Preface

Use the *Axon Browser Extension User Guide* to learn how to install and use the Informatica Axon Quick Look browser extension. You can use the Axon Quick Look browser extension to search for objects in Axon across all facets without opening the Axon web page.

This guide is written for day-to-day business users who want to look up facet objects that are defined and governed in Axon.

Informatica Resources

Informatica provides you with a range of product resources through the Informatica Network and other online portals. Use the resources to get the most from your Informatica products and solutions and to learn from other Informatica users and subject matter experts.

Informatica Network

The Informatica Network is the gateway to many resources, including the Informatica Knowledge Base and Informatica Global Customer Support. To enter the Informatica Network, visit https://network.informatica.com.

As an Informatica Network member, you have the following options:

- Search the Knowledge Base for product resources.
- View product availability information.
- Create and review your support cases.
- Find your local Informatica User Group Network and collaborate with your peers.

Informatica Knowledge Base

Use the Informatica Knowledge Base to find product resources such as how-to articles, best practices, video tutorials, and answers to frequently asked questions.

To search the Knowledge Base, visit https://search.informatica.com. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

Informatica Documentation

Use the Informatica Documentation Portal to explore an extensive library of documentation for current and recent product releases. To explore the Documentation Portal, visit https://docs.informatica.com.

If you have questions, comments, or ideas about the product documentation, contact the Informatica Documentation team at infa_documentation@informatica.com.

Informatica Product Availability Matrices

Product Availability Matrices (PAMs) indicate the versions of the operating systems, databases, and types of data sources and targets that a product release supports. You can browse the Informatica PAMs at https://network.informatica.com/community/informatica-network/product-availability-matrices.

Informatica Marketplace

The Informatica Marketplace is a forum where you can find solutions that extend and enhance your Informatica implementations. Leverage any of the hundreds of solutions from Informatica developers and partners on the Marketplace to improve your productivity and speed up time to implementation on your projects. You can find the Informatica Marketplace at https://marketplace.informatica.com.

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:
https://www.informatica.com/services-and-training/customer-success-services/contact-us.html.

To find online support resources on the Informatica Network, visit https://network.informatica.com and select the eSupport option.

CHAPTER 1

Installing Axon Quick Look Browser Extension

This chapter includes the following topics:

- Introduction to Axon Quick Look Browser Extension, 6
- Installation Overview, 6
- Downloading the Axon Quick Look Browser Extension, 7
- Installing Axon Quick Look Browser Extension in Google Chrome, 7
- Installing Axon Quick Look Browser Extension in Microsoft Edge, 8
- Adding Axon Quick Look Browser Extension in Google Chrome , 9
- Adding Axon Quick Look Browser Extension in Microsoft Edge, 9
- Uninstalling Axon Quick Look Browser Extension, 10

Introduction to Axon Quick Look Browser Extension

Axon Quick Look search utility is a browser extension that makes it easy to find objects across all facets in Axon without opening the Axon web page. The extension searches every item in Axon for a match. You can also select keywords from other web pages, and use a hotkey to perform a search in the Axon Quick Look browser extension. You can use the extension to search for public objects in Axon even if you have not logged in or if you do not have a user account.

Installation Overview

You can acquire the Axon Quick Look browser extension installation files from the **Axon Help Center**. Install the extension after you download the installation files from the **Axon Help Center**.

You can install the Axon Quick Look browser extension on the following browsers:

- Google Chrome 60.0 and later.
- Microsoft Edge 16.0 and later.

After the installation, you can configure the server settings and configure the hotkey and for the Axon Quick Look browser extension.

Downloading the Axon Quick Look Browser Extension

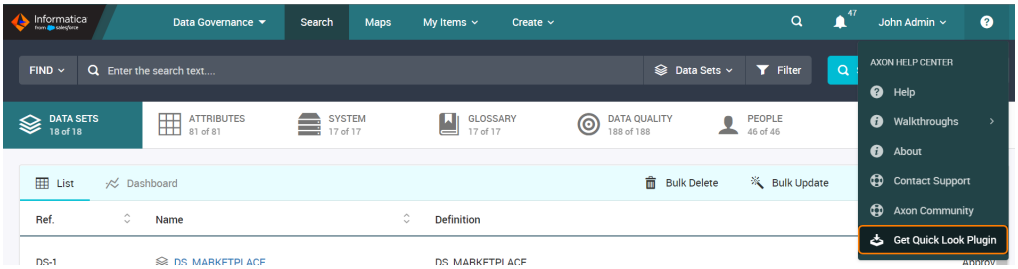

You can download the Axon Quick Look browser extension from the **Axon Help Center** menu of your Axon instance. To download the browser extension, perform the following steps.

1. On the Axon instance, locate and click the **Axon Help Center** icon.

   The **Axon Help Center** menu opens.

2. In the **Axon Help Center** menu, click the **Get Quick Look Plugin** option.

   Axon downloads a zipped file that contains the Axon Quick Look browser extension installation files.
   The following image depicts the **Get Quick Look Plugin** option in the **Axon Help Center**.

