Informatica Upgrade Paths Overview

To upgrade the Informatica products, follow the upgrade paths that Informatica supports.

Use the supported upgrade paths for the following Informatica products and see more information about the documents and caveats associated with each path:

- Data Transformation
- Data Quality
- PowerCenter

When you perform the upgrade, upgrade to the latest hotfix version of the target release.

Informatica Upgrade Paths

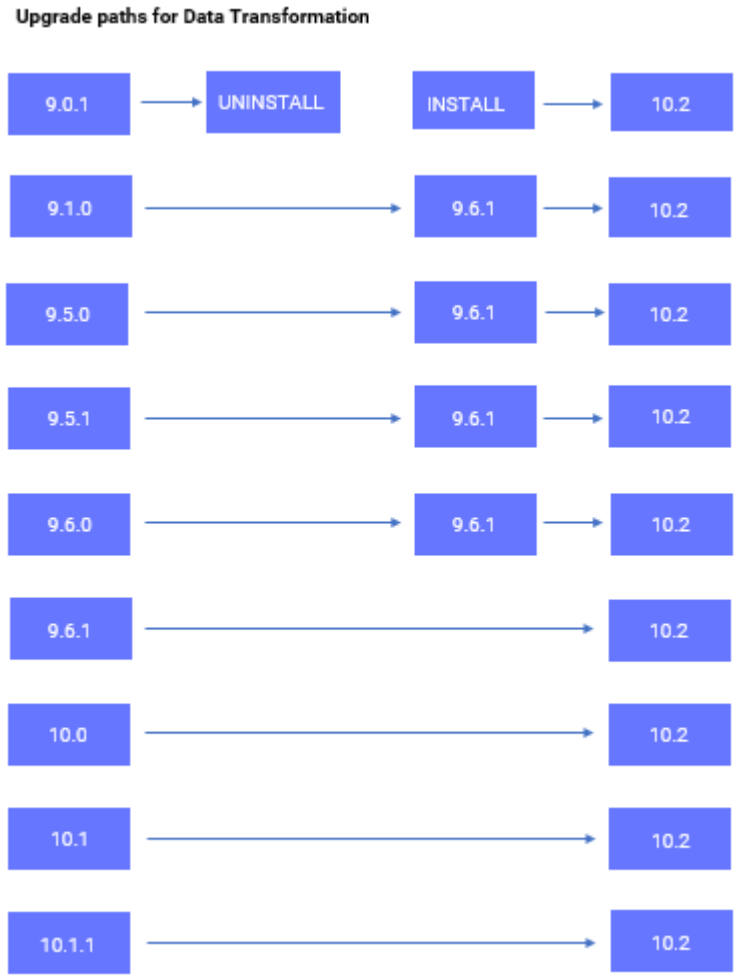

The Informatica platform consists of a server component and one or more client components. Informatica provides separate installers to upgrade the Informatica services and clients.

If the product version that is currently installed cannot be upgraded to Informatica 10.2, you must first upgrade to a supported version. To determine the Informatica product version that is currently installed, click **Help** > **About Informatica Administrator** in the Informatica Administrator header area.

Supported Upgrade Paths for Data Transformation 10.2

Before you upgrade Data Transformation, back up the Data Transformation files that were created under previous versions. After you complete the upgrade, copy the files to the new installation directories to get the same workspace, repository, custom global components, and library files as in the previous version.

