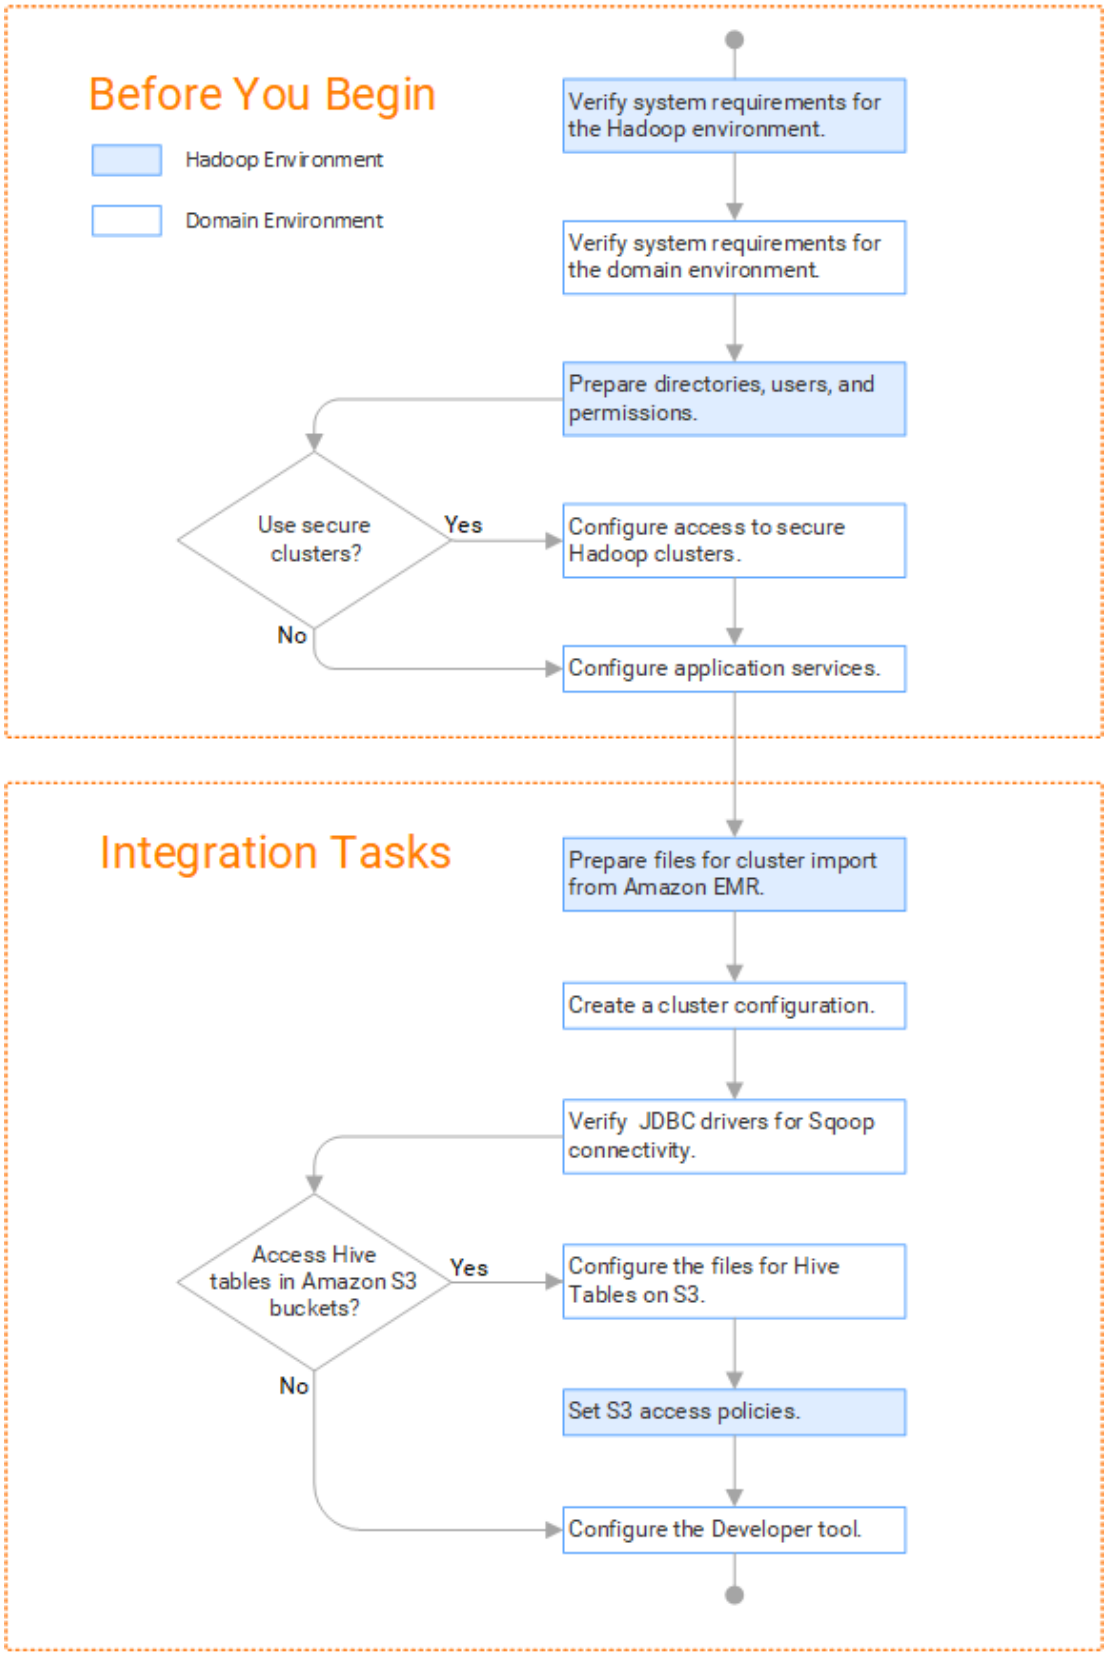

Amazon EMR Task Flows

Depending on whether you want to integrate or upgrade Big Data Management in an Amazon EMR environment, you can use the flow charts to perform the following tasks:

- Integrate the Informatica domain with Amazon EMR for the first time.
- Upgrade from version 10.2.1.
- Upgrade from version 10.2.
- Upgrade from a version earlier than 10.2.

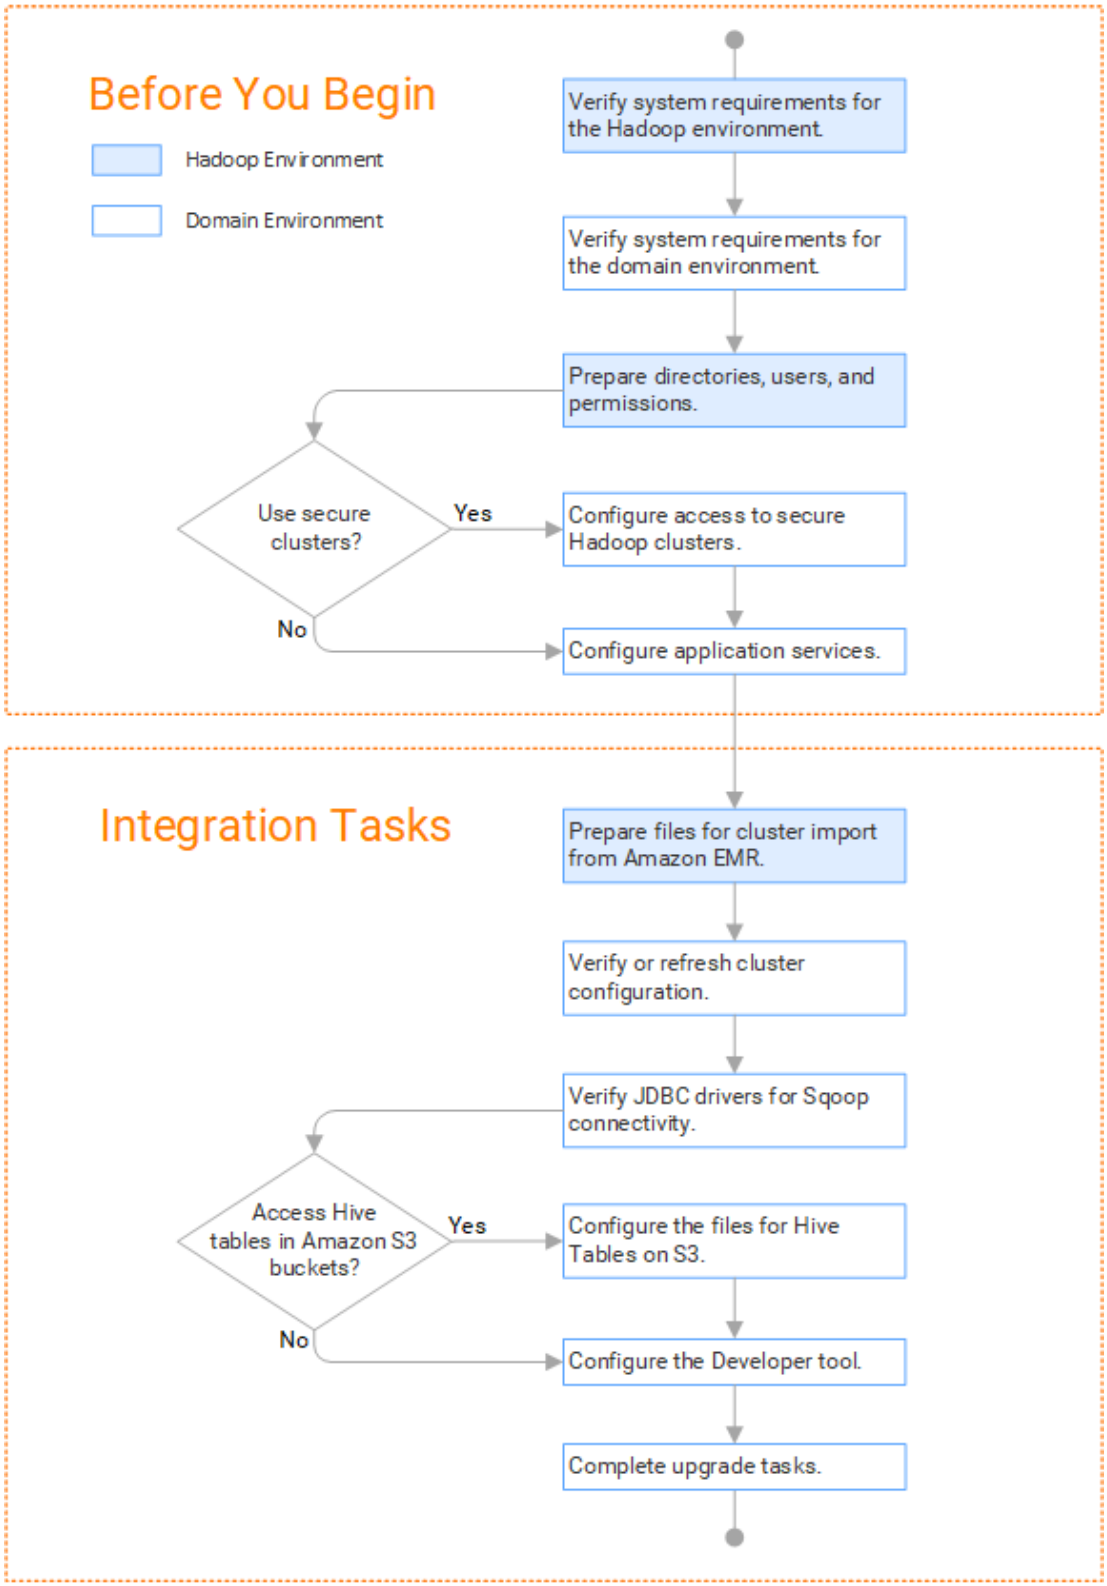

Task Flow to Integrate with Amazon EMR

The following diagram shows the task flow to integrate the Informatica domain with Amazon EMR:

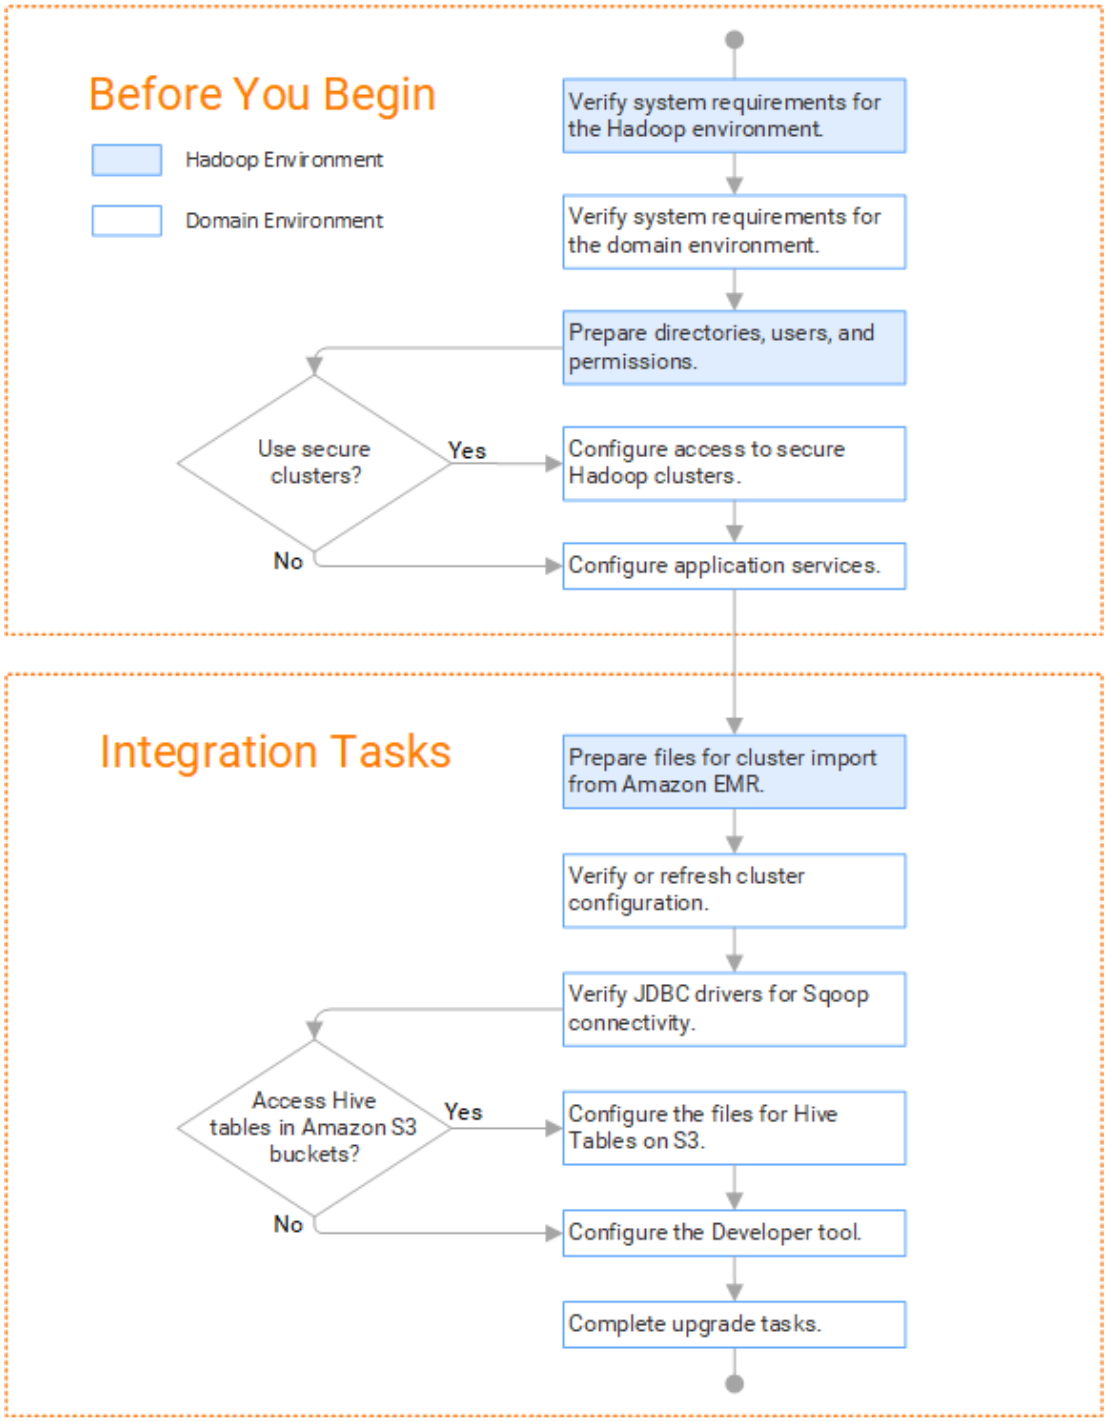

Task Flow to Upgrade from Version 10.2.1

The following diagram shows the task flow to upgrade Big Data Management 10.2.1 for Amazon EMR:

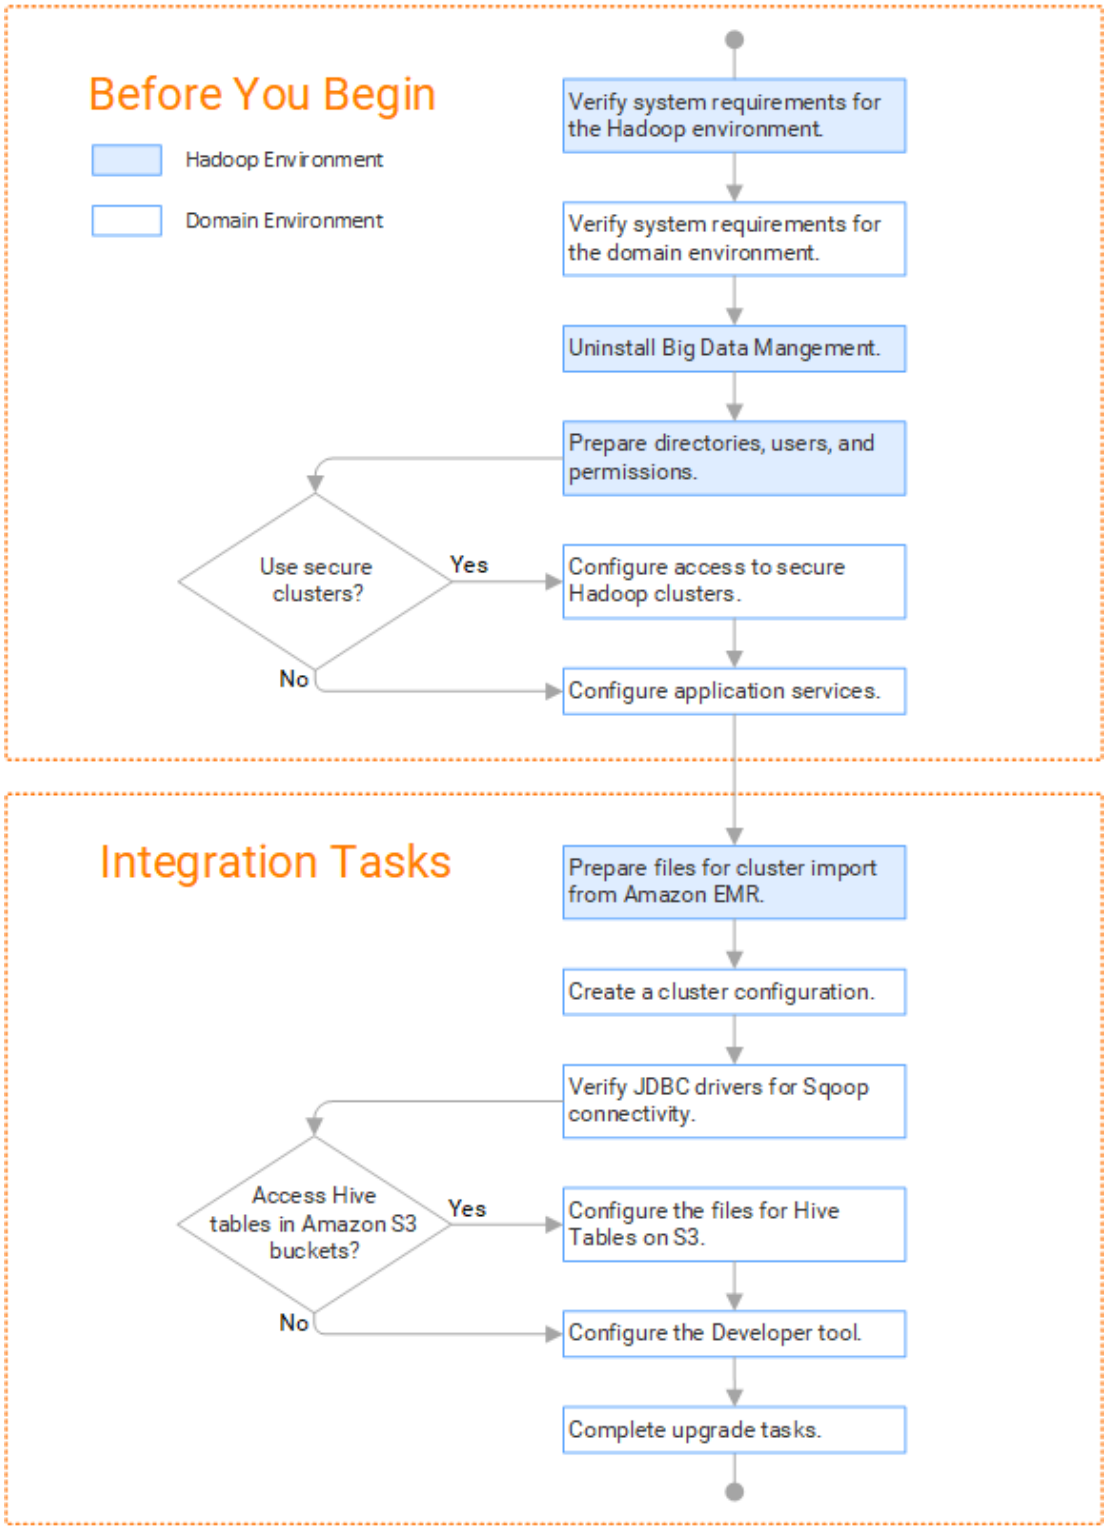

Task Flow to Upgrade from Version 10.2

The following diagram shows the task flow to upgrade Big Data Management 10.2 for Amazon EMR:

Task Flow to Upgrade from a Version Earlier than 10.2

The following diagram shows the task flow to upgrade Big Data Management from a version earlier than 10.2 for Amazon EMR:

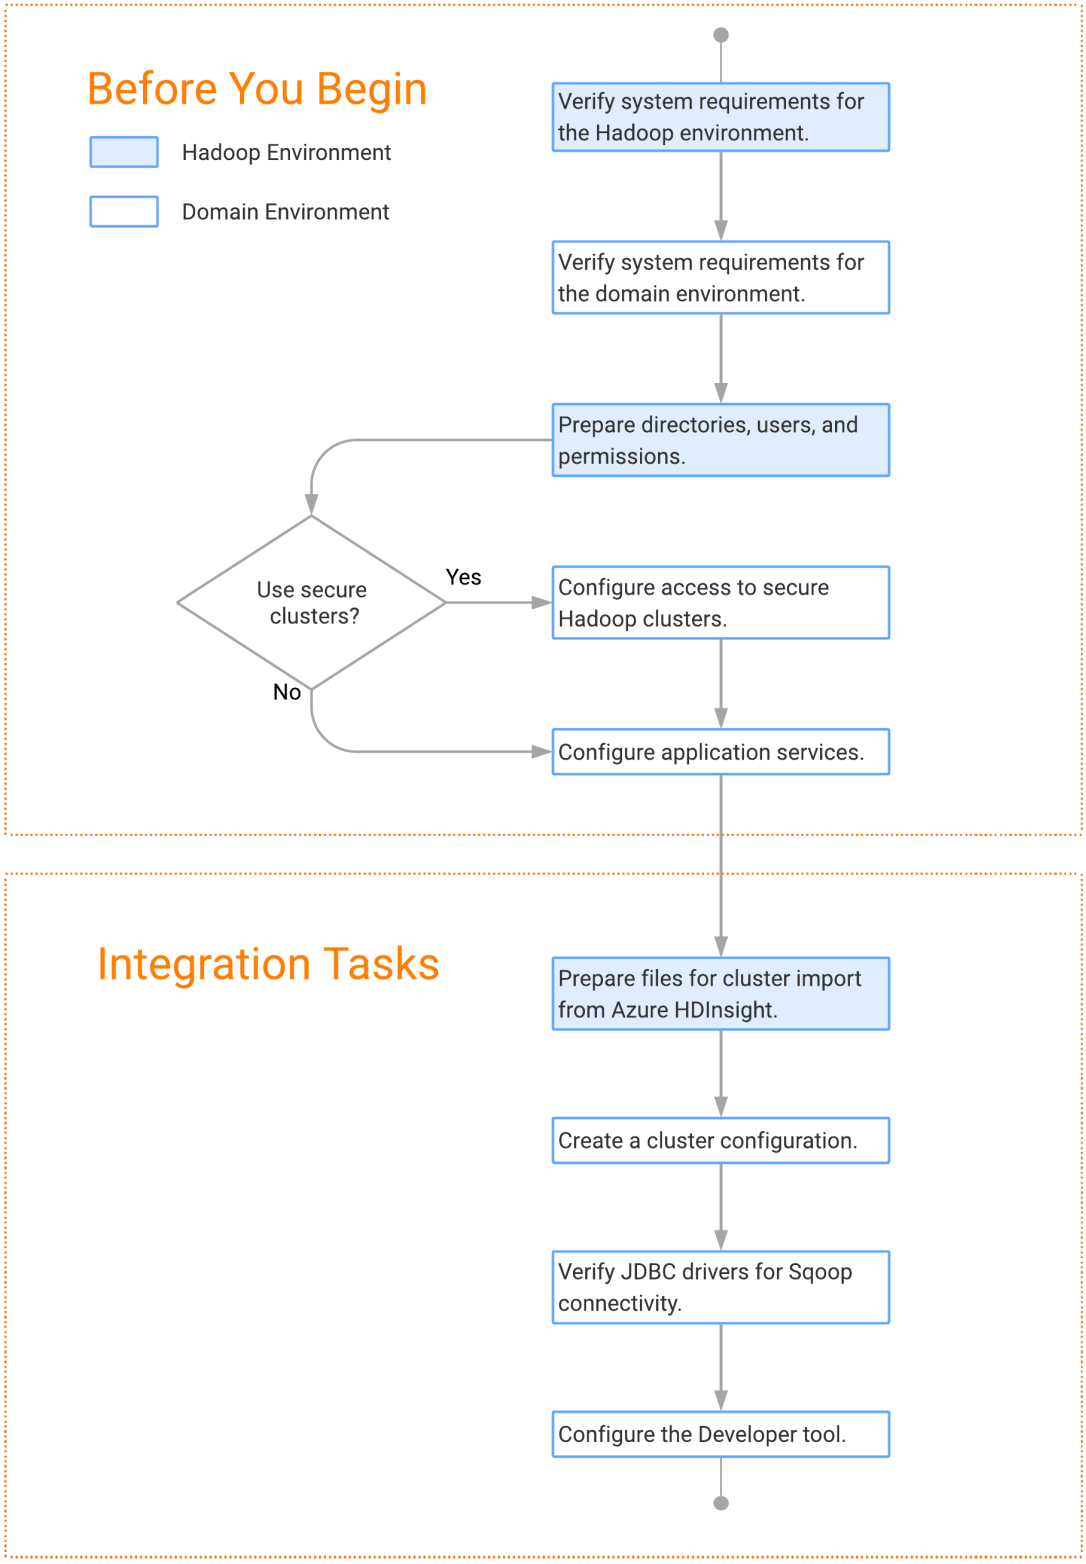

Azure HDInsight Task Flows

Depending on whether you want to integrate or upgrade Big Data Management in an Azure HDInsight environment, you can use the flow charts to perform the following tasks:

- Integrate the Informatica domain with Azure HDInsight for the first time.
- Upgrade from version 10.2.1.
- Upgrade from version 10.2.
- Upgrade from a version earlier than 10.2.