3. Extract the Axon Quick Look browser extension installation `.zip` file.

Installing Axon Quick Look Browser Extension in Google Chrome

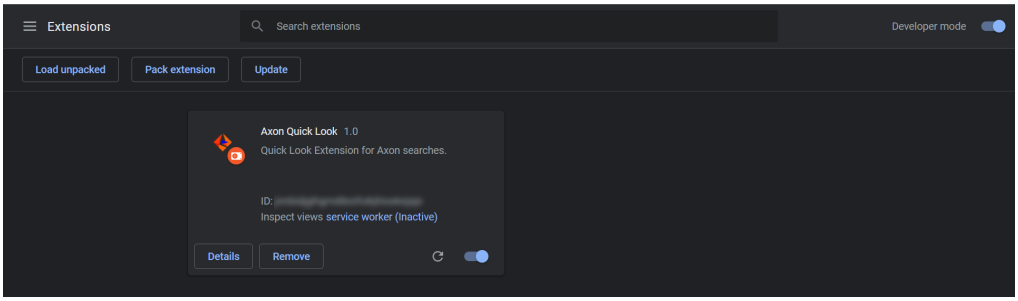

To install the extension on Google Chome, perform the following steps.

1. In Google Chrome, enter `chrome://extensions/` in the search bar.

   The Google Chrome **Extensions** page opens.

2. In the **Extensions** page, click the **Developer mode** toggle.

   This reveals new options on the page.
   The following image shows the **Extensions** page in Google Chrome with **Developer mode** enabled.

3. Click the newly revealed **Load unpacked** option.

   The **Select the extension directory.** window appears.

4. In the **Select the extension directory.** window, navigate to the location where you extracted the Axon Quick Look browser extension installation files. When you locate the `manifest.json` file, click **Select Folder**.

   The Axon Quick Look extension gets added to your browser.

Installing Axon Quick Look Browser Extension in Microsoft Edge

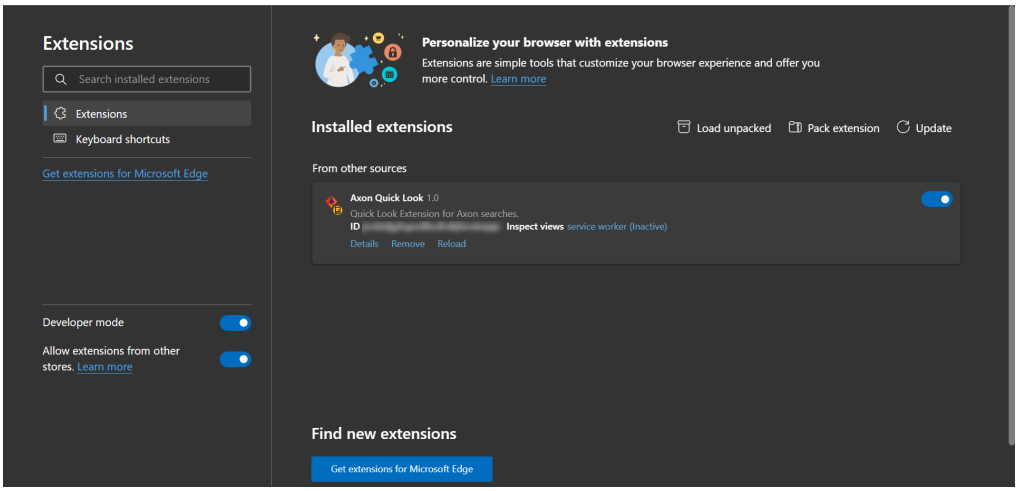

To install the extension on Microsoft Edge, perform the following steps.

1. In Microsoft Edge, enter `edge://extensions/` in the search bar.

   The Microsoft Edge **Extensions** page opens.

2. In the **Extensions** page, click the **Developer mode** toggle.

   This reveals new options on the page.

   The following image shows the **Extensions** page in Microsoft Edge with **Developer mode** enabled.

3. Click the newly revealed **Load unpacked** option.

   The **Select the extension directory.** window appears.

4. In the **Select the extension directory.** window, navigate to the location where you extracted the Axon Quick Look browser extension installation files. When you locate the `manifest.json` file, click **Select Folder**.

   The Axon Quick Look extension gets added to your browser.

Adding Axon Quick Look Browser Extension in Google Chrome

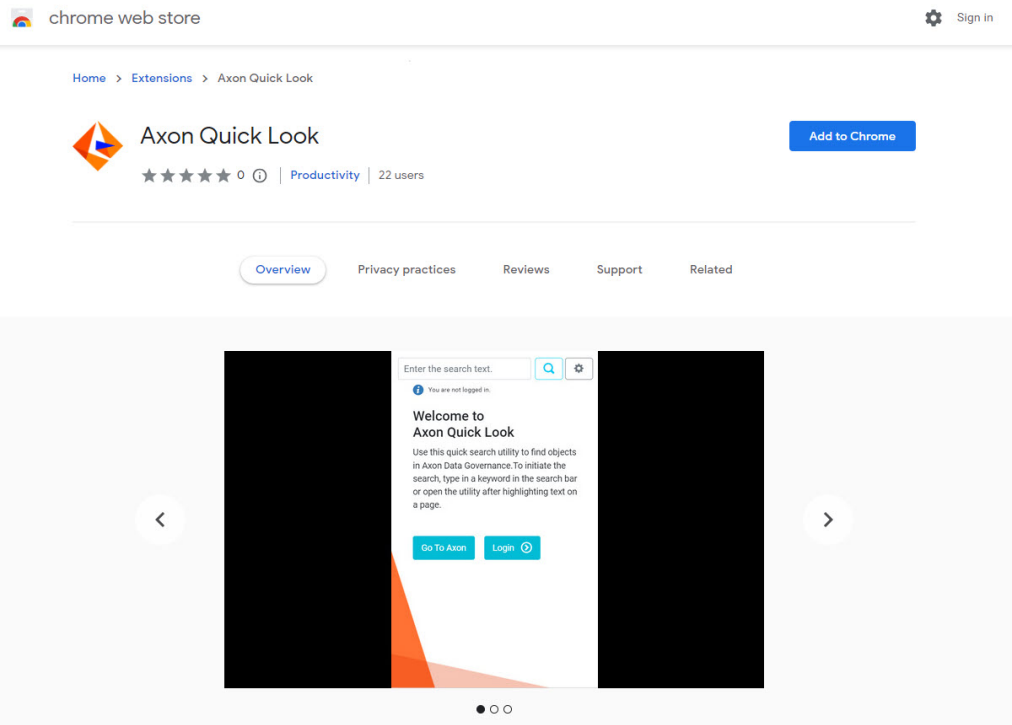

To add the extension in Google Chome, perform the following steps.

1. In the Chrome Web Store, enter `Axon Quick Look` in the search bar.

   The Chrome Web Store **Extensions** page opens.

2. In the **Extensions** page, click the **Axon Quick Look** icon.

   This reveals new options on the page.
   The following image shows the **Axon Quick Look** page in Chrome Web Store:

3. Click **Add to Chrome** option.

   The **Add "Axon Quick Look"?** window appears.

4. In the **Add "Axon Quick Look"?** window, click **Add extension**.

   The Axon Quick Look extension gets added to your browser.

Adding Axon Quick Look Browser Extension in Microsoft Edge

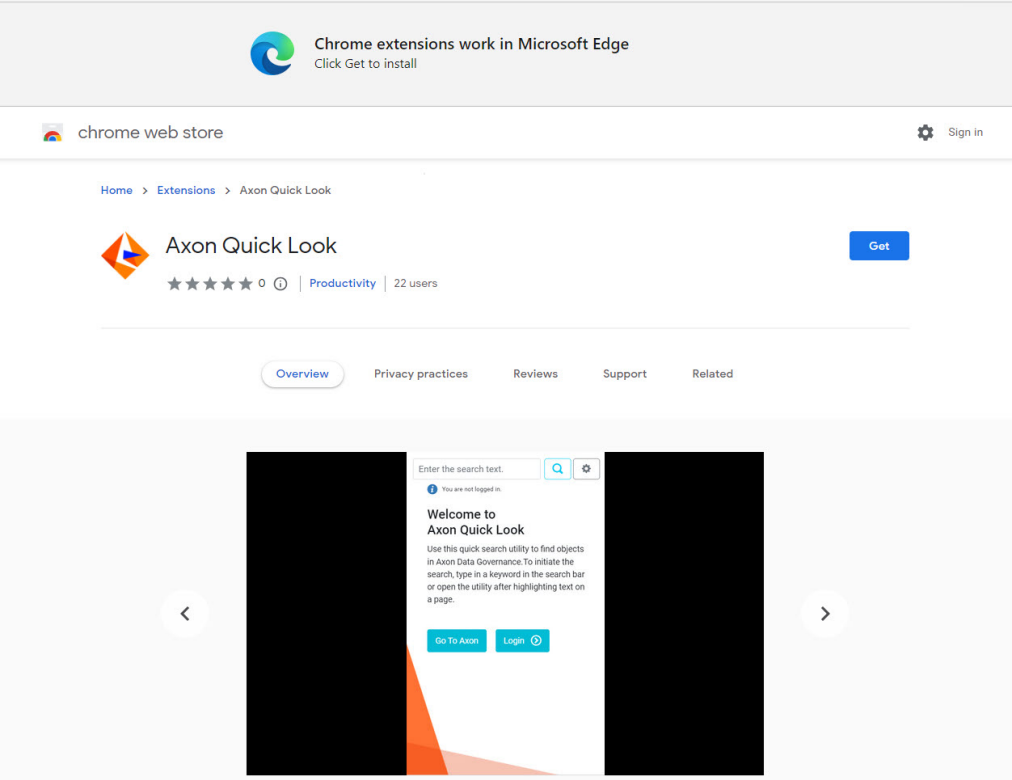

To add the extension in Microsoft Edge, perform the following steps.

1. In the Chrome Web Store, enter `Axon Quick Look` in the search bar.

   The Chrome Web Store **Extensions** page opens.

2. In the **Extensions** page, click the **Axon Quick Look** icon.

   This reveals new options on the page.
   The following image shows the **Axon Quick Look** page in Chrome Web Store:

3. Click **Get** option.

   The **Add "Axon Quick Look" to Microsoft Edge?** window appears.

4. In the **Add "Axon Quick Look" to Microsoft Edge?** window, click **Add extension**.

   The Axon Quick Look extension gets added to your browser.