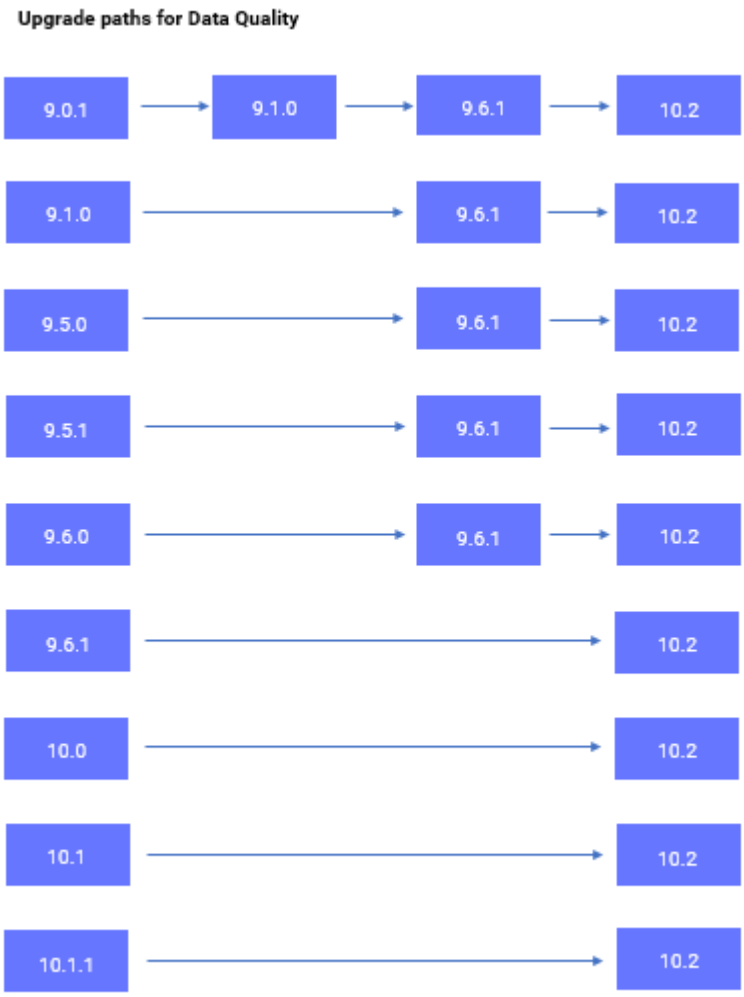

The following image shows the upgrade paths for Data Transformation:

Supported Upgrade Paths for Data Quality 10.2

When you upgrade from a previous Data Quality version to the latest Data Quality version, follow the supported upgrade path to ensure a smooth and successful upgrade.

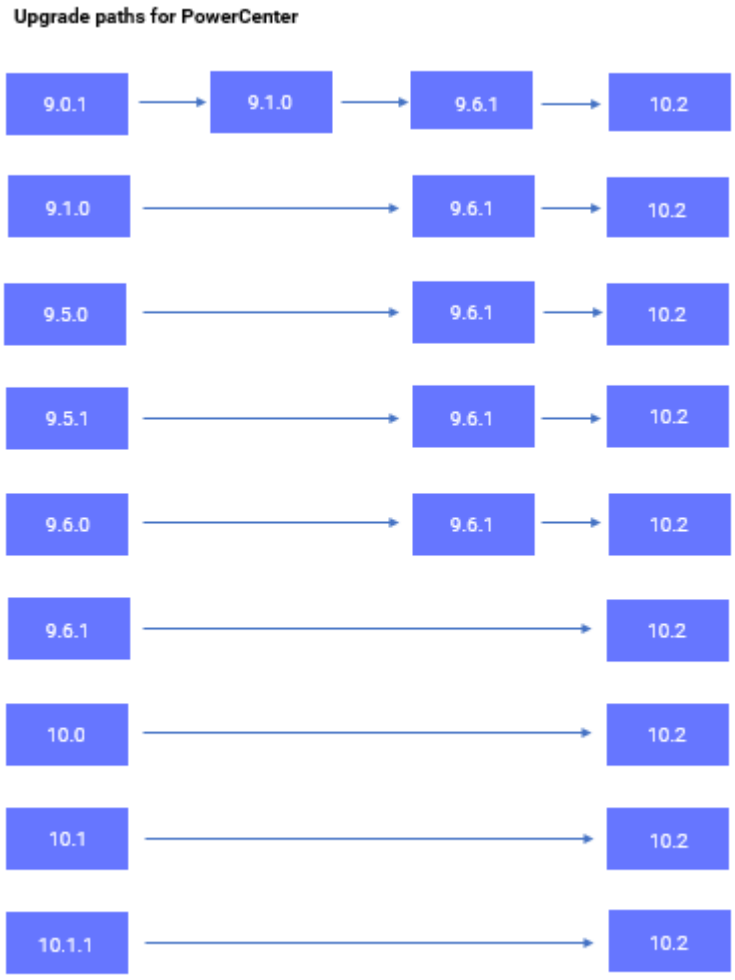

The following image shows the upgrade paths for Data Quality:

Supported Upgrade Paths for PowerCenter 10.2

When you upgrade from a previous PowerCenter version to the latest PowerCenter version, follow the supported upgrade path to ensure a smooth and successful upgrade.

The following image shows the upgrade paths for PowerCenter:

Upgrade Documentation