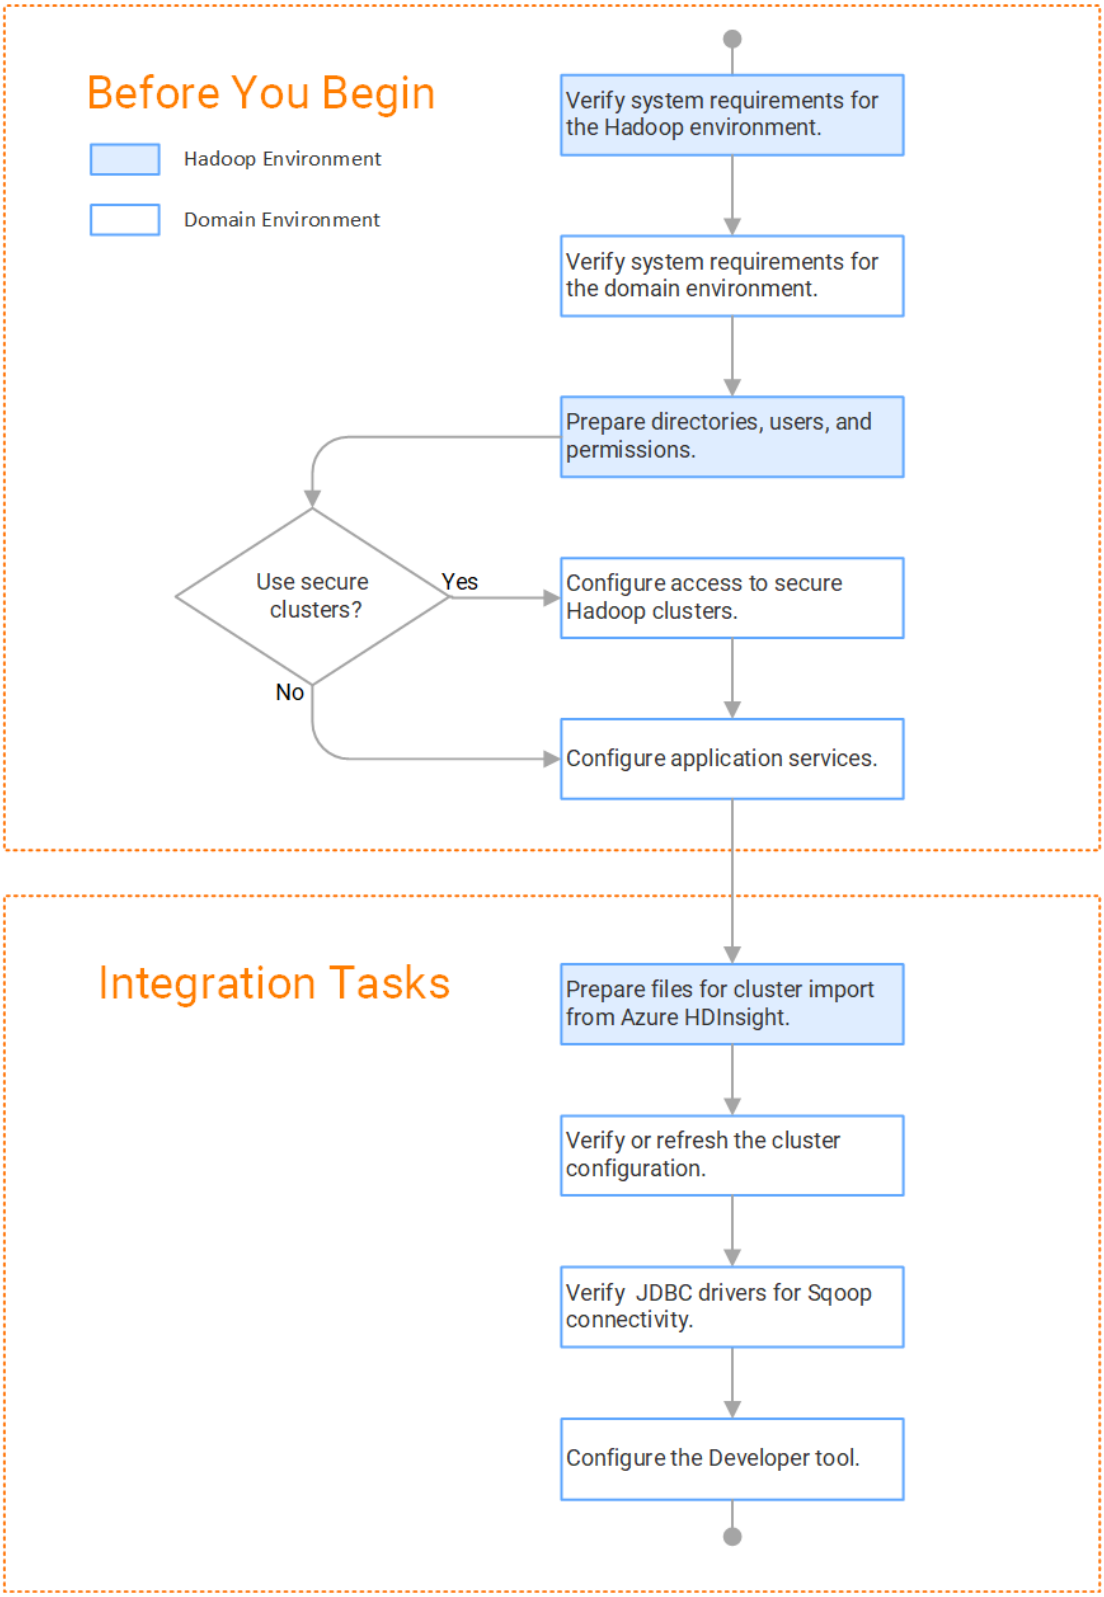

Task Flow to Integrate with Azure HDInsight

The following diagram shows the task flow to integrate the Informatica domain with Azure HDInsight:

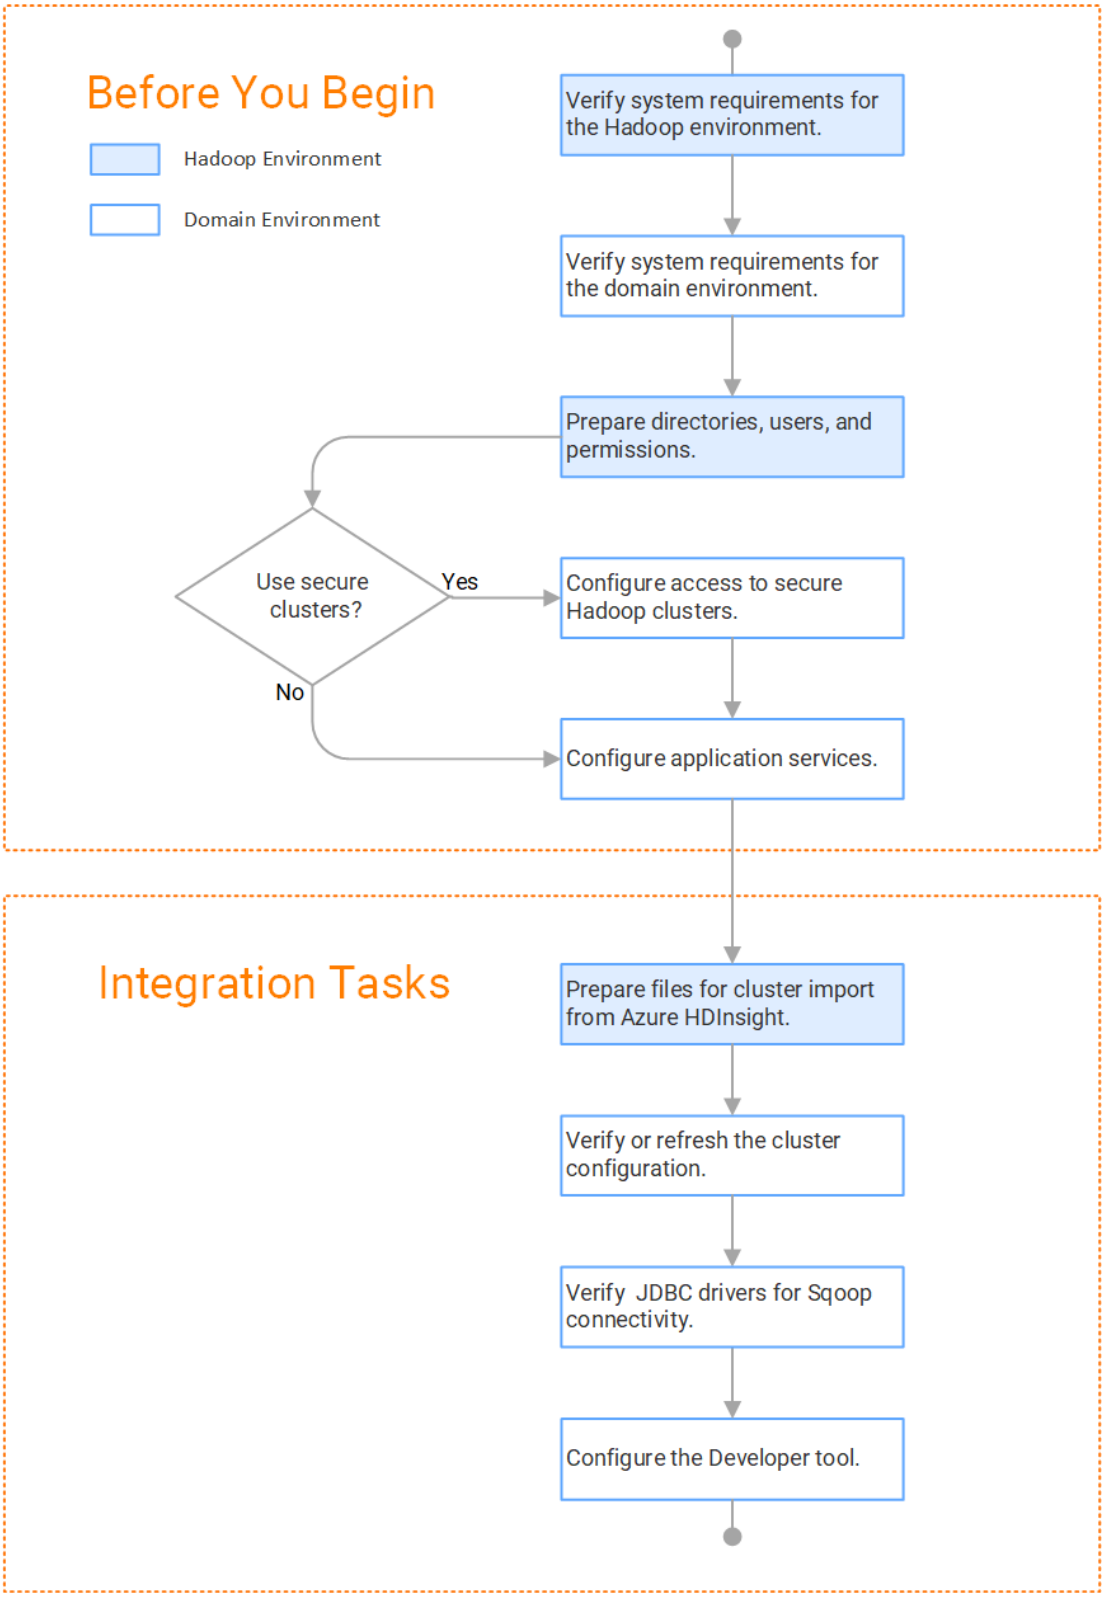

Task Flow to Upgrade from Version 10.2.1

The following diagram shows the task flow to upgrade Big Data Management 10.2.1 for Azure HDI:

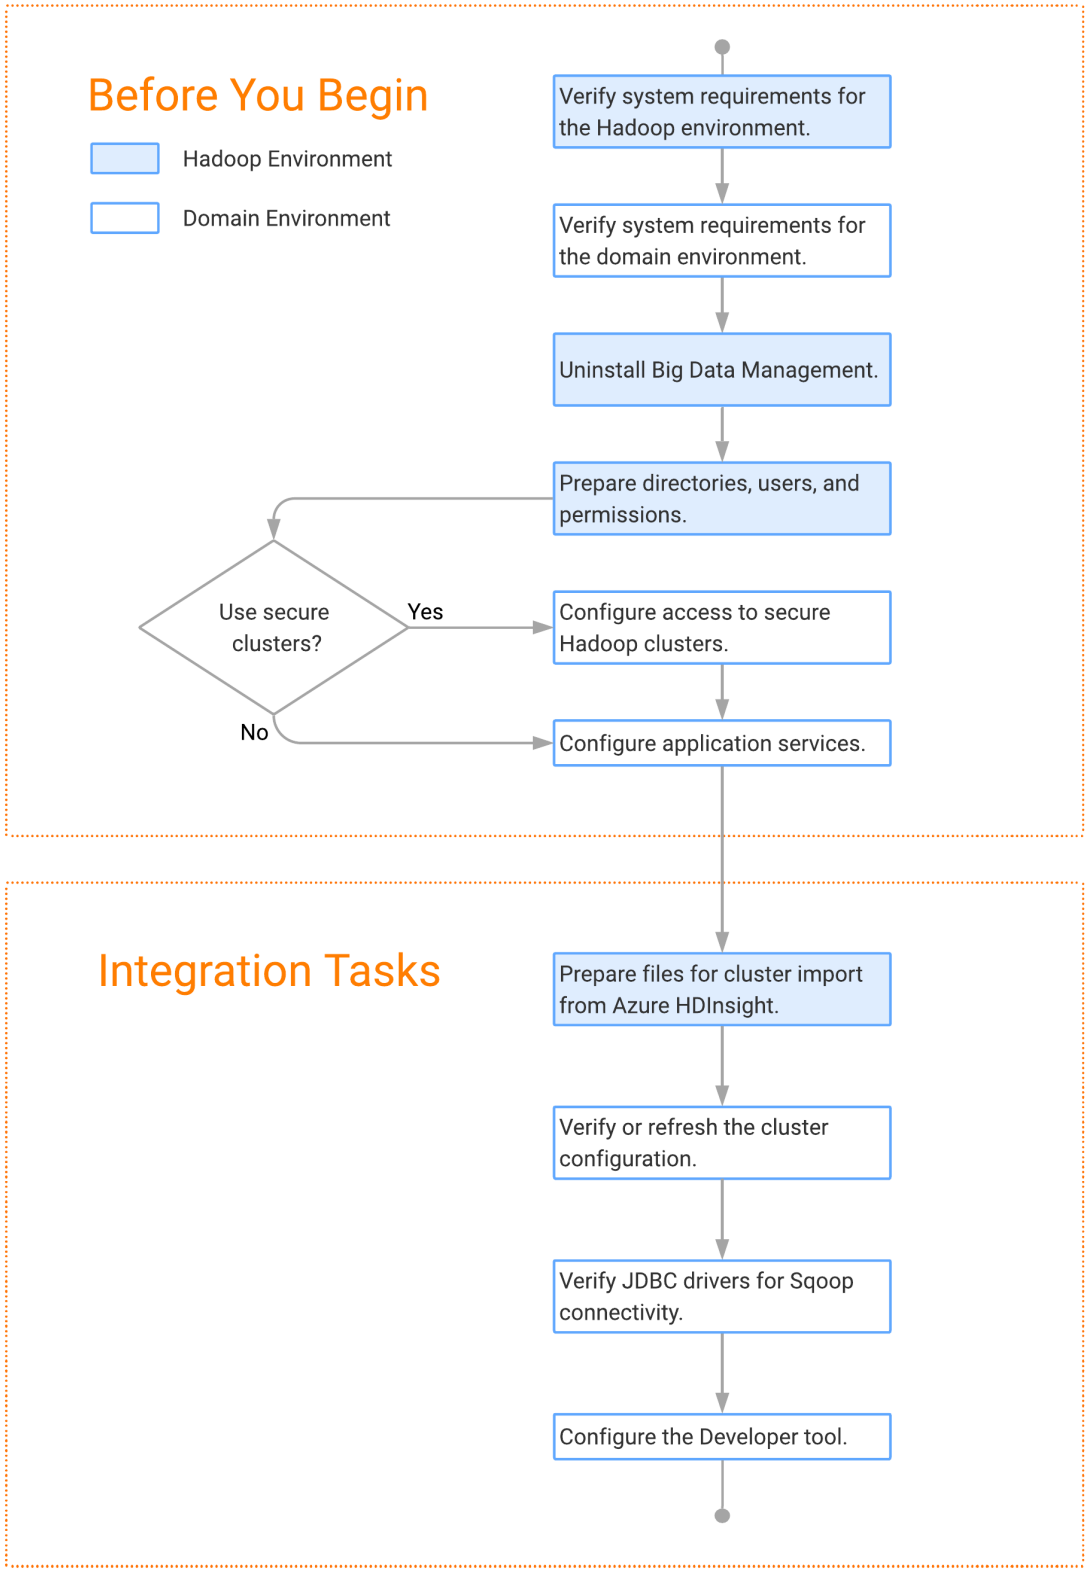

Task Flow to Upgrade from Version 10.2

The following diagram shows the task flow to upgrade Big Data Management 10.2 for Azure HDInsight:

Task Flow to Upgrade from a Version Earlier than 10.2

The following diagram shows the task flow to upgrade Big Data Management from a version earlier than 10.2 for Azure HDInsight:

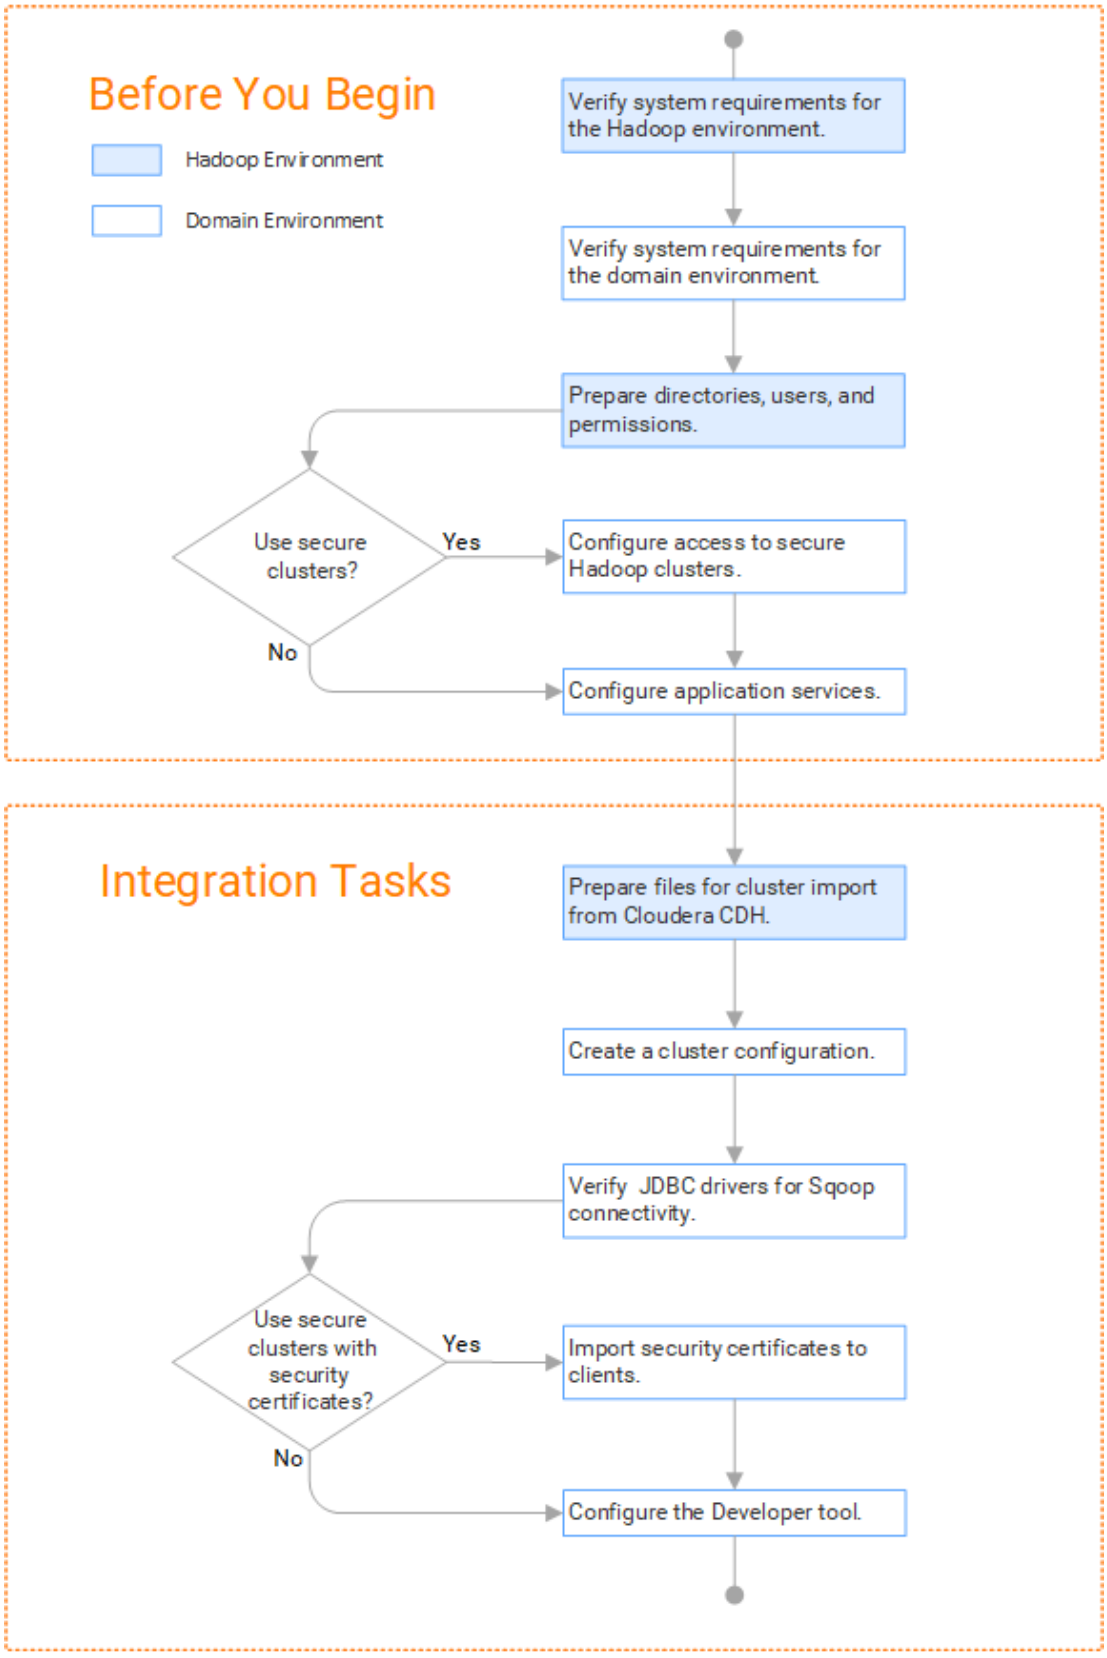

Cloudera CDH Task Flows

Depending on whether you want to integrate or upgrade Big Data Management in a Cloudera CDH environment, you can use the flow charts to perform the following tasks:

- Integrate the Informatica domain with Cloudera CDH for the first time.
- Upgrade from version 10.2.1.
- Upgrade from version 10.2.
- Upgrade from a version earlier than 10.2.

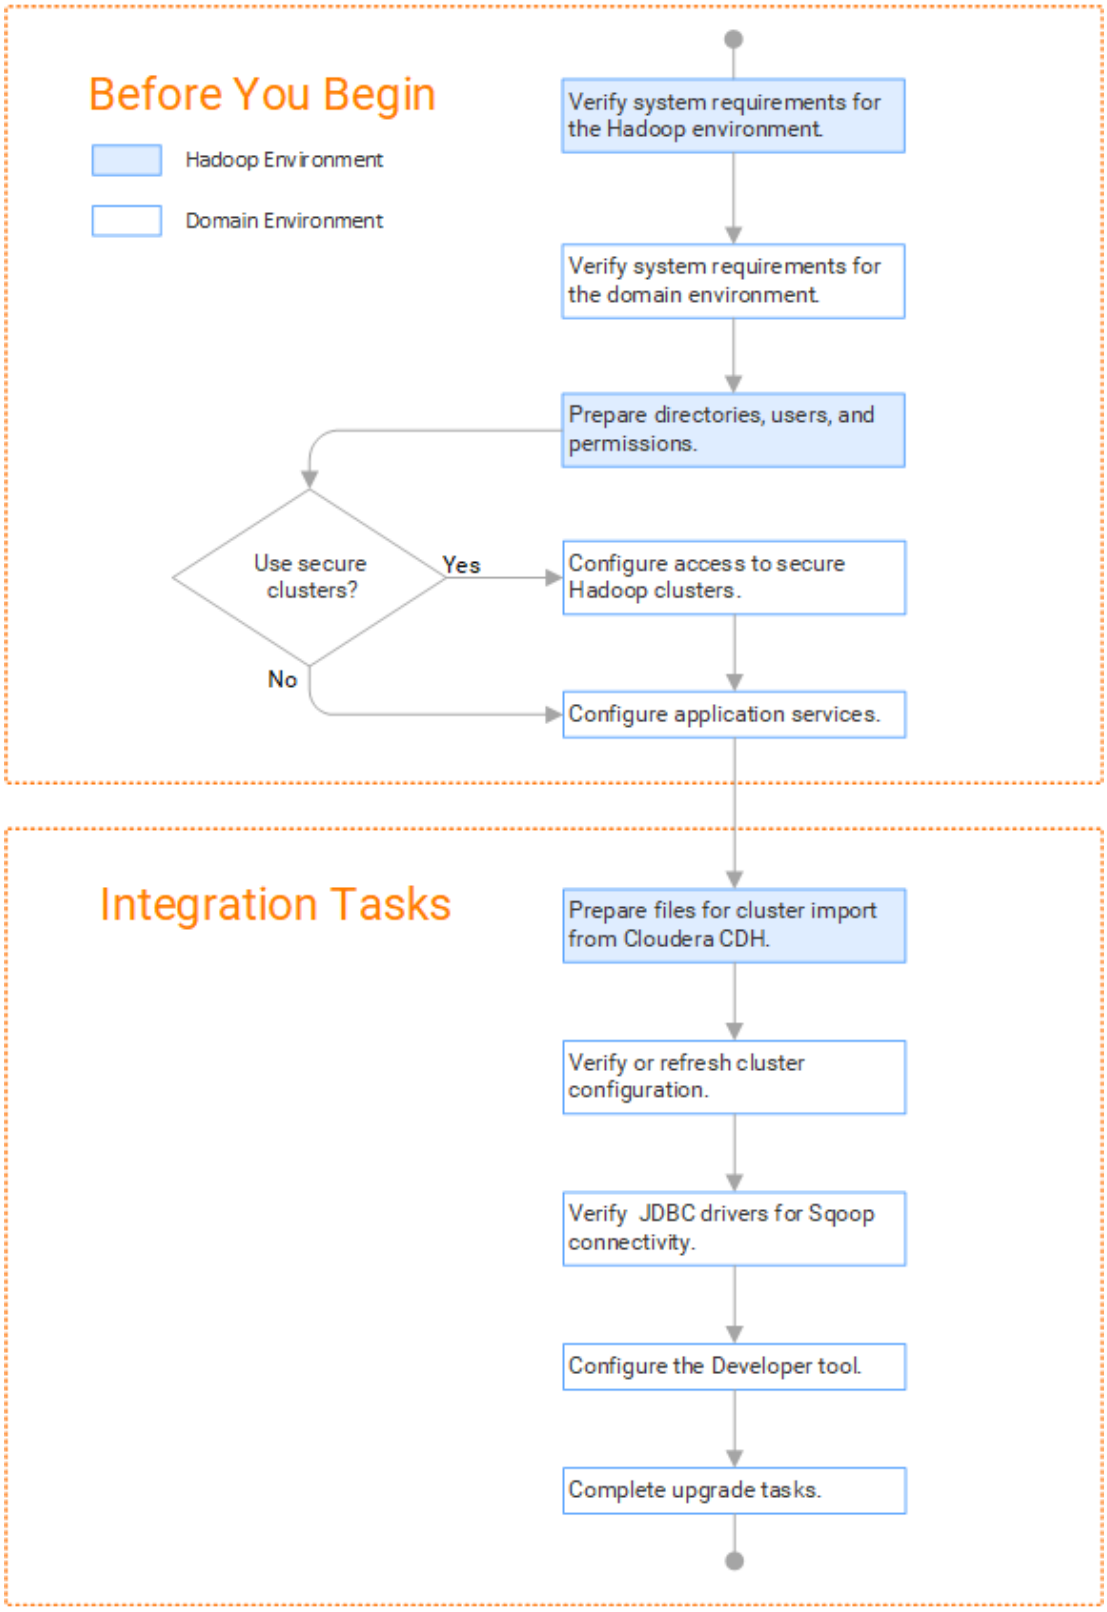

Task Flow to Integrate with Cloudera CDH

The following diagram shows the task flow to integrate the Informatica domain with Cloudera CDH:

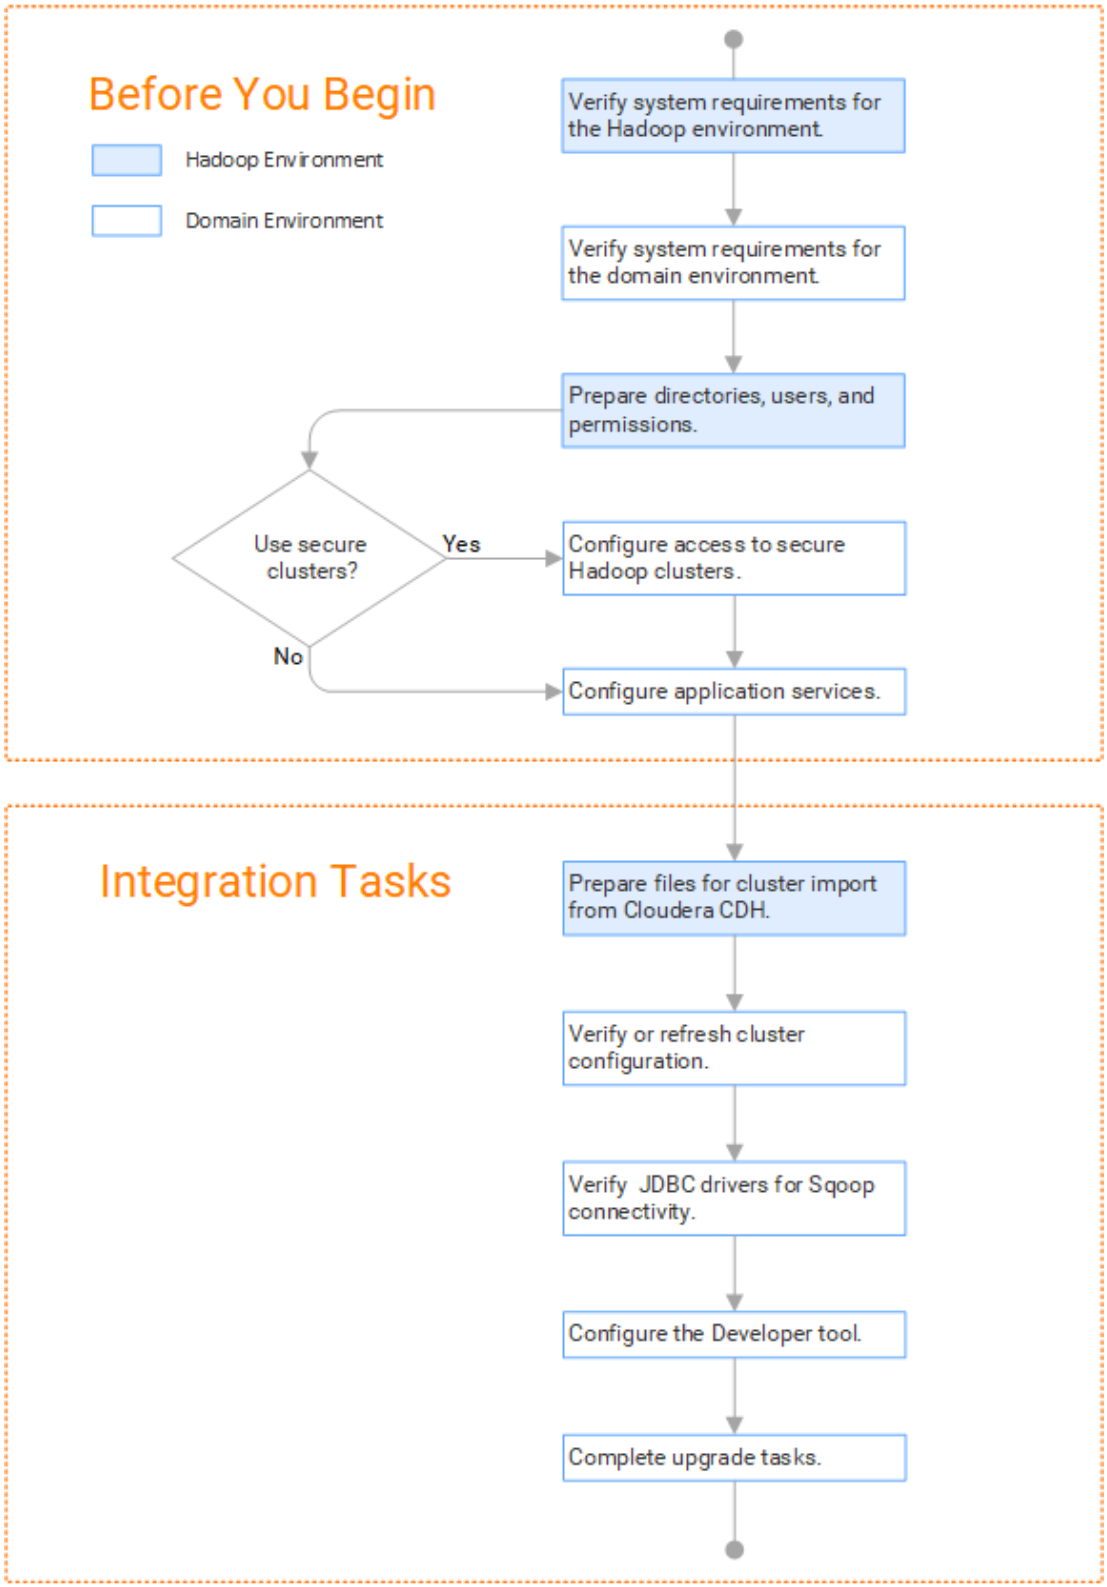

Task Flow to Upgrade from Version 10.2.1

The following diagram shows the task flow to upgrade Big Data Management 10.2.1 for Cloudera CDH:

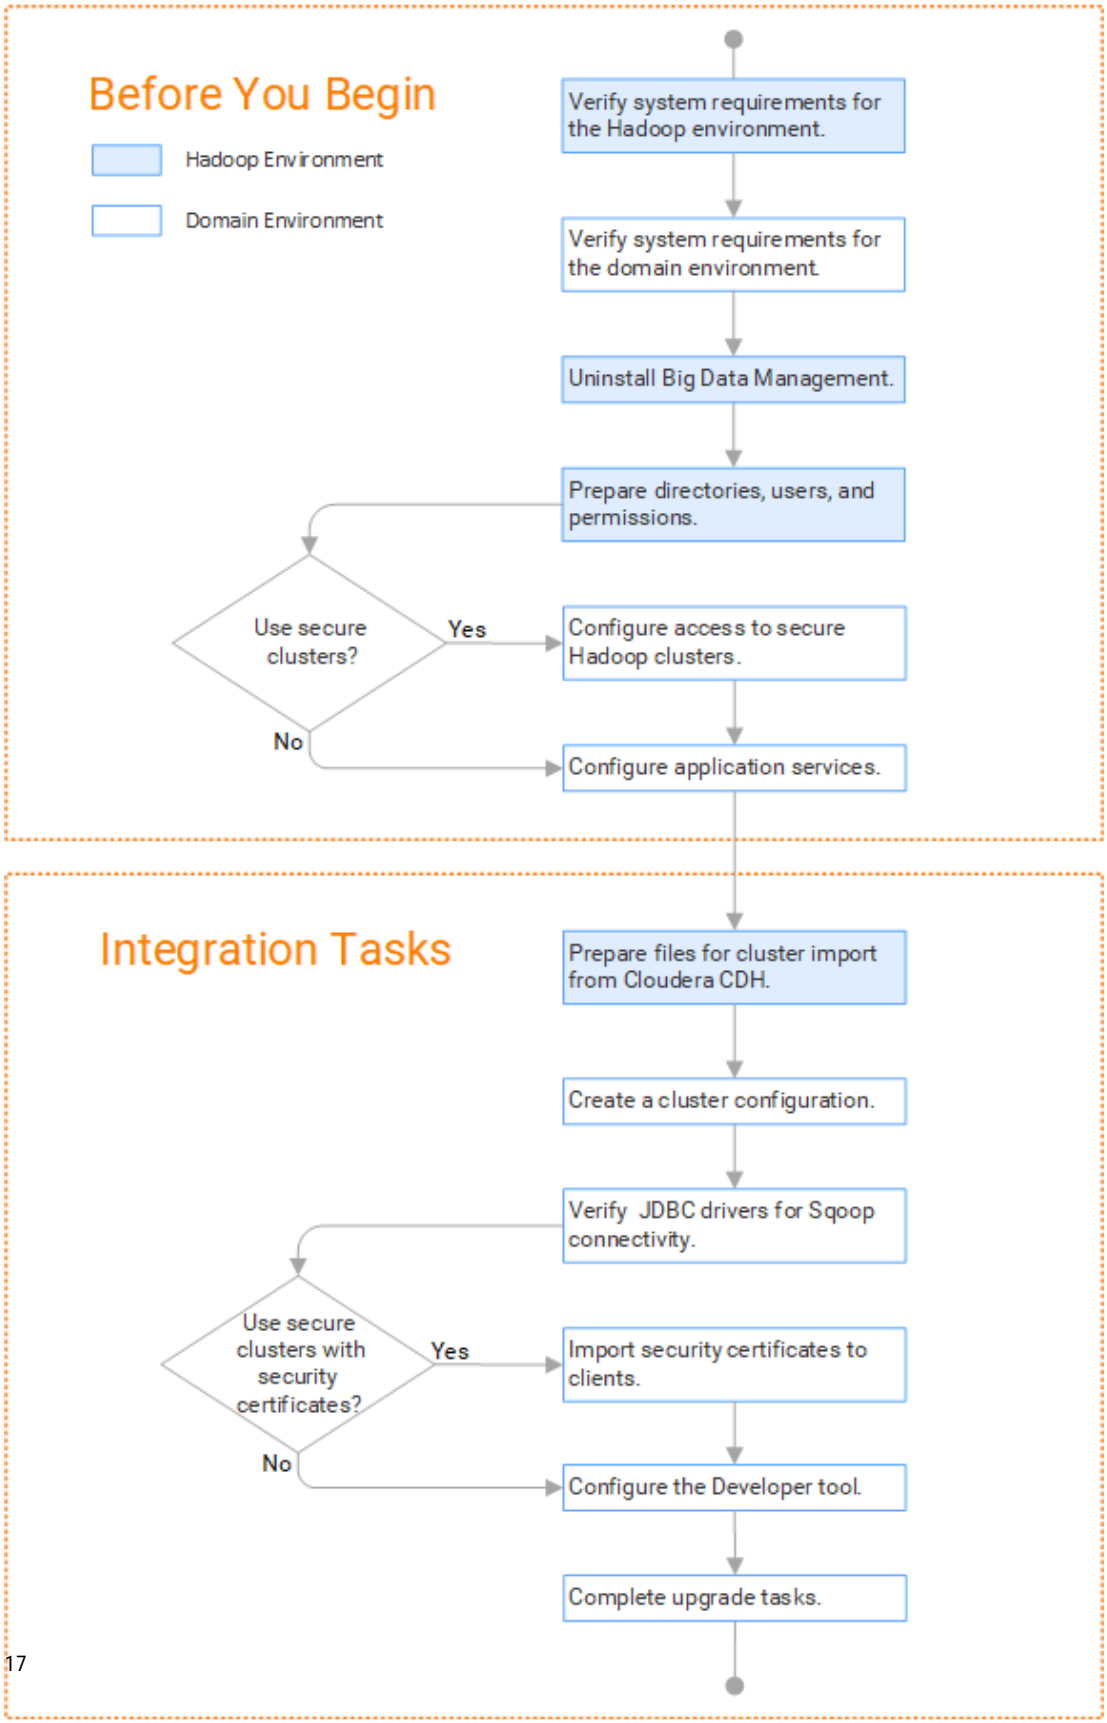

Task Flow to Upgrade from Version 10.2

The following diagram shows the task flow to upgrade Big Data Management 10.2 for Cloudera CDH:

Task Flow to Upgrade from a Version Earlier than 10.2

The following diagram shows the task flow to upgrade Big Data Management from a version earlier than 10.2 for Cloudera CDH:

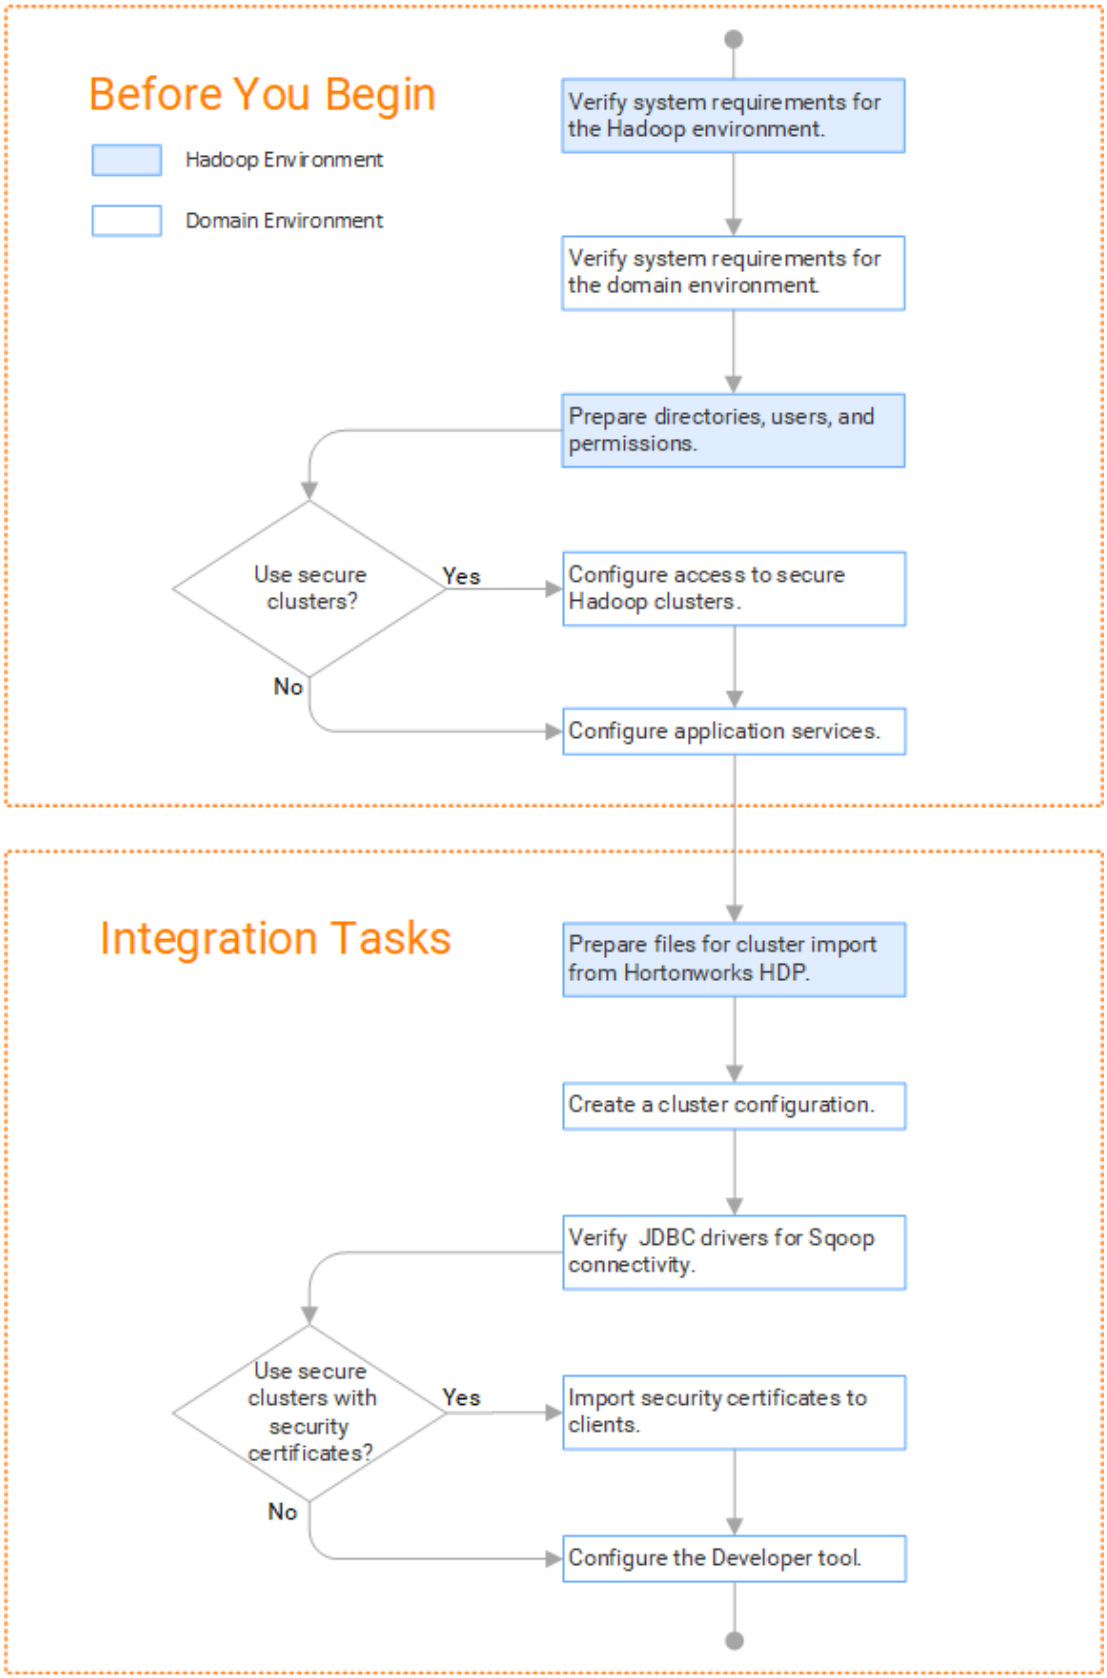

Hortonworks HDP Task Flows

Depending on whether you want to integrate or upgrade Big Data Management in a Hortonworks HDP environment, you can use the flow charts to perform the following tasks:

- Integrate the Informatica domain with Hortonworks HDP for the first time.
- Upgrade from version 10.2.1.
- Upgrade from version 10.2.
- Upgrade from a version earlier than 10.2.