Uninstalling Axon Quick Look Browser Extension

To uninstall the Axon Quick Look browser extension, perform the following steps:

1. In the **Extensions** page of your web browser, locate the Axon Quick Look browser extension and click the **Remove** button.
2. On the confirmation prompt, click the **Remove** button to uninstall the extension.

CHAPTER 2

Getting Started

This chapter includes the following topics:

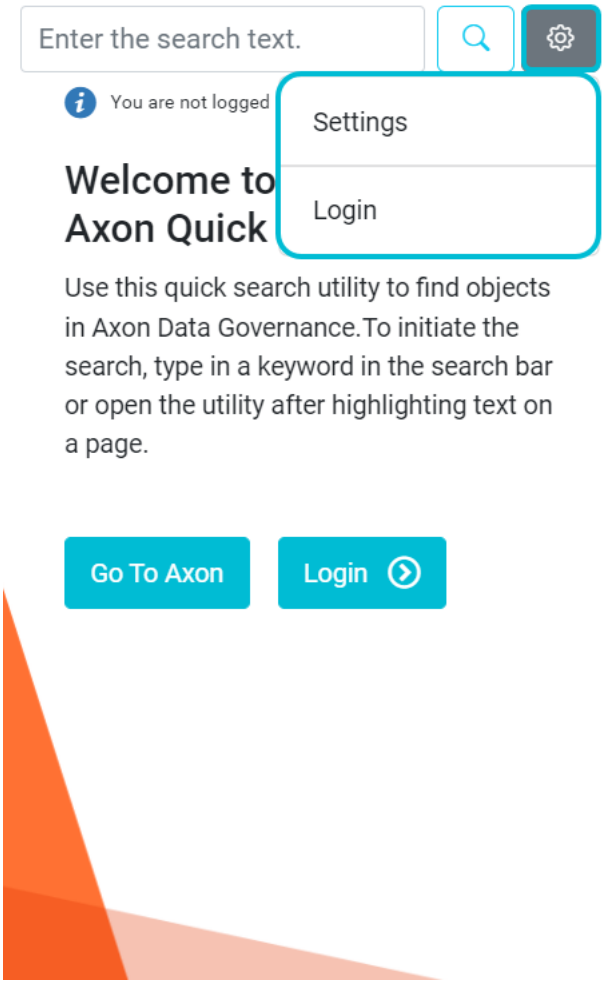

- Configuring Server Settings, 12
- Axon Quick Look Browser Extension Interface, 14
- Logging In to Axon Quick Look Browser Extension, 14
- Searching for Objects, 17

Configuring Server Settings

Before you can use the Axon Quick Look browser extension, you must connect it to a Linux server on which Axon Data Governance runs.

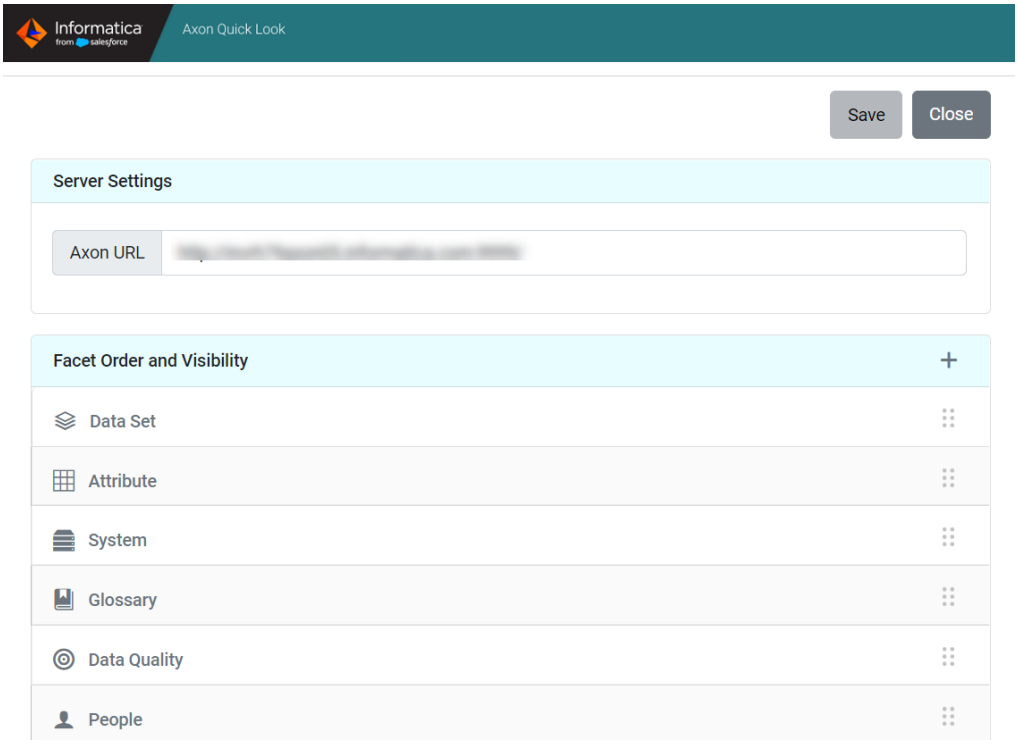

1. In Axon Quick Look extension, click **Settings** ( ) > **Settings**.

   The **Axon Quick Look Settings** page opens.
   The following image shows the **Settings** menu in the Axon Quick Look browser extension:

2. On the **Axon Quick Look Settings** page, enter the **Axon URL** to establish a connection to an Axon instance.

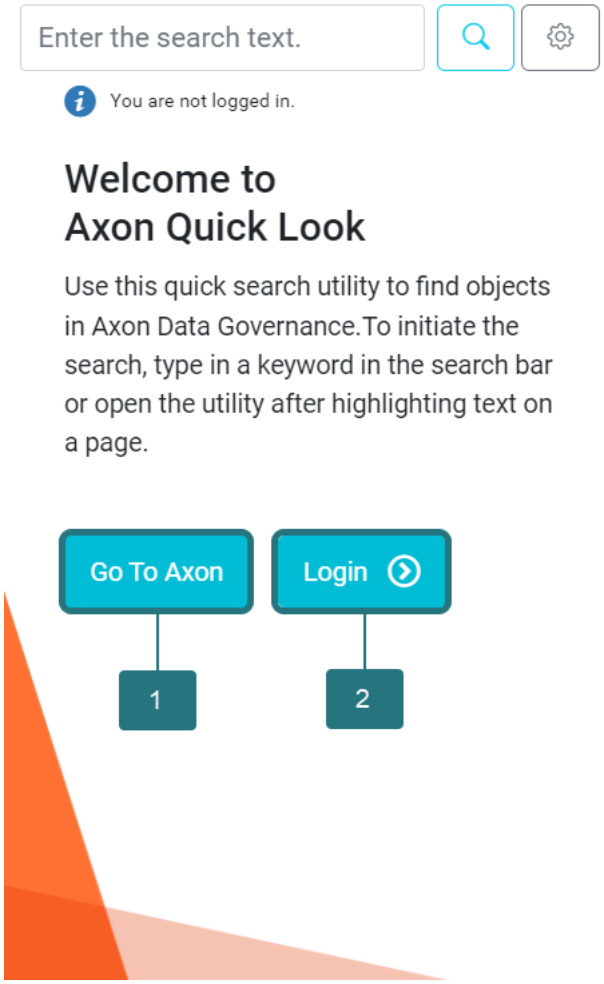

The following image shows the **Axon Quick Look Settings** page:

3. To save the changes, click **Save**. Then, click **Close**.

Axon Quick Look Browser Extension Interface

The following image shows the Axon Quick Look browser extension interface:

1. Open the Axon instance connected to the Axon Quick Look browser extension.
2. Open the Axon Data Governance login page or the login page of your Single Sign-On (SSO) provider.

Logging In to Axon Quick Look Browser Extension

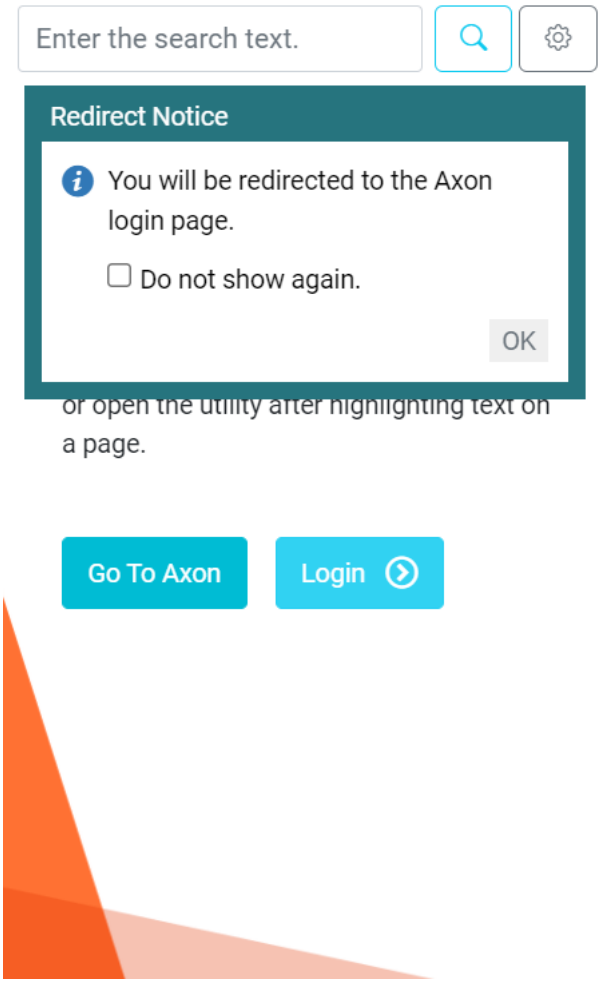

To log in to Axon Quick Look browser extension, you need to log in to your Axon Data Governance web instance. If you are already logged in to Axon Data Governance, the Axon Quick Look extension automatically logs you in.

You can use the Axon Quick Look extension to search for Axon objects without logging in. However, by doing so you can only search for public objects. If your organization's SuperAdmin has enabled segmentation, the

search scope is restricted to the Enterprise segment. If you are not logged in, Axon Quick Look extension displays a notification below the search bar.

1. To log in to Axon Quick Look extension, click the **Login** button.

   A **Redirect Notice** dialog box informs you that you will be redirected to the login page of the Axon Data Governance instance whose **Axon URL** has been configured in the **Server Settings**.
   The following image shows the **Redirect Notice**:

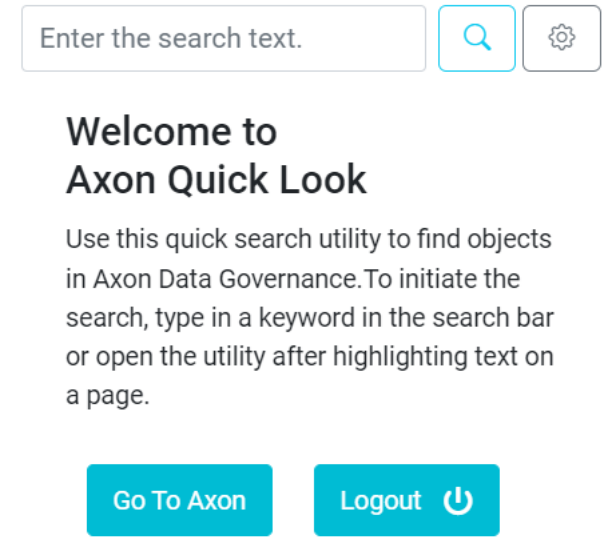

2. Click **OK** in the **Redirect Notice** dialog box.

   The Axon Quick Look extension redirects you to the Axon Data Governance login page.

   Note: If Axon is configured to use Single Sign-On (SSO), the extension redirects you to your SSO login page.

3. Use your Axon credentials or Single Sign-On (SSO) credentials to log in.

The following image shows the Axon Quick Look browser extension after you log in:

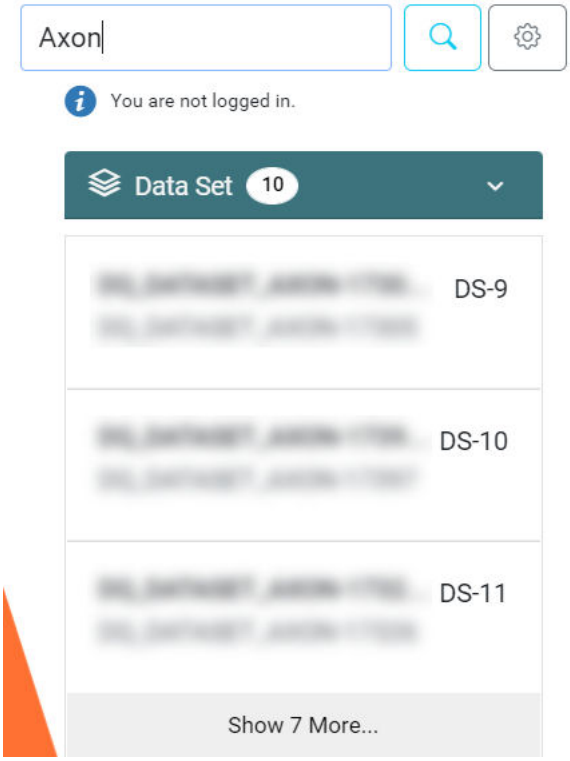

To log out, click **Logout**.

Note: When you log out of the Axon Quick Look browser extension, your login session in the associated Axon instance is terminated. Similarly, if you log out of the Axon instance linked to the extension, Axon logs you out of the Axon Quick Look browser extension.

Searching for Objects

The following image depicts a successful search made using the Axon Quick Look browser extension:

To use the Axon Quick Look browser extension to look up objects in Axon, enter a search query in the search box and click the search ( ) icon. The extension displays relevant results from the facets that you selected in the **Facet Order and Visibility** section of the **Axon Quick Look Settings** page. Axon Quick Look extension displays the results ordered by facet. You can modify the facet order in the **Facet Order and Visibility** section of the **Axon Quick Look Settings** page. If you click the name of any object displayed in the search results, the extension redirects you to the object page in Axon. Axon displays only the first three matches per facet in the search results.

You can use a keyword on a web page as the search query. Select a keyword on a web page and click the Axon Quick Look browser extension icon to initiate the search. Alternatively, you can also use a keyboard shortcut to initiate the search. On Windows, the default hotkeys are `CTRL+SHIFT+K` and on macOS, the default keys are `COMMAND+SHIFT+K`.

CHAPTER 3

Customizing Axon Quick Look Browser Extension

This chapter includes the following topics:

- Customization Overview, 18
- Modifying Server Settings, 18
- Customizing Facet Order and Visibility, 21
- Modifying Keyboard Shortcuts, 22

Customization Overview

After you start the Axon Quick Look browser extension, you can configure keyboard shortcuts, customize the facet order in the search results, and modify the server settings. The customization options are common to all browsers.

Modifying Server Settings

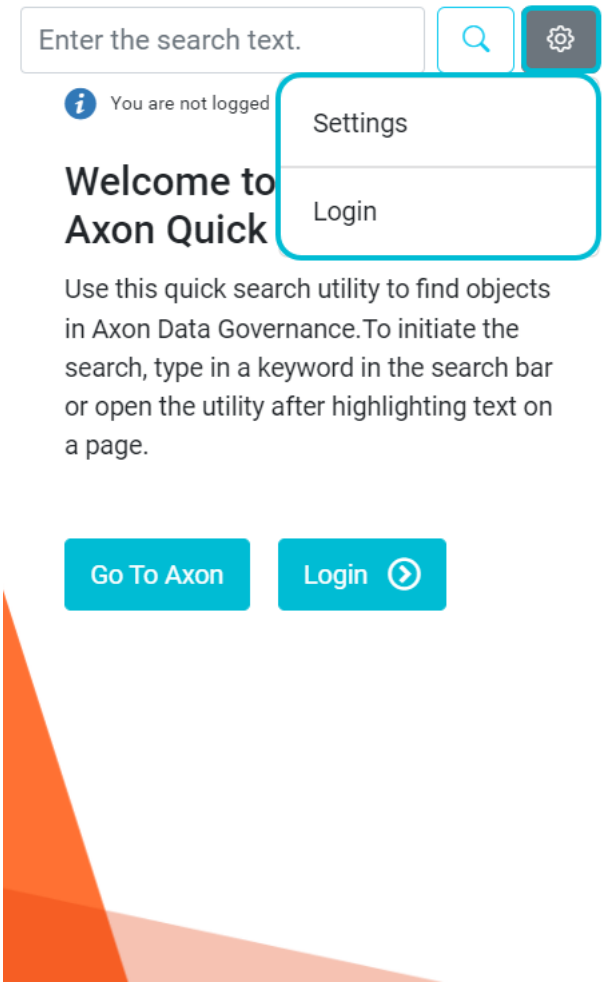

After installing Axon Quick Look browser extension, you can modify the server settings that you configured.

You do not have to be logged in to modify the Axon Quick Look extension server settings.

To do change the server settings, modify the Axon URL using the following steps.

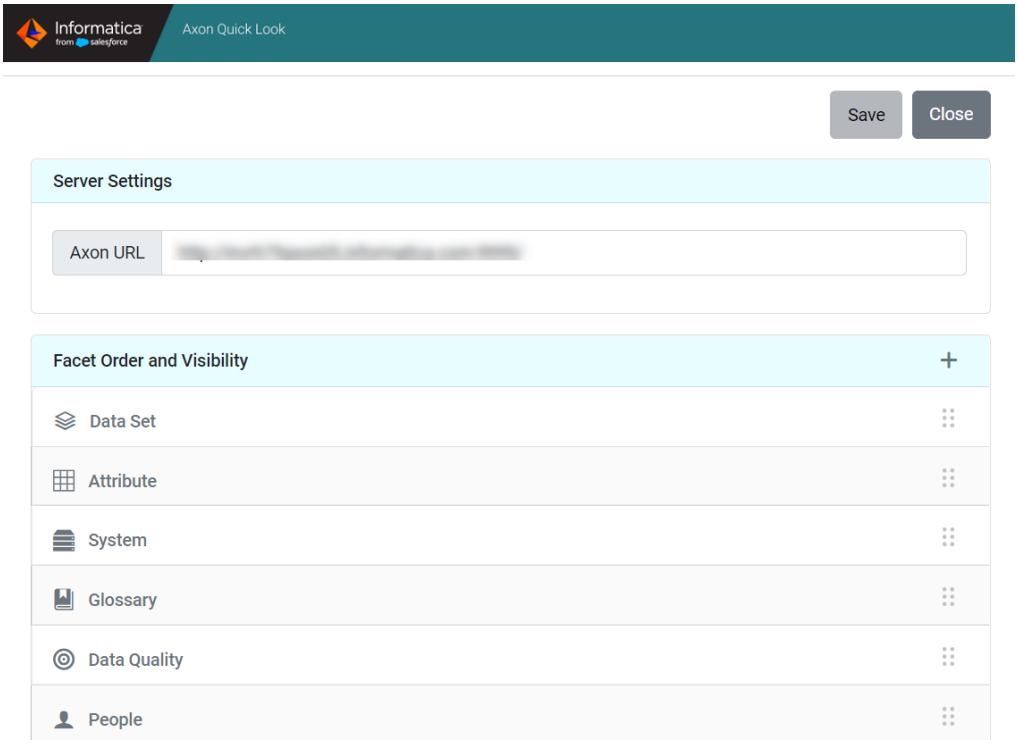

1. In the Axon Quick Look extension, click **Settings** ( ) > **Settings**.

   The **Axon Quick Look Settings** page opens.
   The following image shows the **Settings** menu in the Axon Quick Look browser extension:

2. On the **Axon Quick Look Settings** page, enter the **Axon URL** to establish a connection to an Axon Data Governance instance.

The following image shows the **Axon Quick Look Settings** web page:

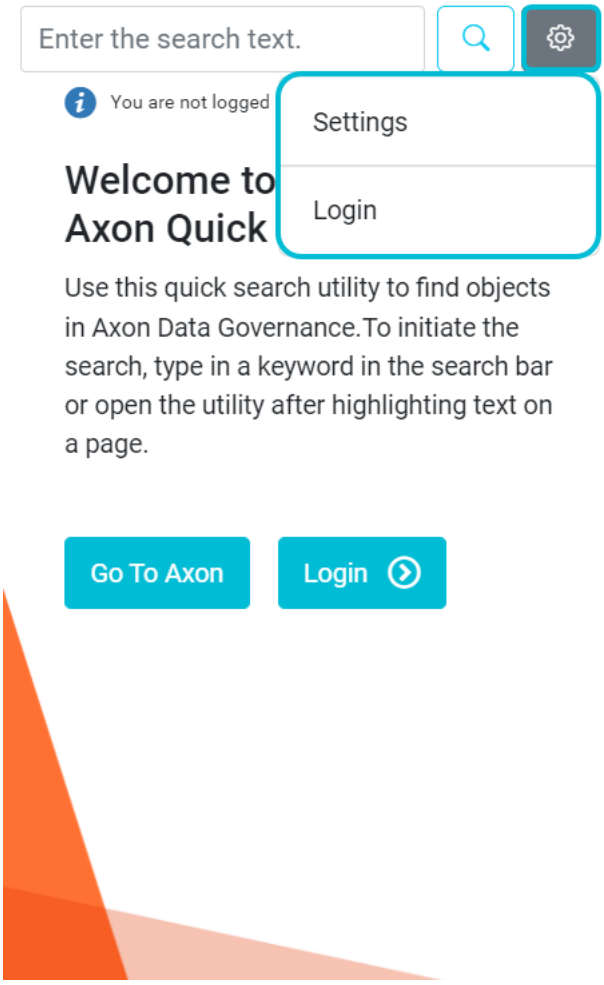

3. To save the changes, click **Save**. Then, click **Close**.

Customizing Facet Order and Visibility

In the **Axon Quick Look Settings** page, you can rearrange the facets to re-order the results that Axon Quick Look browser extension displays in the search window when you search for an Axon object. You can also specify the facets within which you want to search.

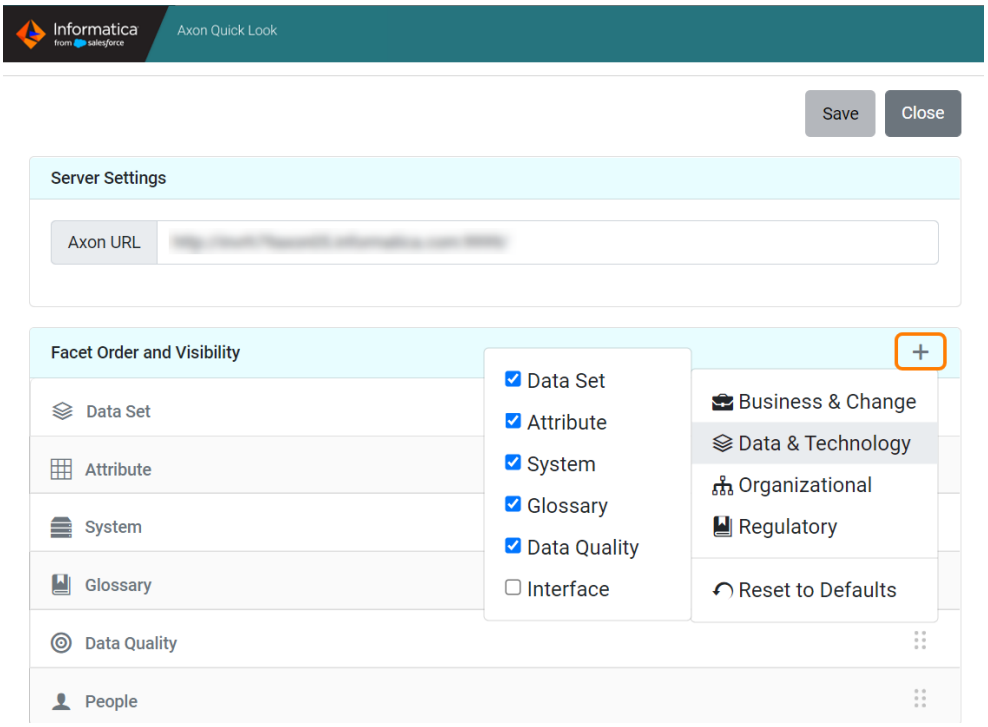

1. In Axon Quick Look extension, locate and click **Settings** ( ) > **Settings**.

   The **Axon Quick Look Settings** page opens.
   The following image shows the **Settings** menu in the Axon Quick Look browser extension:

2. On the **Axon Quick Look Settings** page, you can rearrange the facet order. You can also add or remove facets.

   - To select the facet that you wish to re-order, click and drag the order icon up or down the list.
   - To add or remove facets, click the add icon, and in the newly appeared menu, select or unselect the facets per your preference.
     The following image shows the **Axon Quick Look Settings** web page:

3. To save the changes, click **Save**. Then, click **Close**.

Modifying Keyboard Shortcuts

You can configure hotkeys to initiate the Axon Quick Look browser extension to search for Axon objects using a selected keyword on a web page as the search query. On Windows, the default hotkeys are `CTRL +SHIFT+K` and on macOS, the default keys are `COMMAND+SHIFT+K`. The combination of the hotkeys must be unique.

1. On the **Extensions** page of your web browser, locate and click the **Keyboard shortcuts** option.

   This opens the **Keyboard shortcuts** page.

2. On the **Keyboard shortcuts** page, enter the hotkey combination in the **Activate the extension** field.
