Preface

Read *Introduction to Industry 360 Applications* to learn about the industry 360 applications.

Informatica Resources

Informatica provides you with a range of product resources through the Informatica Network and other online portals. Use the resources to get the most from your Informatica products and solutions and to learn from other Informatica users and subject matter experts.

Informatica Documentation

Use the Informatica Documentation Portal to explore an extensive library of documentation for current and recent product releases. To explore the Documentation Portal, visit https://docs.informatica.com.

If you have questions, comments, or ideas about the product documentation, contact the Informatica Documentation team at infa_documentation@informatica.com.

IDMC web site

You can access the Informatica® Intelligent Data Management Cloud™ (IDMC) web site at http://www.informatica.com/cloud.

Intelligent Data Management Cloud Communities

Use the IDMC Community to discuss and resolve technical issues. You can also find technical tips, documentation updates, and answers to frequently asked questions.

To access the IDMC Community, see Master Data Management SaaS Community.

Developers can learn more and share tips at the Cloud Developer community:

https://network.informatica.com/community/informatica-network/products/cloud-integration/cloud-developers

IDMC Marketplace

Visit the Informatica Marketplace to try and buy Data Integration Connectors, templates, and mapplets:

https://marketplace.informatica.com/

Informatica Knowledge Base

Use the Informatica Knowledge Base to find product resources such as how-to articles, best practices, video tutorials, and answers to frequently asked questions.

To search the Knowledge Base, visit https://search.informatica.com. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

IDMC Trust Center

The IDMC Trust Center provides information about Informatica security policies and real-time system availability.

You can access the trust center at https://www.informatica.com/trust-center.html.

Subscribe to the IDMC Trust Center to receive upgrade, maintenance, and incident notifications. The Informatica Intelligent Data Management Cloud Status page displays the production status of all the Informatica cloud products. All maintenance updates are posted to this page, and during an outage, it will have the most current information. To ensure you are notified of updates and outages, you can subscribe to receive updates for a single component or all IDMC components. Subscribing to all components is the best way to be certain you never miss an update.

Informatica Global Customer Support

You can contact a Global Support Center through the Informatica Network or by telephone.

To find online support resources on the Informatica Network, click **Contact Support** in the IDMC Help menu to go to the **Cloud Support** page. The **Cloud Support** page includes system status information and community discussions. Log in to Informatica Network and click **Need Help** to find additional resources and to contact Informatica Global Customer Support through email.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at https://www.informatica.com/services-and-training/support-services/contact-us.html.

CHAPTER 1

Introducing industry 360 applications

An industry 360 application is a ready-to-use package that you can use as a template for implementing MDM SaaS. With an industry 360 application, you can customize solutions to meet specific requirements and business initiatives of your industry. Use an industry 360 application to reduce implementation time, enhance data quality, and achieve faster business outcomes.

An industry 360 application is available as a package for installation on request. The package can include predefined Intelligent Data Management Cloud (IDMC) assets, such as predefined business entities, relationships, pages, search result layout components, reference data, and Data Integration and Application Integration assets.

You can use the following industry 360 applications:

Customer 360 for Healthcare

Use Customer 360 for Healthcare to master comprehensive healthcare data, including patients, healthcare providers, and members such as healthcare organizations, healthcare professionals, and payers. You can manage relationships between patients, members, plans, and primary care providers to strengthen governance, maintain compliance, and increase patient engagement.

For more information about Customer 360 for Healthcare, see *Customer 360 for Healthcare*.

Customer 360 for Insurance

Use Customer 360 for Insurance to manage comprehensive insurance data, including individual and organizational customers, policies, product specifications, and agents master data. You can manage customer households, total value, and life events to identify upsell or cross-sell opportunities. You can use Customer 360 for Insurance to monitor relationships among agents, customers, and policies for deeper insights.

For more information about Customer 360 for Insurance, see *Customer 360 for Insurance*.

Customer 360 for Life Sciences

Use Customer 360 for Life Sciences to onboard healthcare organization and professional records from multiple sources and consolidate them in Customer 360 SaaS. You can use the master data to generate insightful reports on key data aspects such as segments, countries, and specialties, and manage affiliations between healthcare professionals and organizations.

For more information about Customer 360 for Life Sciences, see *Customer 360 for Life Sciences*.

Legal Entity 360 for Banking

Use Legal Entity 360 for Banking to onboard legal entity identifier records from third-party data providers into Customer 360 SaaS. You can create new legal entities or import existing ones after searching source systems. You can leverage Legal Entity 360 for Banking to manage affiliations by identifying associations, such as investors linked to legal entities.

For more information about Legal Entity 360 for Banking, see *Legal Entity 360 for Banking*.

Location 360

Use Location 360 to master and manage location data for physical or virtual sites, such as medical wards or office floors. These data can be locations that are managed by an organization or individual to perform business operations or services. You can use Location 360 to track objects, entities including customers and suppliers, and assets associated with specific locations. For example, monitor utilities, equipments, storage, and real estate in a manufacturing location.

For more information about Location 360, see *Location 360*.

Material 360

Use Material 360 to efficiently process material and material category data. You can use Material 360 to centrally author and maintain material master data to enable collaboration across departments, using workflows to control data maintenance and approvals. You can integrate material master records with SAP ECC and SAP S/4HANA.

For more information about Material 360, see *Material 360*.

MDM 360 for Retail

Use MDM 360 for Retail to standardize, consolidate, and relate your retail business data across customer, product, supplier, and location domains. You can use MDM 360 for Retail to enhance personalized customer experiences by creating accurate customer segments. You can streamline product portfolio management to boost operational efficiency.

For more information about MDM 360 for Retail, see *MDM 360 for Retail*.

Product 360 for Life Sciences

Use Product 360 for Life Sciences to deliver a complete view of products, ingredients, and packaging across systems, business units, and regions. You can master and maintain detailed medicinal product information, including clinical particulars, marketing authorization, orphan designation, and product classifications.

For more information about Product 360 for Life Sciences, see *Product 360 for Life Sciences*.

Securities 360

Use Securities 360 to manage bond and equity records for financial services. You can aggregate, enhance, and share securities master data from market data providers, exchanges, custodians, and internal systems. You can also enrich this data with inputs from external data providers and publish it to systems such as portfolio management, order management, and client and compliance reporting.

For more information about Securities 360, see *Securities 360*.

Guidelines for importing assets

Consider the following guidelines before you import the industry 360 application assets:

- Set up the prerequisite MDM SaaS business application.
- Import the industry 360 application assets before you customize the business entities. You can safely import multiple industry 360 application assets that use different business entities and in different MDM SaaS business applications. When you import the assets in an environment that already has an industry 360 application with the same business entities, the import fails.

- After you import the assets, consider them as your custom assets.
- Once you deploy an industry 360 application, upgrading to a newer version of the industry 360 application isn't supported.

Guidelines for migrating assets

Consider the following guidelines before you migrate the industry 360 application assets to another environment:

- To migrate the industry 360 application assets to higher environments, such as QA and production, export the assets from the development environment. Then, import them into the QA and production environments. For more information about migrating assets, see *Migrating projects and assets*.
- Don't import the industry 360 application assets again into a higher environment.