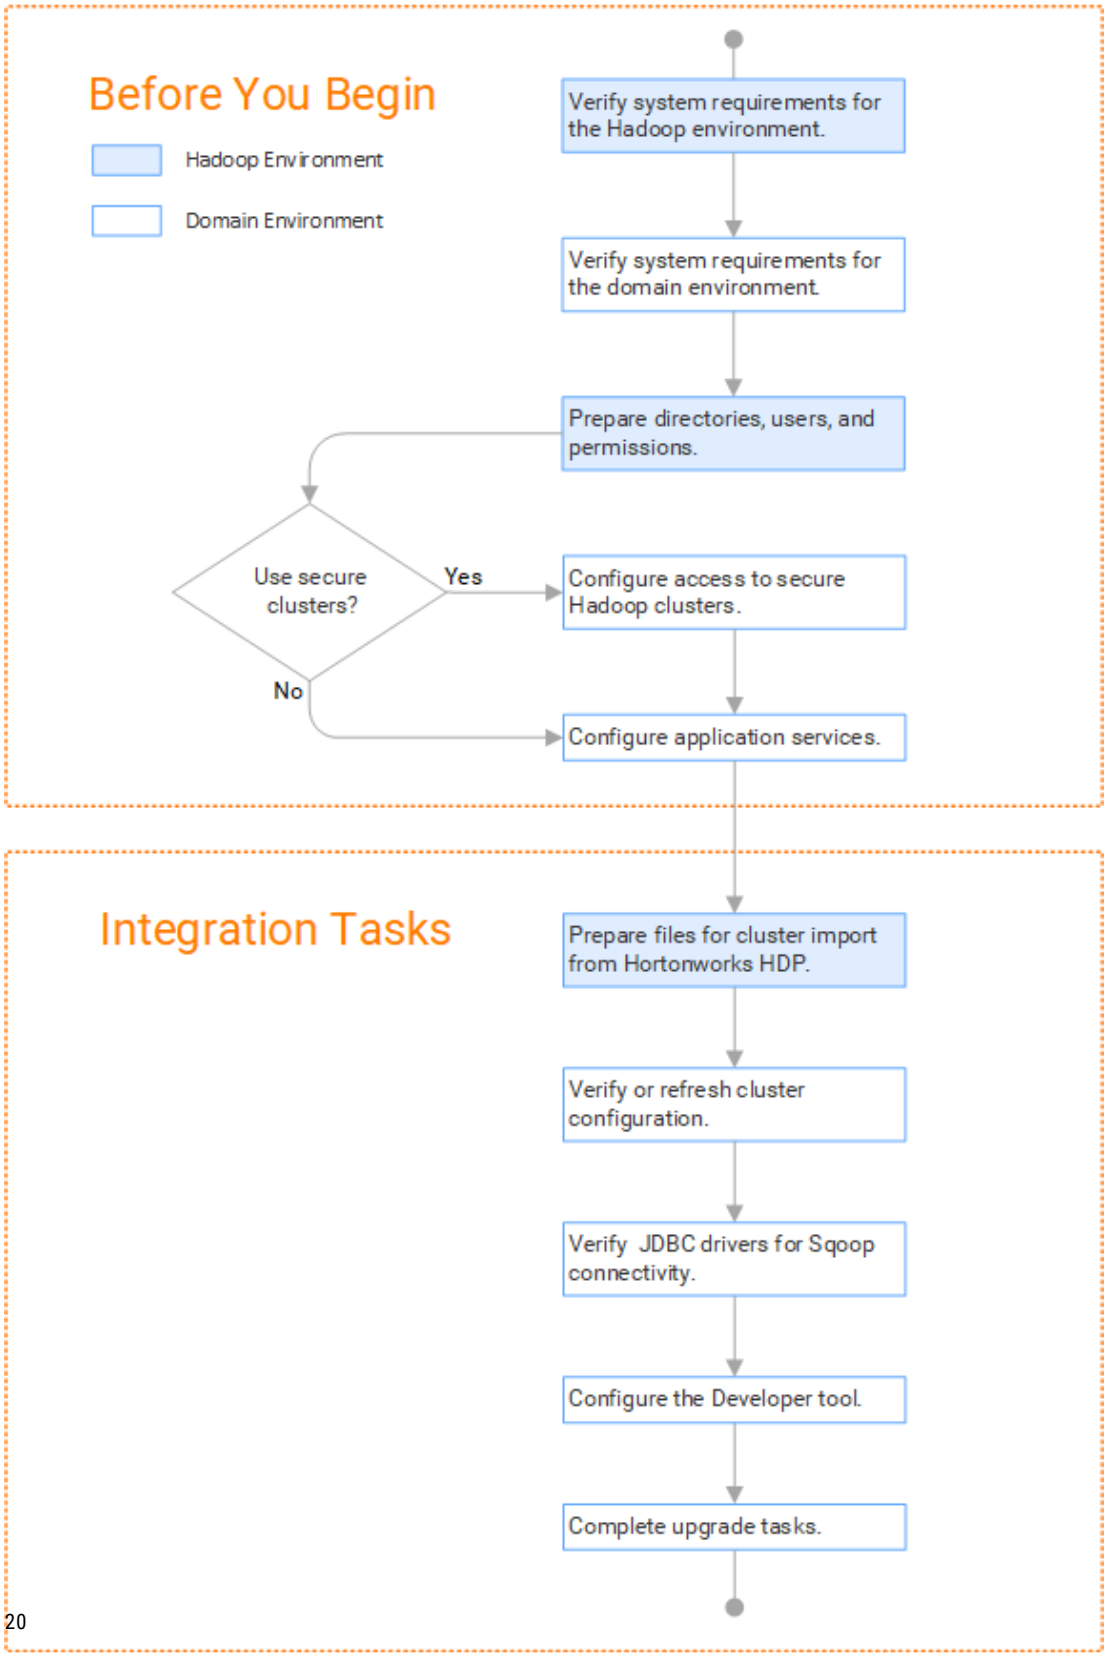

Task Flow to Integrate with Hortonworks HDP

The following diagram shows the task flow to integrate the Informatica domain with Hortonworks HDP:

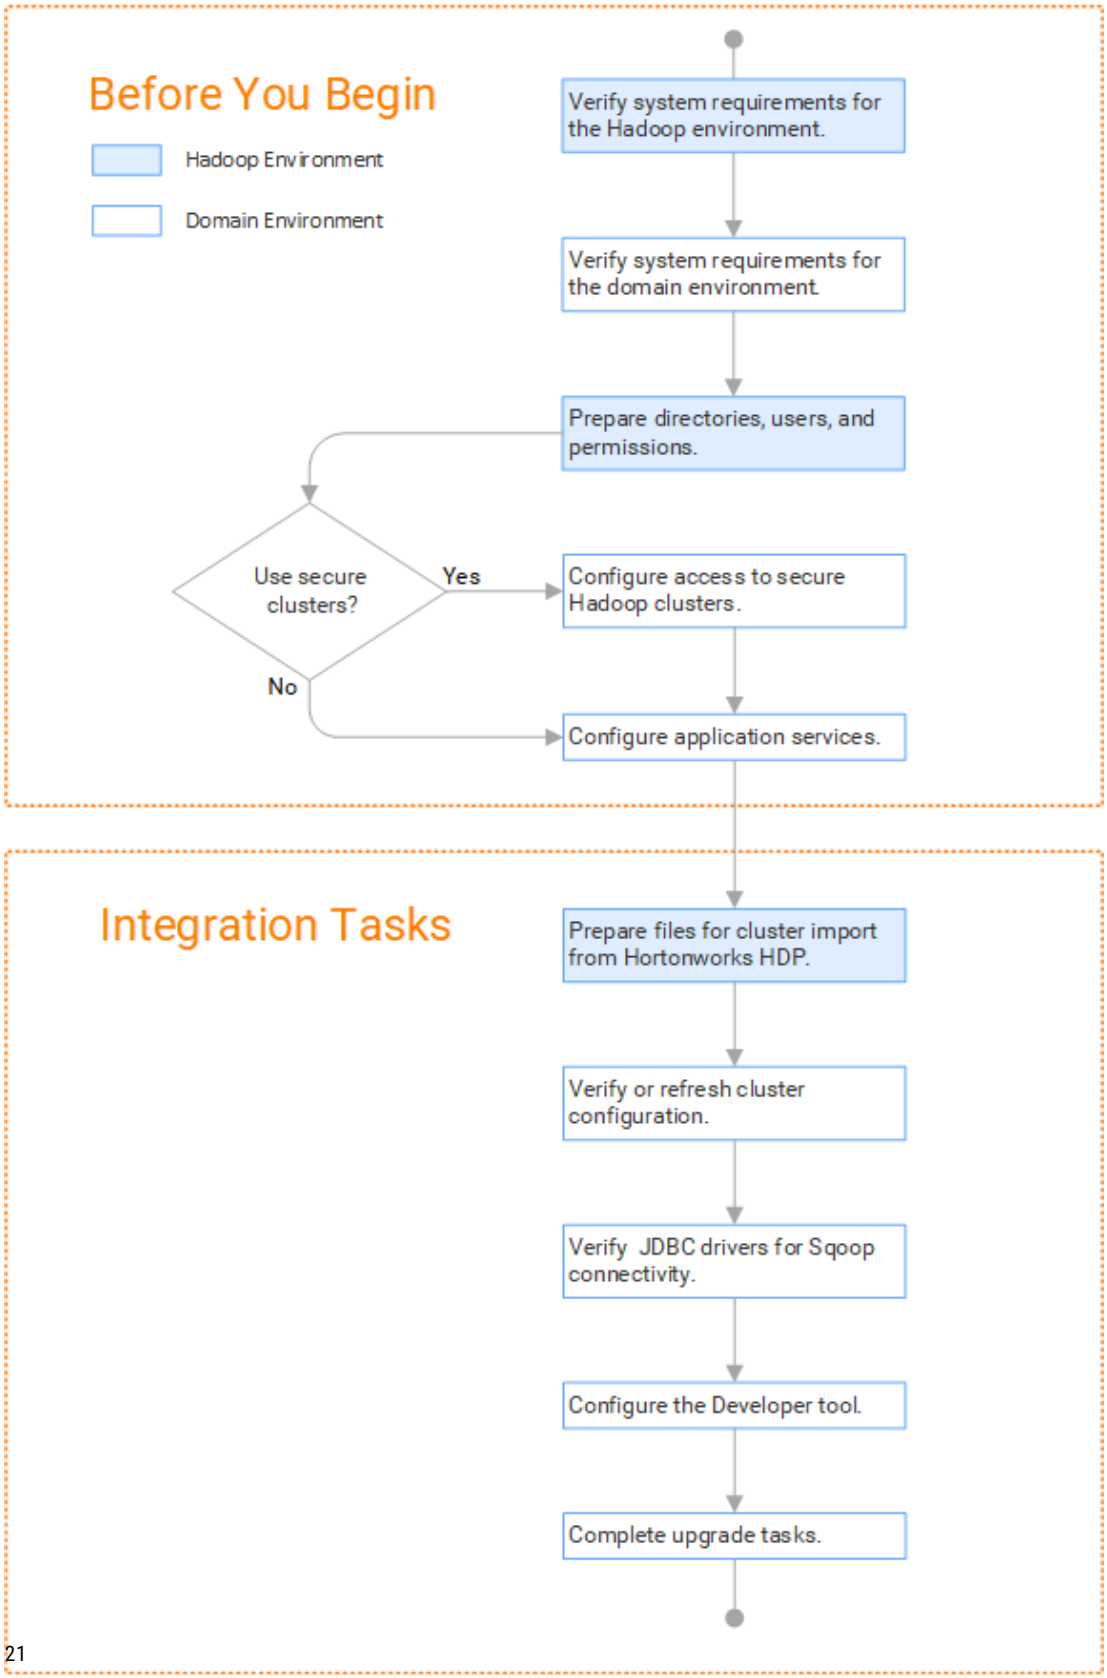

Task Flow to Upgrade from Version 10.2.1

The following diagram shows the task flow to upgrade Big Data Management from version 10.2.1 for Hortonworks HDP:

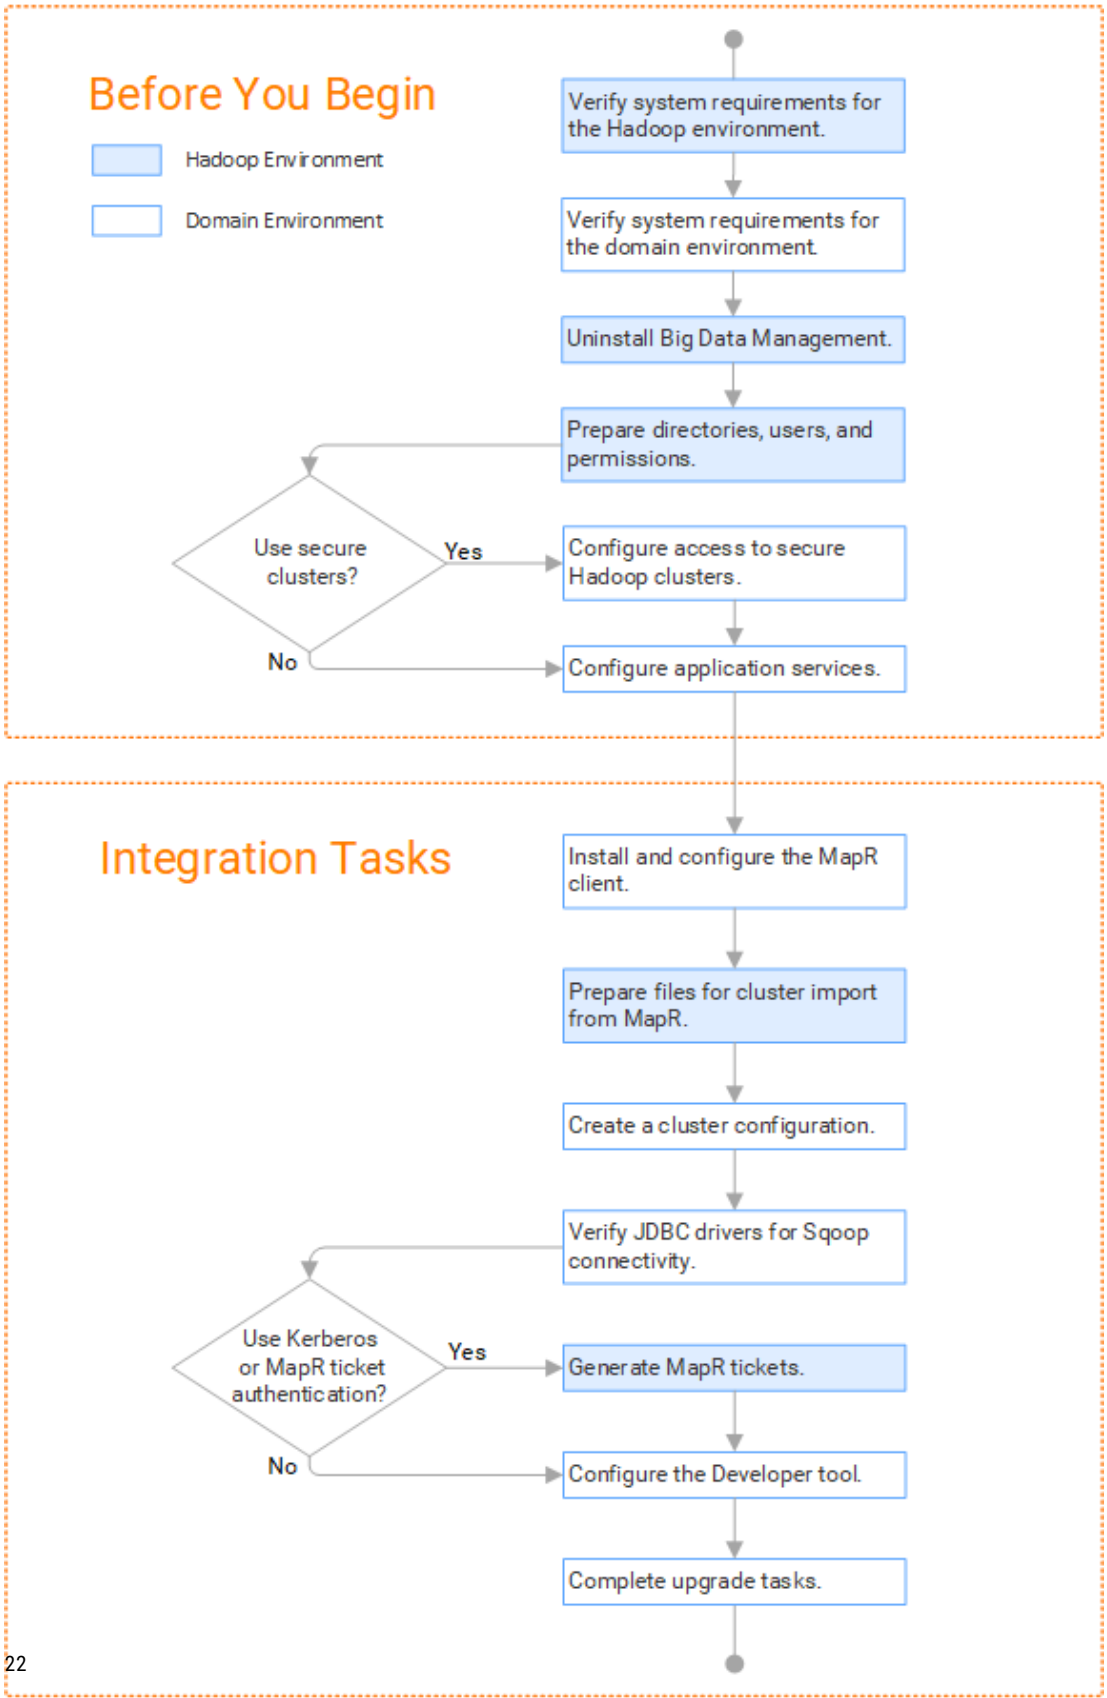

Task Flow to Upgrade from Version 10.2

The following diagram shows the task flow to upgrade Big Data Management 10.2 for Hortonworks HDP:

Task Flow to Upgrade from a Version Earlier than 10.2

The following diagram shows the task flow to upgrade Big Data Management from a version earlier than 10.2 for Hortonworks HDP:

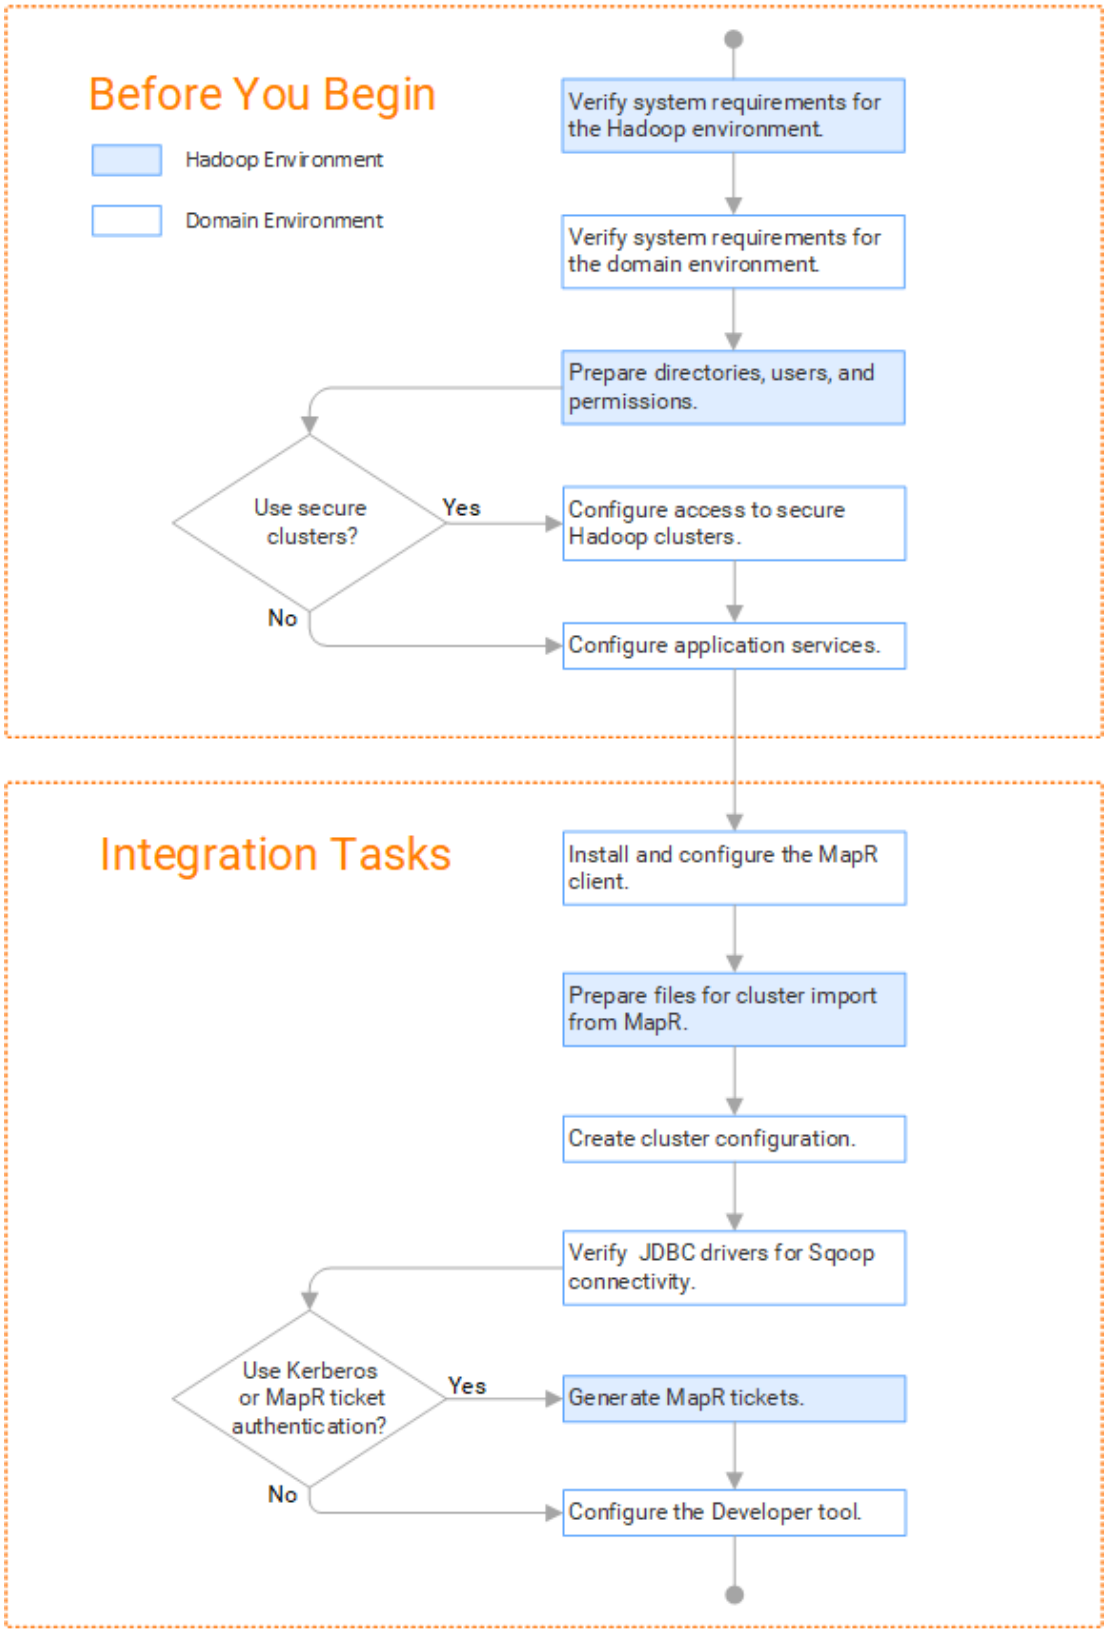

MapR Task Flows

Depending on whether you want to integrate or upgrade Big Data Management in a MapR environment, you can use the flow charts to perform the following tasks:

- Integrate the Informatica domain with MapR for the first time.
- Upgrade from version 10.2.1.
- Upgrade from version 10.2.
- Upgrade from a version earlier than 10.2.

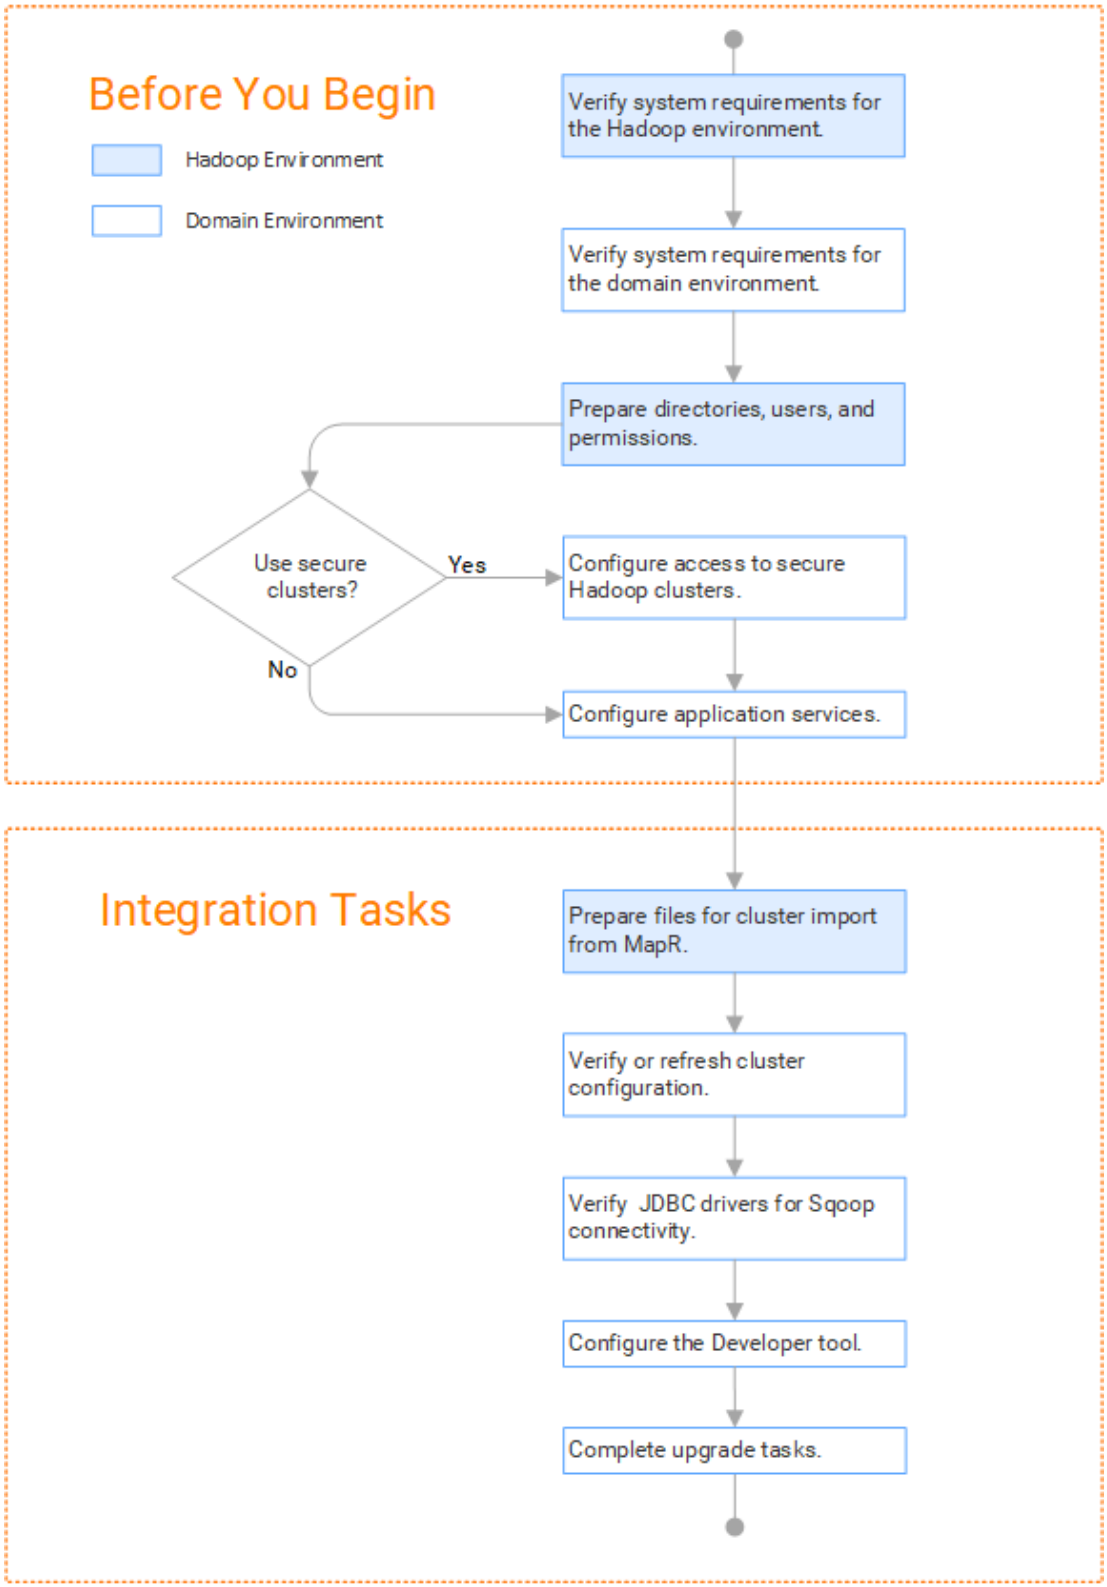

Task Flow to Integrate with MapR

The following diagram shows the task flow to integrate the Informatica domain with MapR:

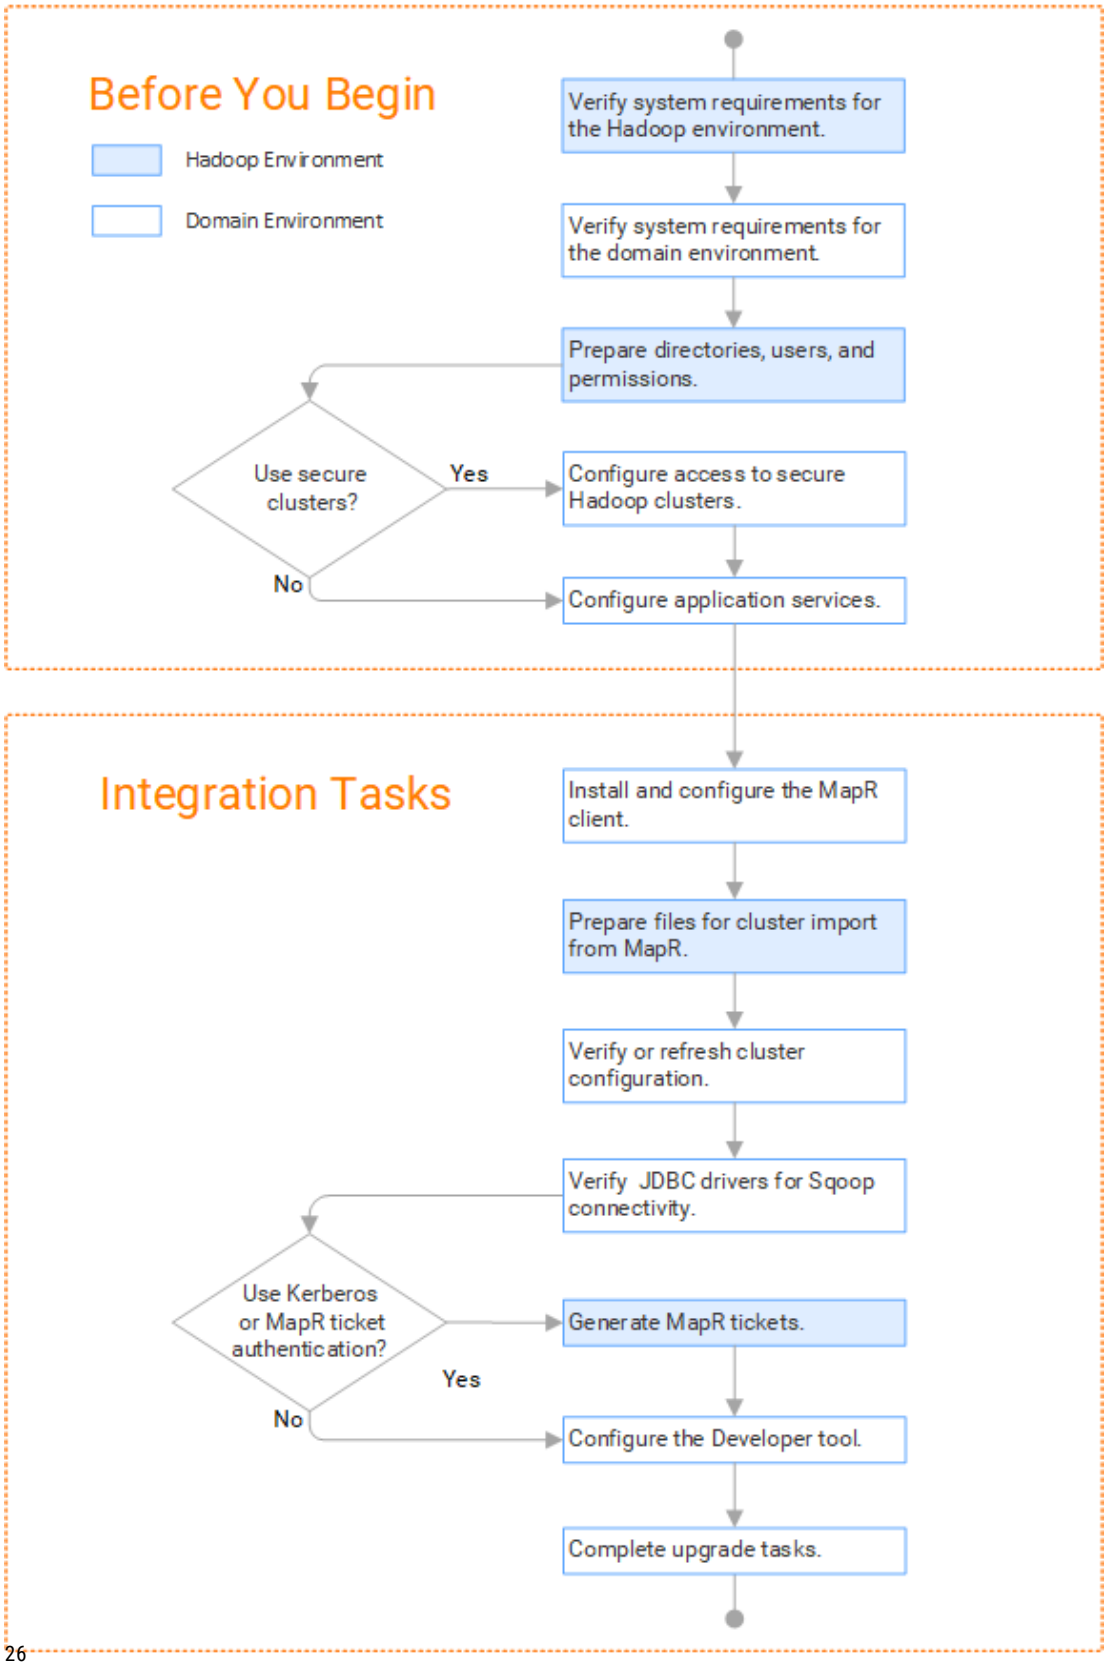

Task Flow to Upgrade from Version 10.2.1

The following diagram shows the task flow to upgrade Big Data Management 10.2.1 for MapR:

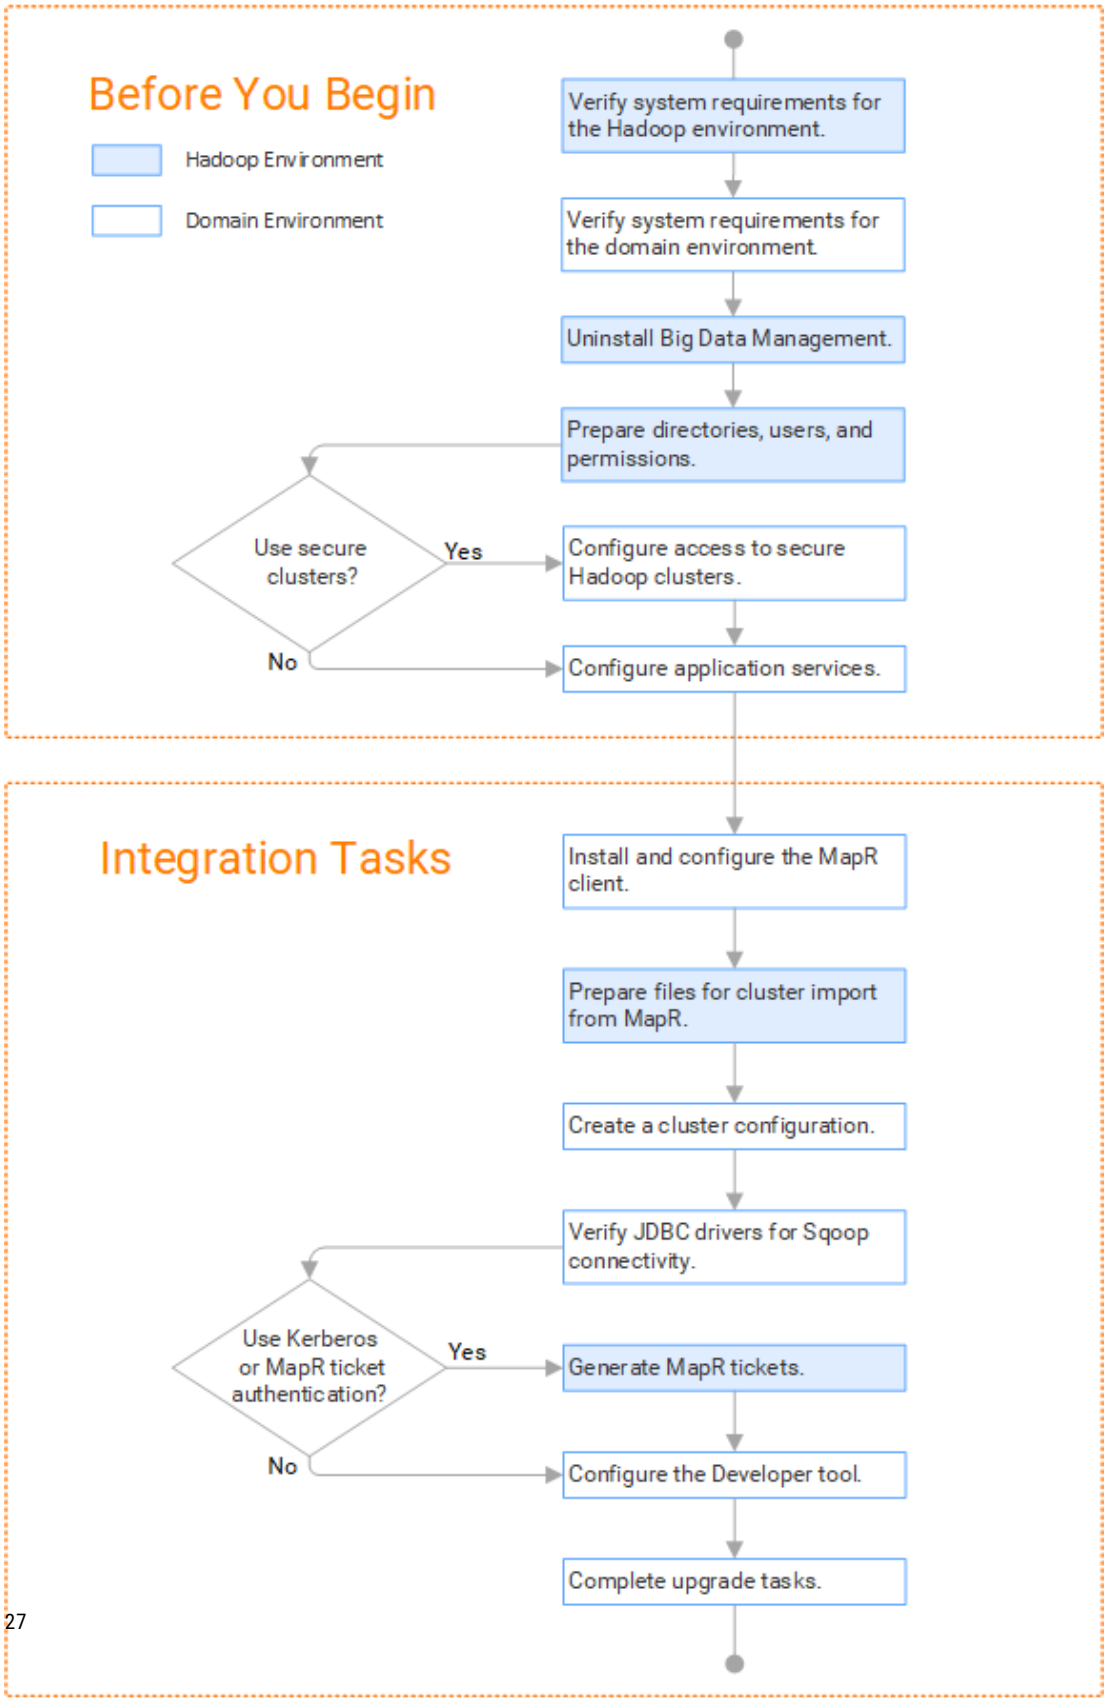

Task Flow to Upgrade from Version 10.2

The following diagram shows the task flow to upgrade Big Data Management 10.2 for MapR:

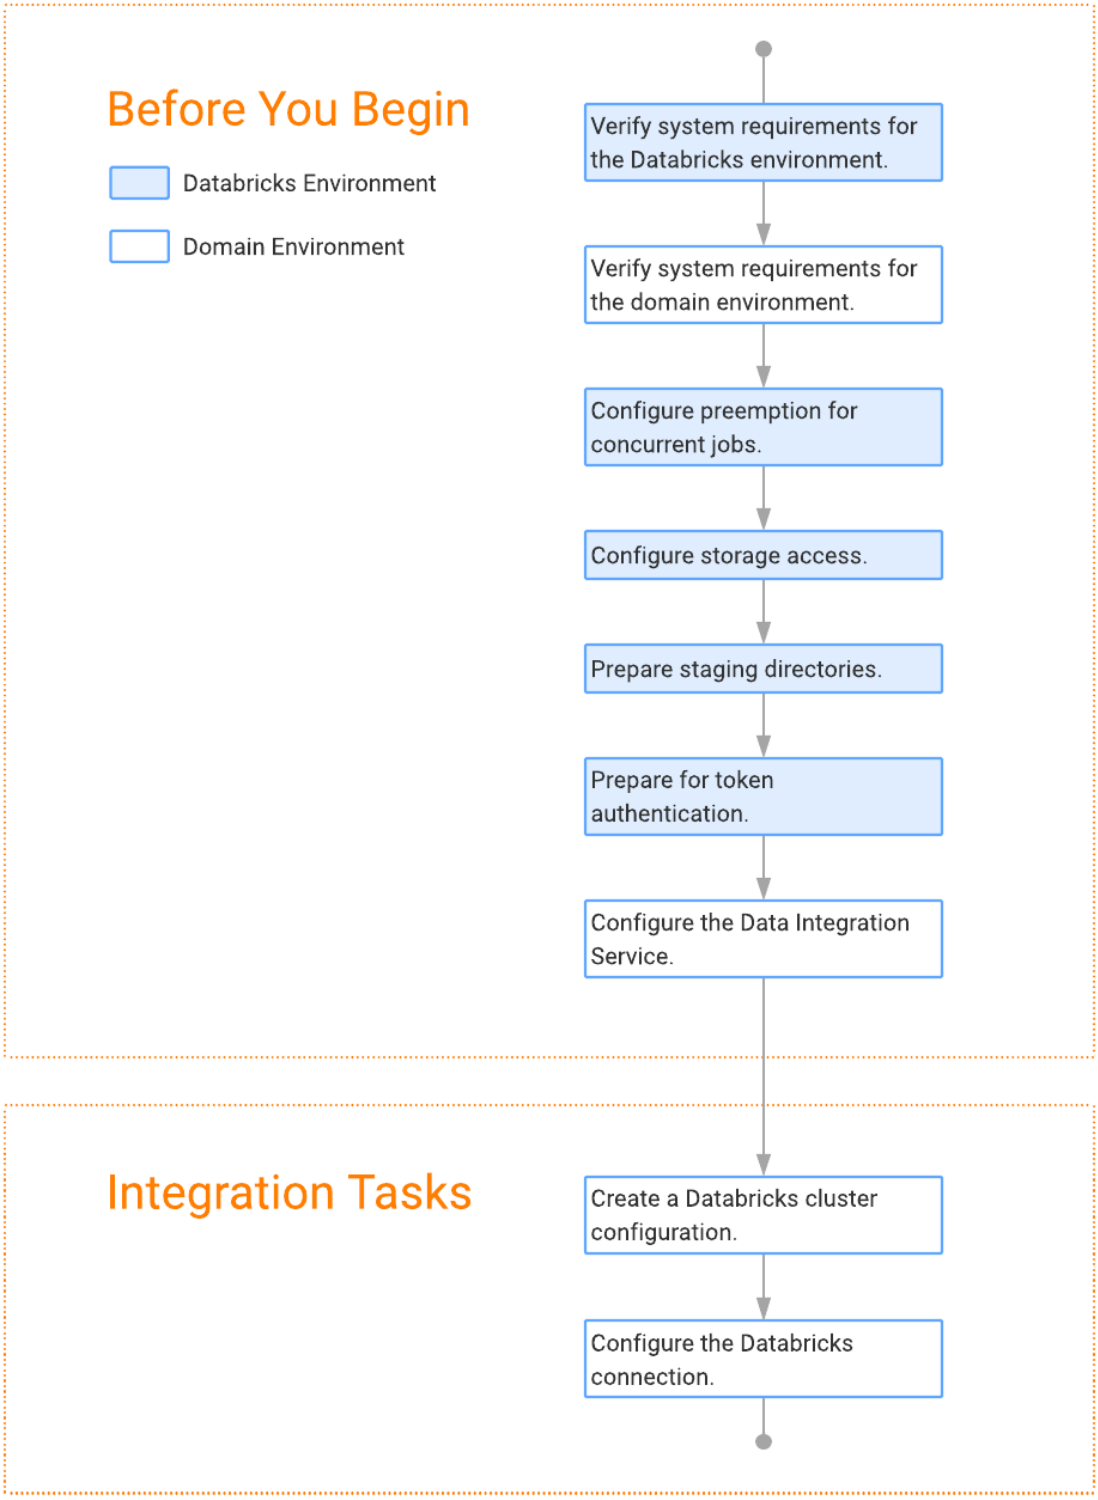

Task Flow to Upgrade from a Version Earlier than 10.2

The following diagram shows the task flow to upgrade Big Data Management from a version earlier than 10.2 for MapR:

Databricks Integration Task Flow

The following diagram shows the task flow to integrate the Informatica domain with Azure Databricks:
