Read the *Axon Data Governance Release Notes* to learn about known limitations and fixes associated with Informatica® Axon Data Governance version 7.3.8.

Before You Begin

Verify your current Axon version and review the required upgrade path.

Upgrade Paths

You can upgrade to Axon version 7.3.8 if you have one of the following Axon versions installed on your system:

- Axon 7.3.7
- Axon 7.3.6
- Axon 7.3.5 and its service packs

The following table lists the upgrade paths to upgrade to Axon 7.3.8:

Current Version	Upgrade Path
7.3.4	You can first upgrade to Axon 7.3.7. You can then upgrade to Axon 7.3.8.
7.3.3	You can first upgrade to Axon 7.3.6. You can then upgrade to Axon 7.3.8.
7.3.2	You can first upgrade to Axon 7.3.5. You can then upgrade to Axon 7.3.8.

Current Version	Upgrade Path
7.3.1	You can first upgrade to Axon 7.3.3. Then upgrade to 7.3.6. You can then upgrade to Axon 7.3.8.
7.3 including any service pack, or cumulative patch	You can first upgrade to Axon 7.3.2. Then upgrade to 7.3.5. You can then upgrade to Axon 7.3.8.
7.2 including any hotfix, service pack, or cumulative patch	You can first upgrade to Axon 7.3.2. Then upgrade to 7.3.5. You can then upgrade to Axon 7.3.8.
7.1 including any hotfix, service pack, or cumulative patch	You can first upgrade to Axon 7.3.1. Then upgrade to 7.3.3. Then upgrade to 7.3.6. You can then upgrade to Axon 7.3.8.
7.0 including any hotfix, service pack, or cumulative patch	You can first upgrade to Axon 7.3.1. Then upgrade to 7.3.3. Then upgrade to 7.3.6. You can then upgrade to Axon 7.3.8.

For more information on how to upgrade to Axon 7.3.8, see the *Informatica® Axon Data Governance 7.3.8 Upgrade Guide*.

Before you install Axon 7.3.8, complete the following prerequisites:

1. Verify the Axon license key.
2. Download a compatible version of Elasticsearch and Logstash files to use with the Axon product version.

Before You Install or Upgrade

Prerequisites

Ensure all prerequisites are met before you proceed with the install or upgrade.

Update Cryptographic Policy

Before you install Axon version 7.3.8 on a Red Hat Enterprise Linux (RHEL) version 9.x instance with Federal Information Processing Standards (FIPS) mode enabled and OpenSSL 3.x, complete the following prerequisites:

1. To change the system-wide cryptographic policy, run the following command in a Linux terminal as a root user with Administrator privileges:
   ```
   update-crypto-policies --set FIPS:NO-ENFORCE-EMS
   ```
2. Restart Axon to apply the changes.

Fixed Limitations

Review the Release Notes of previous releases for information about previous fixed issues.

The following table describes fixed issues:

Issue	Description
AXON-38015	When you bulk publish datasets, Axon incorrectly creates duplicate marketplace collections.
AXON-38013	When you query an object with a large number of relationships, the /unison/v2/facet/_search API intermittently experiences slow response time.
AXON-38009	If the user_search_usage table contains duplicate rows, an HTTP 500 error occurs when Axon loads saved searches through the v1/unison/searches API.
AXON-38003	In a non-English locale, Axon fails to display the information icon for a failed job on the Data Quality Report grid.
AXON-37995	The Restrict Guest User Access setting prevents authorized users from accessing the My Jobs page.
AXON-37992	When you save a new or updated dataset, Axon fails to save and incorrectly returns an invalid length error.
AXON-37980	After you upgrade, the Axon Data Map incorrectly highlights attribute lineage paths and displays an incomplete dataset lineage.
AXON-37966	After you upgrade, Glossary data maps fail to restrict the system lineage view and display unrelated systems and attributes.
AXON-37952	LDAP sync fails with a Connection timed out error in AxonSuperAdminEmailProvider while fetching the Super Admin email.
AXON-37949	After an upgrade, Axon fails to display segments for users who do not have Super Admin privileges.
AXON-37866	Pasting a URL into the Enter File URL field on the Dataset Summary page breaks the link because Axon does not preserve the URL encoding.
AXON-37849	System pre-computation process fails due to timeout.
AXON-37848	When you perform a bulk update on Data Quality Rules, Axon incorrectly deletes all attribute associations.
AXON-37846	After an upgrade, the attribute lineage in the dataset's Relationship tab appeared broken.
AXON-37843	The Unison /v2/facet/_search API incorrectly displays outbound Attribute-to-Attribute relationships as inbound relationships.
AXON-37841	When you bulk upload multi-level hierarchy glossaries, the update fails and displays the following error: `The parent object you selected is currently saved as a child object. Select a different parent object.`
AXON-37838	When you update the lifecycle of System or Glossary objects through bulk upload, the generated Default Change Request fails to display the new value.
AXON-37820	If an Organizational Unit value from Active Directory ends with spaces, the bulk upload job fails with a duplicate org unit error.

Issue	Description
AXON-37796	When you save a workflow name with a '/' character, the Admin Panel Default Workflow fails and the user interface loads indefinitely.
AXON-33703	When you view the Bulk Upload logs, Admin Panel fails to display the User ID.

Closed Enhancements

The following table describes closed enhancements:

Issue	Description
AXON-37864	Axon displays a clear Sign In Required message on restricted pages with instructions to log in for unauthenticated users.
AXON-37850	You may experience delay in receiving critical system alerts and notifications in the user interface.

Emergency Bug Fixes Addressed in 7.3.8

Axon Data Governance addresses Emergency Bug Fixes (EBFs) from previous releases into version 7.3.8. These EBFs provide fixes for issues that were found in previous releases.

For a list of EBFs that were merged into 7.3.8, see the following Informatica Knowledge Base article:

https://knowledge.informatica.com/s/article/FAQ-What-are-the-Emergency-Bug-Fixes-EBFs-addressed-in-Axon-7-3-8

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:
