Preface

Follow the instructions in *Supplier 360 Extension for ESG* to deploy the Supplier 360 Extension for ESG.

Informatica Resources

Informatica provides you with a range of product resources through the Informatica Network and other online portals. Use the resources to get the most from your Informatica products and solutions and to learn from other Informatica users and subject matter experts.

Informatica Documentation

Use the Informatica Documentation Portal to explore an extensive library of documentation for current and recent product releases. To explore the Documentation Portal, visit https://docs.informatica.com.

If you have questions, comments, or ideas about the product documentation, contact the Informatica Documentation team at infa_documentation@informatica.com.

IDMC web site

You can access the Informatica® Intelligent Data Management Cloud™ (IDMC) web site at http://www.informatica.com/cloud.

Intelligent Data Management Cloud Communities

Use the IDMC Community to discuss and resolve technical issues. You can also find technical tips, documentation updates, and answers to frequently asked questions.

To access the IDMC Community, see Master Data Management SaaS Community.

Developers can learn more and share tips at the Cloud Developer community:

https://network.informatica.com/community/informatica-network/products/cloud-integration/cloud-developers

IDMC Marketplace

Visit the Informatica Marketplace to try and buy Data Integration Connectors, templates, and mapplets:

https://marketplace.informatica.com/

Informatica Knowledge Base

Use the Informatica Knowledge Base to find product resources such as how-to articles, best practices, video tutorials, and answers to frequently asked questions.

To search the Knowledge Base, visit https://search.informatica.com. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

IDMC Trust Center

The IDMC Trust Center provides information about Informatica security policies and real-time system availability.

You can access the trust center at https://www.informatica.com/trust-center.html.

Subscribe to the IDMC Trust Center to receive upgrade, maintenance, and incident notifications. The Informatica Intelligent Data Management Cloud Status page displays the production status of all the Informatica cloud products. All maintenance updates are posted to this page, and during an outage, it will have the most current information. To ensure you are notified of updates and outages, you can subscribe to receive updates for a single component or all IDMC components. Subscribing to all components is the best way to be certain you never miss an update.

Informatica Global Customer Support

You can contact a Global Support Center through the Informatica Network or by telephone.

To find online support resources on the Informatica Network, click **Contact Support** in the IDMC Help menu to go to the **Cloud Support** page. The **Cloud Support** page includes system status information and community discussions. Log in to Informatica Network and click **Need Help** to find additional resources and to contact Informatica Global Customer Support through email.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at https://www.informatica.com/services-and-training/support-services/contact-us.html.

CHAPTER 1

Introducing Supplier 360 Extension for Environmental, Social, and Governance (ESG)

An MDM SaaS extension is a ready-to-use package that streamlines and accelerates the implementation of MDM SaaS. MDM SaaS extensions contain pre-configured assets and integrations that extend and enhance the MDM SaaS business applications. Use an extension to reduce implementation time, enhance data quality, and achieve faster business outcomes.

Supplier 360 Extension for ESG is a ready-to-use package that extends the capability of Supplier 360 SaaS. The package includes business entities, reference data, relationships, and custom pages. Use the extension as a template to manage supplier ESG risk using Supplier 360 SaaS.

Use Supplier 360 Extension for ESG to achieve the following goals:

Assess suppliers and their risk ratings

Assess and identify suppliers with high ESG risks. When you assess suppliers, you can drive greater ESG accountability and transparency across the supply chain. You can use the extension to enforce supplier compliance.

Maintain supplier emissions data

Maintain greenhouse gas (GHG) inventory data that suppliers report and the calculated secondary emissions data for a supplier. You can use the emissions data for the Corporate Value Chain (Scope 3) Standard reporting to assess and manage the emissions-related risks for a company.

Guidelines for importing assets

Consider the following guidelines before you import the extension assets:

- Set up the prerequisite MDM SaaS business application.
- Import the extension assets before you customize the business entities. You can safely import multiple extension assets that use different business entities and in different MDM SaaS business applications. When you import the assets in an environment that already has an extension with the same business entities, the import fails.
- After you import the assets, consider them as your custom assets.
- Once you deploy an extension, upgrading to a newer version of the extension isn't supported.

Guidelines for migrating assets

Consider the following guidelines before you migrate the extension assets to another environment:

- To migrate the extension assets to higher environments, such as QA and production, export the assets from the development environment. Then, import them into the QA and production environments. For more information about migrating assets, see *Migrating projects and assets*.
- Don't import the extension assets again into a higher environment.

Prerequisites

Before you deploy Supplier 360 Extension for ESG, perform the following prerequisites:

- Ensure that you have the license for the Integration Components for Business 360 and Supplier 360 SaaS Edition.
  Ensure that you have the licenses required to manage connections, external data, and service rights.

  Note: The use of the extension doesn't confer any additional license or entitlement to license consumption beyond the terms specified in the applicable licensing agreements.
- Ensure that the version of the package matches the current MDM SaaS version where you import the extension assets.
  To view the MDM SaaS version, in Business 360 Console, click **About** in the IDMC Help menu and verify the build version.

  To view the MDM version of the extension, navigate to the readme text file in the extracted extension package and verify the platform version.

  If the version of the extension bundle doesn't match the current MDM SaaS version, contact Informatica Global Customer Support to use the current version of the extension.

CHAPTER 2

Supplier 360 Extension for ESG assets

Supplier 360 Extension for ESG is available for installation on request.

The Supplier 360 Extension for ESG extension package includes the following predefined assets:

- Additional fields for the Supplier business entity
- Additional business entity
- Pages and layouts
- Search components
- Reference data assets
- Relationships

Note: When you import the extension assets, the existing Supplier 360 assets and your customization are overwritten. Ensure that you import the assets of the extension before you customize the Supplier 360 data model.

Data model attributes

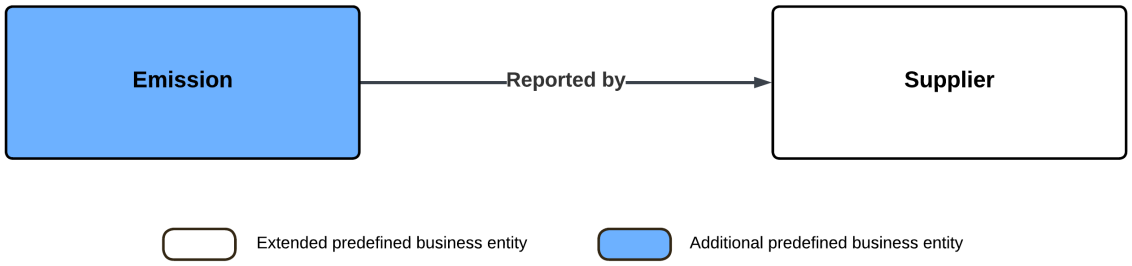

Supplier 360 Extension for ESG includes additional fields and reference data for the Supplier and Emission business entities.

The data dictionary provides the metadata, such as business entity, fields that the business entity contains, and field descriptions to understand the data model for Supplier 360 Extension for ESG.

The Supplier 360 Extension for ESG data model includes the following business entities:

- Supplier
- Emission

The following image shows the predefined relationship types between the business entities and the direction of the relationships:

Supplier business entity model

Supplier business entity stores information about a supplier. This business entity contains some basic fields and some field groups.

General fields of Supplier business entity

The general fields store some basic information about a supplier organization such as name and date of incorporation.

The following table lists the general fields that the Supplier business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Business Type	businessType	Lookup	NA	BusinessType	Type of business. For example, asset based or non-asset based.
Company Code	companyCode	Text	255	NA	Company code of the supplier organization.
Company Logo	companyLogo	Text	255	NA	URL of the image for the supplier organization.
Currency Type	currencyType	Lookup	NA	Currency	Currency in which the financial information is provided.
Date of Incorporation	dateOfIncorporation	Date	NA	NA	Date of incorporation of the supplier organization.
DUNS Number	dunsNumber	Text	255	NA	DUNS number of the supplier organization.
Industry Type	industryType	Lookup	NA	IndustryType	Type of industry. For example, agriculture, banking, chemicals, or communication.
NAICS Code	naicsCode	Text	255	NA	North American Industry Classification System code of the supplier organization.
Name	name	Text	255	NA	Name of the supplier organization.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Number of Employees	numberOfEmployees	Integer	NA	NA	Total number of employees in the supplier organization.
Online Catalog Flag	onlineCatalogFlag	Boolean	NA	NA	Indicates whether the supplier organization provides an online catalog.
Online Sell Flag	onlineSellFlag	Boolean	NA	NA	Indicates whether the supplier sells online.
Ownership Type	ownershipType	Lookup	NA	OwnershipType	Type of ownership for the supplier organization. For example, cooperative, private, public, or self-owned.
SIC Code	sicCode	Text	255	NA	Standard Industrial Classification code of the supplier organization.
Supplier Type	supplierType	Lookup	NA	SupplierType	Type of supplier. For example, manufacturers, exporters, or distributors.
Web Address	webAddress	Text	255	NA	Website of the supplier organization.

Address field group of Supplier business entity

The Address field group stores the postal addresses of suppliers. Postal address is a physical address associated with the supplier organization. A supplier organization can have multiple addresses.

The following table describes the fields that the Address field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Address Line 1	addressLine1	Text	200	NA	Line 1 of the postal address.
Address Line 2	addressLine2	Text	200	NA	Line 2 of the postal address.
Address Line 3	addressLine3	Text	200	NA	Line 3 of the postal address.
Address Status	addressStatus	Lookup	NA	AddressStatus	Status of the address. For example, active or inactive.
Address Type	addressType	Lookup	NA	AddressType	Type of postal address. For example, office, or shipping.
City	city	Text	50	NA	City of the postal address.
Coordinate System	coordinateSystem	Text	100	NA	Coordinate system used to determine the location of the address.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Country	country	Lookup	NA	Country	Country of the postal address.
County	county	Text	50	NA	County of the postal address.
Default Indicator	defaultIndicator	Boolean	NA	NA	Indicates whether the postal address is the default address.
End Date	effectiveEndDate	Date and Time	NA	NA	Expiry date of the address.
Enriched Indicator	enrichedIndicator	Lookup	NA	AddressEnriched Indicator	Validation status of the address. For example, error, valid, or not validated.
Latitude	latitude	Text	20	NA	Latitude for the address.
Location Coordinate Desc	locationCoordinate Desc	Text	50	NA	Location of the address using coordinate system.
Longitude	longitude	Text	20	NA	Longitude for the address.
Postal Code	postalCode	Text	10	NA	Postal code of the address.
Postal Code Extension	postalCodeExtensio n	Text	10	NA	Postal code extension of the address.
Start Date	effectiveStartDate	Date and Time	NA	NA	Start date from when the address is active.
State	state	Lookup	NA	State	State of the postal address.
Usage Type	usageType	Lookup	NA	AddressUsageTy pe	Usage type. For example, business or personal.
Verification Message	statusMessage	Text	255	NA	Validation message that the address verification service returns.
Verification Status Code	statusCode	Text	10	NA	Validation status that the address verification service returns.

Alternate Names field group of Supplier business entity

The Alternate Names field group stores the alternate names related information, such as alternate name, effective start date, and effective end date. A supplier might use different names, such as legal name, alias, and trading name. An alternative name might be active during a particular time.

The following table describes the fields that the Alternate Names field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Alternate Name	alternateName	Text	255	NA	Alternate name of the supplier organization.
Effective End Date	effectiveEndDate	Date	NA	NA	Expiry date of the alternate name.
Effective Start Date	effectiveStartDate	Date	NA	NA	Start date from when the alternate name is valid.
Name Type	nameType	Lookup	NA	AlternateNameType	Alternate name type of the supplier organization. For example, doing business as name, alias, legal name, or previous name.

Bank Details field group of Supplier business entity

The Bank Details field group stores the bank related information, such as account number, account holder, and branch of the contact.

The following table describes the fields that the Bank Details field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Account Type	accountType	Lookup	NA	NA	Type of bank account, such as savings account or current account.
Account Holder	accountHolder	Text	50	NA	Bank account holder's name.
Branch Name	branchName	Text	255	NA	Name of the branch in which the supplier organization has the account.
Account Number	accountNumber	Text	50	NA	Bank account number of the supplier organization.
Account Status	accountStatus	Lookup	NA	NA	Status of the bank account, such as active or inactive.
Bank Name	bankName	Text	255	NA	Name of the bank.
SWIFT	swift	Text	50	NA	Society for Worldwide Interbank Financial Telecommunication code.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
IBAN	iban	Text	50	NA	International Bank Account Number.
Country	country	Lookup	NA	NA	Country of the bank account.
Branch Number	branchNumber	Text	50	NA	Branch number of the bank.
Check Digit	checkDigit	Text	50	NA	Error detection on identification numbers, such as bank account numbers.
Primary Indicator	primaryIndicator	Boolean	NA	NA	Indicates whether the bank account is the primary account.
Effective Start Date	effectiveStartDate	Date	NA	NA	Start date from when the bank account is valid.
Effective End Date	effectiveEndDate	Date	NA	NA	Expiry date of the bank account.

Contract field group of Supplier business entity

The Contract field group stores contract related information, such as the order number, quality, transit risk, shipment completion method, and payment type.

The following table describes the fields that the Contract field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Agreement Confidentiality	agreementConfidentiality	Boolean	NA	NA	Indicates whether the contract agreement is confidential.
Agreement Date	agreementDate	Date	NA	NA	Date when the contract agreement is drawn.
Arbitration	arbitration	Boolean	NA	NA	Indicates whether arbitration is applicable to the contract.
Country	country	Lookup	NA	Country	Country code of the contract.
Currency	currency	Lookup	NA	Currency	Currency that is specified in the contract.
Delivery Responsibility	deliveryResponsibility	Lookup	NA	DeliveryResponsibilityType	Delivery responsibility of the contract, such as customer will arrange delivery or supplier will arrange delivery.
Discount Avail	discountAvail	Boolean	NA	NA	Indicates whether discount is available for the contract.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Effective End Date	effectiveEndDate	Date	NA	NA	Effective end date of the contract.
Effective Start Date	effectiveStartDate	Date	NA	NA	Effective start date of the contract.
Force Majeure	forceMajeure	Boolean	NA	NA	Indicates whether the force majeure provision is applicable to the contract.
Language	language	Lookup	NA	Language	Language in which the contract is written.
Order Number	orderNumber	Text	255	NA	Order number of the contract.
Payment Method	paymentMethod	Lookup	NA	PaymentMethodType	Payment method, such as cash, cheque, direct debit, or file electronic transfer.
Payment Type	paymentType	Lookup	NA	PaymentType	Payment type of the contract, such as several installment payments or single lump sum payment.
Purchasing Org Code	purchaseOrgCode	Lookup	NA	PurchaseOrgCodeType	Code of the purchasing organization.
Quality	quality	Text	255	NA	Quality requirements of the product or service contract.
Return Remedy Period	returnRemedyPeriod	Text	255	NA	Return remedy period of the contract.
Return Responsibility	returnResponsibility	Lookup	NA	ReturnResponsibilityType	Return responsibility of the contract, such as customer will take responsibility for returns, or supplier will take responsibility for returns.
Shipment Completion Type	shipmentCompletionType	Lookup	NA	ShipmentCompletionType	Shipment completion type of the contract, such as upon delivery of goods to the final destination or upon delivery of goods to the shipping company.
State Law Applied	stateLawApplied	Boolean	NA	NA	Indicates whether the state law is applicable to the contract.
Transferability	transferability	Boolean	NA	NA	Indicates whether the contract is transferable.
Transit Risk	transitRisk	Text	255	N	Transit risk factors of the contract, such as loss of goods.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Tax Responsibility	taxResponsibility	Lokkup	NA	TaxResponsibilityType	Tax responsibility of the contract, such as customer will take responsibility for tax, do not include tax provision, or supplier will take responsibility for tax.
Violation Grace Period	violationGracePeriod	Text	255	NA	Violation grace period of the contact.
Warranty	warranty	Text	255	NA	Warranty of the contract.

Diversity field group of Supplier business entity

The Diversity field group stores diversity related information, such as diversity status and diversity type.

The following table describes the fields that the Diversity field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Diversity Status	diversityStatus	Boolean	NA	NA	Indicates whether the supplier organization is diverse.
Diversity Type	diversityType	Lookup	NA	DiversityType	Diversity type of the supplier organization. For example, minority business enterprise, small disadvantaged business, or women business enterprise.

Documents field group of Supplier business entity

The Documents field group stores the document related information, such as bank statement, qualification certificate, and proof of business existence.

The following table describes the fields that the Documents field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Document Link	documentLink	Text	255	NA	URL to access the document.
Document Name	documentName	Lookup	NA	DocumentType	Name of the document.
Document Type	documentType	Text	255	NA	Type of document.
File Name	fileName	Text	255	NA	Name of the file.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Valid From	validFrom	Date	NA	NA	Date from when the document is valid.
Valid To	validTo	Date	NA	NA	Date until when the document is valid.

Email field group of Supplier business entity

The Email field group stores information about the electronic addresses, such as email addresses.

The following table describes the fields that the Email field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Default Indicator	defaultIndicator	Boolean	NA	NA	Indicates whether the address is the default address.
Effective End Date	effectiveEndDate	Date and Time	NA	NA	End date for the electronic address.
Effective Start Date	effectiveStartDate	Date and Time	NA	NA	Start date for the electronic address.
Electronic Address	electronicAddress	Text	255	NA	Electronic address of the supplier organization.
Electronic Address Status	electronicAddressStatus	Lookup	NA	ElectronicAddressStatus	Status of the email address. For example, active, blocked, or not in use.
Enriched Indicator	enrichedIndicator	Boolean	NA	NA	Indicates whether the email verification service verified the electronic address.
Hygiene Status	hygieneStatus	Text	50	NA	Hygiene status for the electronic address. For example, safe to send, invalid, or spam.
Net Protect Code	netProtectCode	Text	50	NA	Net protect codes identify which service or appliance is monitoring a given network.
Usage Type	usageType	Lookup	NA	ElectronicAddressUsageType	Intended use or purpose of the electronic address. For example, business, work, or personal.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Verification Status Code	validationStatusCode	Text	50	NA	Validation status of the electronic address.
Verification Message	validationMessage	Text	50	NA	Message that the email validation service generates to indicate how valid and trusted the address is.

ESG Risk Rating (D&B) field group of the Supplier business entity

The ESG Risk Rating (D&B) field group stores the Dun & Bradstreet (D&B) environmental, social, and governance risk ratings of a company.

The following table describes the fields that the ESG Risk Rating (D&B) field group of the Supplier business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Average Peer Score	X_infas360esg_averagePeerScore	Decimal	20	NA	Average ESG ranking for the Sustainability Accounting Standards Board (SASB) industry peer group of the company.
Data Depth Indicator	X_infas360esg_dataDepthIndicator	Text	10	NA	Indicates the level of predictive data available for ESG calculations.
Environmental - Average Peer Score	X_infas360esg_environmentAveragePeerScore	Decimal	20	NA	Average environmental ranking for the SASB industry peer group of the company.
Environmental - Data Depth Indicator	X_infas360esg_environmentDataDepthIndicator	Text	10	NA	Indicates the level of predictive data available for environmental score calculations.
Environmental - Emissions and Climate - GHG Emission Score	X_infas360esg_environmentalEmmisionGHGEmmisionScore	Integer	NA	NA	Performance rating of the company related to the measurement and management of GHG (Greenhouse Gas) emissions.
Environmental - Emissions and Climate - Risk Score	X_infas360esg_environmentalEmmisionClimateRiskScore	Integer	NA	NA	Performance rating of the company related to awareness and readiness to address climate-related impacts.
Environmental - Emissions and Climate Score	X_infas360esg_environmentEmmisionClimateScore	Integer	NA	NA	The risk score for the performance of the company related to the GHG emissions and climate.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Environmental - Natural Resource Energy Management Score	X_infas360esg_environmentalNaturalEnergyManagementScore	Integer	NA	NA	Performance rating of the company related to the energy management efforts.
Environmental - Natural Resource Land Use Biodiversity Score	X_infas360esg_environmentalNaturalLandUseBiodiversityScore	Integer	NA	NA	Performance rating of the company related to land use and biodiversity loss.
Environmental - Natural Resource Material Sourcing Management Score	X_infas360esg_environmentalNaturalMaterialSourcingManagementScore	Integer	NA	NA	Performance rating of the company related to procurement, materials sourcing, and management.
Environmental - Natural Resource Pollution Prevention Management Score	X_infas360esg_environmentalNaturalPollutionPreventionManagementScore	Integer	NA	NA	Performance rating of the company related to policies and impact related to pollution management.
Environmental - Natural Resource Score	X_infas360esg_environmentNaturalResourceScore	Integer	NA	NA	The risk score of the company related to the management of natural resources.
Environmental - Natural Resource Waste Hazard Management Score	X_infas360esg_environmentalNaturalWasteHazardManagementScore	Integer	NA	NA	Performance rating of the company related to waste and hazards management efforts.
Environmental - Natural Resource Water Management Score	X_infas360esg_environmentalNaturalWaterManagementScore	Integer	NA	NA	Performance rating of the company related to water management efforts.
Environmental - Opportunities Certification Score	X_infas360esg_environmentalOpportunitiesCertificationScore	Integer	NA	NA	Performance rating of the company to indicate whether the company has environmental related certifications for its branches and headquarters.
Environmental - Opportunities Score	X_infas360esg_environmentOpportunitiesScore	Integer	NA	NA	Performance rating of the company for initiatives toward sustainable and green activities.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Environmental - Peer Percentile Group	X_infas360esg_environmentPeerPercentileGroup	Text	50	NA	Percentile environmental ranking of the company compared to the SASB industry peer group.
Environmental - Ranking Score	X_infas360esg_environmentScore	Integer	NA	NA	Overall environmental ranking of the company.
Environmental - Reason	X_infas360esg_environmentalReason	Nested field group	NA	NA	Reason for the overall environmental ranking.
Environmental - Risk Compliance Score	X_infas360esg_environmentalRiskComplainceScore	Integer	NA	NA	Performance rating of the company related to adherence to environmental regulations.
Environmental - Risk Score	X_infas360esg_environmentRiskScore	Integer	NA	NA	Performance rating of the company related to environmental risk.
ESG Score	X_infas360esg_esgScore	Integer	NA	NA	Overall ESG ranking that indicates the environmental, social, and governance risk factors of the company.
ESG Score Date	X_infas360esg_esgScoreDate	Date	NA	NA	Date of calculation of the ESG risk ranking.
Governance - Average Peer Score	X_infas360esg_governanceAveragePeerScore	Decimal	20	NA	Average governance ranking for the SASB industry peer group of the company.
Governance - Business Resilience Score	X_infas360esg_governanceBusinessResilienceScore	Integer	NA	NA	Performance rating for the business sustainability and resiliency of the company.
Governance - Business Resilience Sustainability Score	X_infas360esg_governanceBusinessResilienceSustainabilityScore	Integer	NA	NA	Performance rating for the ability to be resilient against volatility, economic, and weather-related events.
Governance - Corporate Behaviour Related Certification Score	X_infas360esg_governanceRelatedCertificationScore	Integer	NA	NA	Performance rating for the adherence of the company to formal governance structures through certifications.
Governance - Corporate Behaviour Score	X_infas360esg_governanceCorporateBehaviourScore	Integer	NA	NA	The risk score that indicates the overall behavior or conduct of the company related to governance.
Governance - Corporate Board Accountability Score	X_infas360esg_governanceCorporateBoardAccountabilityScore	Integer	NA	NA	Performance rating for the level of accountability of the board of directors of the company.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Governance - Corporate Business Ethics Score	X_infas360esg_governanceCorporateBusinessEthicsScore	Integer	NA	NA	Performance rating for the commitment of the company to conduct ethical business practices.
Governance - Corporate Business Transparency Score	X_infas360esg_governanceCorporateBusinessTransparencyScore	Integer	NA	NA	Performance rating for the commitment of the company to operate in a transparent and accountable manner.
Governance - Corporate Compliance Behaviour Score	X_infas360esg_governanceCorporateComplianceBehaviourScore	Integer	NA	NA	Performance rating for the adherence of the company to regulatory requirements and absence of liabilities.
Governance - Corporate Shareholder Rights Score	X_infas360esg_governanceCorporateShareholderRightsScore	Integer	NA	NA	Performance rating for the quality and use of appropriate channels for shareholders to enact their rights.
Governance - Corporate Score	X_infas360esg_governanceCorporateGovernanceScore	Integer	NA	NA	Risk score for the governance practices of the company.
Governance - Data Depth Indicator	X_infas360esg_governanceDataDepthIndicator	Text	10	NA	Indicates the level of predictive data available for governance score calculations.
Governance - Peer Percentile Group	X_infas360esg_governancePeerPercentileGroup	Text	50	NA	Percentile governance ranking of the company compared to the SASB industry peer group.
Governance - Ranking Score	X_infas360esg_governanceRankingScore	Integer	NA	NA	Overall governance ranking of the company.
Governance - Reason	X_infas360esg_governanceReason	Nested field group	NA	NA	Reason for the overall governance ranking.
Peer Percentile Group	X_infas360esg_peerPercentileGroup	Text	50	NA	Percentile ranking of the ESG Ranking of the company compared to the SASB industry peer group.
Social - Average Peer Score	X_infas360esg_socialAveragePeerScore	Decimal	20	NA	Average social ranking for the SASB industry peer group of the company.
Social - Certification Score	X_infas360esg_socialCertificationScore	Integer	NA	NA	Risk score for the social-related certifications of the company.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Social - Certification Related Score	X_infas360esg_socialRelatedCertificationScore	Integer	NA	NA	Performance rating for the commitment of the company to pursue formal processes and management systems related to social issues.
Social - Community Corporate Philanthropy Score	X_infas360esg_socialCorporatePhilanthropyScore	Integer	NA	NA	Performance rating of the company towards engagement and contributions to the community through philanthropic initiatives.
Social - Community Engagement Score	X_infas360esg_socialCommunityEngagementScore	Integer	NA	NA	Performance rating of the company related to the community engagement.
Social - Community Score	X_infas360esg_socialCommunityScore	Integer	NA	NA	Risk score for community engagement of the company.
Social - Customers Data Privacy Score	X_infas360esg_socialCustomersDataPrivacyScore	Integer	NA	NA	Performance rating for the vulnerability of the company to breaches related to personal and customer data.
Social - Customers Products and Services Score	X_infas360esg_socialCustomersProductServiceScore	Integer	NA	NA	Performance rating of the company related to customer engagement activities for its products and services.
Social - Customers Score	X_infas360esg_socialCustomersScore	Integer	NA	NA	Risk score for the customer engagement of the company.
Social - Data Depth Indicator	X_infas360esg_socialDataDepthIndicator	Text	10	NA	Indicates the level of predictive data available for social score calculations.
Social - Human Capital Diversity and Inclusion Score	X_infas360esg_socialHumanCapitalDiversityInclusionScore	Integer	NA	NA	Performance rating of the company related to diversity and inclusion within the company and among its leadership.
Social - Human Capital Health Safety Score	X_infas360esg_socialHumanCapitalHealthSafetyScore	Integer	NA	NA	Performance rating for the responsibility of the company for employee health and safety.
Social - Human Capital Labor Relations Score	X_infas360esg_socialHumanCapitalLaborRelationsScore	Integer	NA	NA	Performance rating for the quality of the company - employee relationships.
Social - Human Capital Right Abuse Score	X_infas360esg_socialHumanRightAbuseScore	Integer	NA	NA	Performance rating for the coverage of potential human rights abuses within the operations of the company.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Social - Human Capital Score	X_infas360esg_socialHumanCapitalScore	Integer	NA	NA	Risk score for the human capital management of the company.
Social - Human Capital Training Education Score	X_infas360esg_socialHumanCapitalTrainingEducationScore	Integer	NA	NA	Performance rating for the focus of the company on employee training and education.
Social - Peer Percentile Group	X_infas360esg_socialPeerPercentileGroup	Text	50	NA	Percentile ranking of the social ranking of the company compared to the SASB industry peer group.
Social - Products and Services Cyber Risk Score	X_infas360esg_socialProductServiceCyberRiskScore	Integer	NA	NA	Performance rating for the vulnerability of the company to business disruption from cyber-related incidents.
Social - Products and Services Quality Management Score	X_infas360esg_socialProductQualityManagementScore	Integer	NA	NA	Performance rating for the activities of the company related to the quality of its product and service portfolios.
Social - Products and Services Score	X_infas360esg_socialProductServiceScore	Integer	NA	NA	Risk score for the products and services of the company.
Social - Ranking Score	X_infas360esg_socialRankingScore	Integer	NA	NA	Overall social ranking of the company.
Social - Reason	X_infas360esg_socialReason	Nested field group	NA	NA	Reason for the overall social ranking.
Social - Supplier Engagement Score	X_infas360esg_socialSupplierEngagementScore	Integer	NA	NA	Performance rating for the quality of relationships and engagement of the company with its suppliers.
Social - Supplier Score	X_infas360esg_socialSupplierScore	Integer	NA	NA	Risk score for the supplier engagement of the company.

Environmental - Reason field group of the Supplier business entity

The Environmental - Reason field group stores the details of a reason for the overall environmental ranking of a company.

The following table describes the fields that the Environmental - Reason nested field group of the Supplier business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Reason Code	X_infas360esg_environmentalReasonCode	Integer	NA	NA	Unique code assigned by Dun & Bradstreet to indicate the reason that influences the overall environmental ranking.
Reason Description	X_infas360esg_environmentalReasonDescription	Text	255	NA	Description of the reason that influences the overall environmental ranking.
Reason Priority	X_infas360esg_environmentalReasonPriority	Integer	NA	NA	The order of importance assigned to the environmental factors of the subject company.

Social - Reason field group of the Supplier business entity

The Social - Reason field group stores the details of a reason for the overall social ranking of a company.

The following table describes the fields that the Social - Reason nested field group of the Supplier business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Reason Code	X_infas360esg_socialReasonCode	Integer	NA	NA	Unique code assigned by Dun & Bradstreet to indicate the reason that influences the overall social ranking.
Reason Description	X_infas360esg_socialReasonDescription	Text	255	NA	Description of the reason that influences the overall social ranking.
Reason Priority	X_infas360esg_socialReasonPriority	Integer	NA	NA	The order of importance assigned to the social factors of the subject company.

Governance - Reason field group of the Supplier business entity

The Governance - Reason field group stores the details of a reason for the overall governance ranking of a company.

The following table describes the fields that the Governance - Reason nested field group of the Supplier business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Reason Code	X_infas360esg_governanceReasonCode	Integer	NA	NA	Unique code assigned by Dun & Bradstreet to indicate the reason that influences the overall governance ranking.
Reason Description	X_infas360esg_governanceReasonDescription	Text	255	NA	Description of the reason that influences the overall governance ranking.
Reason Priority	X_infas360esg_governanceReasonPriority	Integer	NA	NA	The order of importance assigned to the governance factors of the subject company.

ESG Risk Rating (Sustainalytics) field group of the Supplier business entity

The ESG Risk Rating (Sustainalytics) field group stores the Sustainalytics environmental, social, and governance risk ratings of a company.

The following table describes the fields that the ESG Risk Rating (Sustainalytics) field group of the Supplier business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Environmental - Risk Score	X_infas360esg_environmentRiskScore	Decimal	20	NA	Unmanaged score of the environment cluster.
ESG Risk Category	X_infas360esg_riskcategory	Text	10	NA	Risk category assigned to the ESG rating.
ESG Risk Category - Momentum	X_infas360esg_esgRiskCategoryMomentum	Text	13	NA	Year-on-year absolute change in the ESG risk category.
ESG Risk Percentile - Subindustry	X_infas360esg_esgRiskPercentileSubindustry	Decimal	5	NA	ESG risk score of the company relative to the Sustainalytics sub-industry expressed as a percentage rank.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
ESG Risk Percentile - Universe	X_infas360esg_esgRiskPercentileUniverse	Decimal	5	NA	ESG risk score of the company relative to the Sustainalytics research universe expressed as a percentage rank.
ESG Risk Rank - Subindustry	X_infas360esg_esgRiskRankSubindustry	Text	8	NA	ESG risk score of the company relative to the Sustainalytics sub-industry expressed as a rank.
ESG Risk Rank - Universe	X_infas360esg_esgRiskRankUniverse	Text	8	NA	ESG risk score of the company relative to the Sustainalytics research universe expressed as a rank.
ESG Risk Score	X_infas360esg_esgRiskScore	Decimal	20	NA	Overall ESG risk score of the company.
ESG Risk Score Average - Universe	X_infas360esg_esgRiskScoreAverageUniverse	Decimal	5	NA	Average ESG risk score of all companies in the Sustainalytics research universe.
ESG Risk Score Average - Subindustry	X_infas360esg_esgRiskScoreAverageSubindustry	Decimal	5	NA	Average ESG Risk Score of all companies in the Sustainalytics sub-industry.
Governance - Risk Score	X_infas360esg_governanceRiskScore	Decimal	20	NA	Unmanaged risk score of the governance cluster.
Overall Beta	X_infas360esg_overallBeta	Decimal	20	NA	Deviation of the overall exposure of the company from the overall exposure of the sub-industry.
Overall Excess Exposure Score	X_infas360esg_overallExcessExposureScore	Decimal	20	NA	Deviation of the exposure score of the company from the exposure score of the sub-industry.
Overall Exposure Category	X_infas360esg_overallExposureCategory	Text	6	NA	Exposure category in the ESG risk rating assigned to the overall exposure score of the company.
Overall Exposure Category - Momentum	X_infas360esg_overallExposureCategoryMomentum	Text	13	NA	Year-on-year absolute change in the overall exposure category.
Overall Exposure Score	X_infas360esg_overallExposureScore	Decimal	20	NA	Extent of the ESG risk exposure of the company.
Overall Exposure Score - Momentum	X_infas360esg_overallExposureScoreMomentum	Decimal	7	NA	Year-on-year absolute change in the overall exposure score.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Overall Manageable Risk Factor	X_infas360esg_overallManageableRiskFactor	Decimal	20	NA	Overall percentage of risk that can be managed by the company.
Overall Manageable Risk Score	X_infas360esg_overallManageableRiskScore	Decimal	20	NA	ESG risk managed by the company through suitable policies, programs, or initiatives. The score ranges from 0 to 100.
Overall Managed Risk Score	X_infas360esg_overallManagedRiskScore	Decimal	20	NA	ESG risk managed by the company through suitable policies, programs, or initiatives.
Overall Management Category	X_infas360esg_overallManagementCategory	Text	7	NA	Management category in the ESG risk rating assigned to the overall management score of the company.
Overall Management Category - Momentum	X_infas360esg_overallManagementCategoryMomentum	Text	13	NA	Year-on-year absolute change in the overall management category.
Overall Management Gap Score	X_infas360esg_overallManagementGapScore	Decimal	20	NA	Total risk that the company can manage but not yet managing. The score ranges from 0 to the overall manageable risk score of the company.
Overall Management Score	X_infas360esg_overallManagementScore	Decimal	20	NA	Measure of the management decisions and handling of ESG risks across the company issues.
Overall Management Score - Momentum	X_infas360esg_overallManagementScoreMomentum	Decimal	7	NA	Year-on-year absolute change in the overall management score.
Overall Unmanageable Risk Score	X_infas360esg_overallUnmanageableRiskScore	Decimal	20	NA	ESG risk that can't be managed by the company. The score ranges from 0 to the overall manageable risk score of the company.
Social - Risk Score	X_infas360esg_socialRiskScore	Decimal	20	NA	Unmanaged risk score of the social cluster.

Executive Members field group of Supplier business entity

The Executive Members field group stores the executive members-related information, such as company name, business title, and executive type.

The following table describes the fields that the Executive Members field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Business Title	businessTitle	Text	255	NA	Business title for the executive member.
Company Name	companyName	Text	255	NA	Company name of the executive member.
Executive Type	executiveType	Lookup	NA	ExecutiveType	Type of the executive member. For example, Board of Directors, Chief Executive Officer, Chief Financial Officer, or Managing Director.
Full Name	fullName	Text	50	NA	Full name of the executive member of the supplier organization.

Financial field group of Supplier business entity

The Financial field group stores financial information of a supplier organization, such as currency, unit, and financial reliability.

The following table describes the fields that the Financial field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Amount	amount	Double	NA	NA	Total value of the finance.
Currency	currency	Lookup	NA	Currency	Currency in which the financial information is collected.
Finance Info Type	financeInfoType	Lookup	NA	FinanceInfoType	Type of financial information. For example, equity, annual income, or debt.
Finance Reliability	financeReliability	Lookup	NA	FinanceReliability	Reliability of the financial data. For example, actual or estimate.
Time Period	timePeriod	Text	255	NA	Finance period for which the data is collected.
Time Period Type	timePeriodType	Lookup	NA	TimePeriodType	Type of the finance period. For example, quarterly or yearly.
Unit	unit	Lookup	NA	FinancialUnit	Unit of the amount. For example, thousands, millions, or billions.

Identifier field group of Supplier business entity

The Identifier field group stores the identifier related information of a supplier organization, such as tax numbers, D-U-N-S number or National Provider Identifier (NPI) numbers for healthcare providers.

The following table describes the fields that the Identifier field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Effective End Date	effectiveEndDate	Date	NA	NA	Expiry date of the identifier.
Effective Start Date	effectiveStartDate	Date	NA	NA	Issued date of the identifier.
Identifier Type	identifierType	NA	NA	OrganizationIdentifierType	Type of identifier.
Identifier Value	identifierValue	Text	50	NA	Value of identifier, such as D-U-N-S number or National Provider Identifier.
Issuing Authority	issuingAuthority	Lookup	NA	IssuingAuthority	Authority that has issued the identifier to the supplier organization.
Status	status	Lookup	NA	IdentifierStatus	Status of the alternate identifier. For example, effective, disqualified, expired, or temporary.

Insurance field group of Supplier business entity

The Insurance field group stores the insurance-related information, such as the name of the insurance provider, the policy number, the insurance type, and the validity.

The following table describes the fields that the Insurance field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Currency	currency	Lookup	NA	Currency	Currency in which the supplier organization is insured.
Effective End Date	effectiveEndDate	Date	NA	NA	Expiry date of the insurance.
Effective Start Date	effectiveStartDate	Date	NA	NA	Start date of the insurance.
Insurance Holder	insuranceHolder	Text	255	NA	Name of the insurance holder.
Insurance Provider	insuranceProvider	Text	255	NA	Company that provides the insurance.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Insurance Type	insuranceType	Lookup	NA	InsuranceType	Type of insurance, such as cargo insurance, casualty, commercial auto, or shipping.
Policy Number	policyNumber	Text	100	NA	Policy number of the insurance.
Status	status	Text	255	NA	Status of the insurance. For example, active or expired.
Sub Type	subType	Lookup	NA	InsuranceSubType	Insurance subtype. For example, if the insurance type is group, the subtypes might be extended lenders mortgage, family health gold, mediexcel horizon, or platinum travel.
Unit	unit	Lookup	NA	FinancialUnit	Unit for the amount. For example, billion, million, or thousand.
Value	value	Double	NA	NA	Amount insured.

Phone field group of the Supplier business entity

The Phone field group stores the phone details, such as phone number, phone number extension, and phone type.

The following table describes the fields that the Phone field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Cell Prefix	cellPrefix	Text	1	NA	Prefix that must prepend the National Significant Number for inbound international calls.
Default Indicator	defaultIndicator	Boolean	NA	NA	Indicates whether the phone number is the default phone number.
Do Not Call Indicator	doNotCallIndicator	Boolean	NA	NA	Indicates whether the supplier is interested to receive unsolicited phone calls from marketers.
Effective End Date	effectiveEndDate	Date	NA	NA	Date until when the phone number was active or will be active.
Effective Start Date	effectiveStartDate	Date	NA	NA	Date from when the phone number is active.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Enriched Indicator	enrichedIndicator	Boolean	NA	NA	Indicates whether the phone number validation service verified the phone number.
International Format	internationalFormat	Text	50	NA	International format for the phone number.
International Prefix	internationalPrefix	Text	3	NA	Prefix used to select an international telephone circuit.
ISO	iso	Text	2	NA	ISO country code.
National Destination Code	nationalDestinationCode	Text	10	NA	Code that identifies a numbering area within a country or a group of countries.
National Format	nationalFormat	Text	50	NA	National format for the phone number.
National Prefix	nationalPrefix	Text	255	NA	Digit or combination of digits which must be dialed before an area or city code.
NDC Indicator	nationalDestinationCodeIndicator	Boolean	NA	NA	Indicates whether the phone number includes the National Destination Code.
Phone Number	phoneNumber	Text	20	NA	Phone number of the supplier organization.
Phone Number Extension	phoneNumberExtension	Text	10	NA	Extension to phone number.
Phone Type	phoneType	Lookup	NA	PhoneType	Type of phone. For example, cell, fax, freephone, landline, mobile, or pager.
Phone Usage Type	phoneUsageType	Lookup	NA	PhoneUsageType	Usage type of the phone. For example, business, customer service - group market, customer service toll free - individual market, or small group market.
Prefix Number	prefixNumber	Text	3	NA	Country dialing code.
Status	status	Lookup	NA	PhoneStatus	Status of the phone number, such as the phone number is publicly available or active.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Verification Status Code	validationStatusCode	Text	50	NA	Validation status that the phone number validation service returns.
Verification Message	validationMessage	Text	255	NA	Validation message that the phone number validation service returns.

Reference Details field group of Supplier business entity

The Reference Details field group stores the reference details, such as company name, contact name, and company contact number.

The following table describes the fields that the Reference Details field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Company Name	companyName	Text	255	NA	Name of the reference organization.
Contact Name	contactName	Text	255	NA	Name of the contact in the reference organization.
Contact Number	contactNumber	Text	255	NA	Contact number of the reference organization.

Risk Questions field group of Supplier business entity

The Risk Questions field group stores information about risk-related questions.

The following table describes the fields that the Tax field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Anti-Bribery - Will the supplier interact with government officials on behalf of the buyer?	question1	Boolean	NA	NA	Indicates whether the supplier organization interacts with government officials on behalf of the buyer.
Personally Identifiable Information - Will the supplier process or store personal information of any of the buyer's employees or customers?	question2	Boolean	NA	NA	Indicates whether the supplier organization processes or store personal information of any of the buyer's employees or customers.
Protected Health Information - Will the supplier collect and store data relating to health of any of the buyer's employees or customers?	question3	Boolean	NA	NA	Indicates whether the supplier organization collects and store data relating to health of the buyer's employees or customers.
Will the supplier interact with customers or provide any customer-facing services?	question4	Boolean	NA	NA	Indicates whether the supplier organization interacts with customers or provides any customer-facing services.

Segment field group of Supplier business entity

The Segment field group stores the segment related information, such as segment type and segment name.

The following table describes the fields that the Segment field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Segment Name	segmentName	Lookup	NA	SegmentValue	Supplier segment name.
Segment Type	segmentType	Lookup	NA	SegmentType	Segment type of the supplier organization. For example, region or supplier criticality.

Social Media field group of Supplier business entity

The Social Media field group stores information about the social media identifiers of a supplier organization.

The following table describes the fields that the Social Media field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Social Media Handle	socialMediaHandle	Text	255	NA	Social media identifier or name of the supplier organization.
Social Media Type	socialMediaType	Lookup	NA	SocialHandleTyp e	Type of social media platform. For example, Facebook or Twitter.

Sourcing Manager field group of Supplier business entity

The Sourcing Manager field group stores the sourcing manager related information, such as name and employee ID.

The following table describes the fields that the Sourcing Manager field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Employee ID	sourcingManagerEmpl oyeeId	Text	255	NA	Employee ID of the sourcing manager.
Name	sourcingManagerNam e	Text	255	NA	Name of the sourcing manager.

Sustainable Industry Classification field group of the Supplier business entity

The Sustainable Industry Classification field group stores the industry classification details of a supplier.

The following table describes the fields that the Sustainable Industry Classification field group of the Supplier business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Classification Type	X_infas360esg_classificationType	Lookup	NA	infas360esg_ClassificationType	Type of classification of the company.
Subsector	X_infas360esg_level2	Text	255	NA	Subsector that the company is categorized into.
Sector	X_infas360esg_level1	Text	50	NA	Sector that the company is categorized into.
Industry	X_infas360esg_level3	Text	255	NA	Industry that the company is categorized into.

Stock field group of Supplier business entity

The Stock field group stores the stock related information, such as ticker symbol, exchange name, and country.

The following table describes the fields that the Stock field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Country	country	Lookup	NA	Country	Country where the stock exchange is located.
Exchange Name	exchangeName	Text	255	NA	Name of the stock exchange that trades the shares of the supplier organization.
Ticker Symbol	tickerSymbol	Text	255	NA	Abbreviation used to identify the publicly traded shares of the organization.

Supplier Alerts field group of Supplier business entity

The Supplier Alerts field group stores information, such as message, message type, and external link.

The following table describes the fields that the Supplier Alerts field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Effective End Date	effectiveEndDate	Date	NA	NA	Expiry date of the supplier alert.
Effective Start Date	effectiveStartDate	Date	NA	NA	Start date of the supplier alert.
External Link	externalLink	Text	255	NA	External link to the supplier alert message.
Message	message	Text	255	NA	Supplier alert message.
Message Type	messageType	Text	255	NA	Type of supplier alert message.

Tax field group of Supplier business entity

The Tax field group stores tax-related information, such as the taxpayer type, tax authority, taxpayer identification number, and amount of tax paid of the supplier organization.

The following table describes the fields that the Tax field group contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Country	country	Lookup	NA	Country	Country of taxation.
Currency	currency	Lookup	NA	Currency	Currency in which the tax is paid.
Effective End Date	effectiveEndDate	Date	NA	NA	End date of the tax period.
Effective Start Date	effectiveStartDate	Date	NA	NA	Start date of the tax period.
State	state	Lookup	NA	State	State within the country of taxation.
Tax Authority	taxAuthority	Lookup	NA	TaxAuthority	Tax authority. For example, Internal Revenue Service (IRS) or HM Revenue and Customs (HMRC).
Tax Number	taxNumber	Text	50	NA	Unique number that identifies the supplier organization for tax purposes.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Tax Number Type	taxNumberType	Lookup	NA	TaxNumberType	Type of the tax number. For example, tax number can be Individual Taxpayer Identification Number (ITIN) or Social Security Number.
Tax Paid	taxPaid	Text	50	NA	Tax amount that the supplier organization has paid.
Tax Payer Type	taxPayerType	Lookup	NA	TaxPayerType	Type of tax payer. For example, business entity, estate, or individual.

Emission business entity model

Emission business entity stores information about the greenhouse gas (GHG) emission of a company. This business entity contains some basic fields and some field groups.

General fields of the Emission business entity

The general fields store basic information about the greenhouse gas (GHG) emission of a company.

The following table describes the fields that the general fields of the Emission business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Allocation Factors	infas360esg_allocationFactors	Text	255	NA	Factors based on which a company allocates the emission.
Allocation Ratio	infas360esg_allocationRatio	Decimal	20	NA	Ratio of allocation factor emission to the GHG emission.
Allocation Type	infas360esg_allocationType	Lookup	NA	infas360esg_AllocationType	Method to allocate emissions from a supplier of the company.
Data Type	infas360esg_dataType	Lookup	NA	infas360esg_DataType	Type of data used by organizations in disclosing GHG emissions.
GHG Emissions - CH4	infas360esg_ghgEmissionsCH4	Decimal	20	NA	Amount of methane (CH4) emissions.
GHG Emissions - CO2e	infas360esg_ghgEmissionsCO2e	Decimal	20	NA	Equivalent amount of carbon dioxide emissions.
GHG Emissions - CO2	infas360esg_ghgEmissionsCO2	Decimal	20	NA	Amount of carbon dioxide (CO2) emissions.
GHG Emissions - HFCs	infas360esg_ghgEmissionsHFCs	Decimal	20	NA	Amount of Hydrofluorocarbons (HFCs) emissions.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
GHG Emissions - N2O	infas360esg_ghgEmissionsN2O	Decimal	20	NA	Amount of nitrous oxide (N2O) emissions.
GHG Emissions - PFCs	infas360esg_ghgEmissionsPFCs	Decimal	20	NA	Amount of Perfluorocarbons (PFCs) emissions.
GHG Emissions - SF6	infas360esg_ghgEmissionsSF6	Decimal	20	NA	Amount of Sulfur Hexafluoride (SF6) emissions.
Level	infas360esg_level	Lookup	NA	infas360esg_Level	Rating type of the emission by a company.
Location or Site	infas360esg_locationSite	Text	255	NA	Location of direct-emitting facilities.
Measurement Unit of GHG Emissions - CO2e	infas360esg_ghgEmissionsCO2eUnitofMeasure	Lookup	NA	infas360esg_ghgEmissionsCO2eUnitofMeasure	Unit of measurement of CO2e emission concentration.
Measurement Unit of GHG Emissions - CO2	infas360esg_ghgEmissionsCO2UnitofMeasure	Lookup	NA	infas360esg_ghgEmissionsCO2UnitofMeasure	Unit of measurement of GHG CO2 emission concentration.
Measurement Unit of GHG Emissions - CH4	infas360esg_ghgEmissionsCH4UnitofMeasure	Lookup	NA	infas360esg_ghgEmissionsCH4UnitofMeasure	Unit of measurement of CH4 emission concentration.
Measurement Unit of GHG Emissions - HFCs	infas360esg_ghgEmissionsHFCsUnitofMeasure	Lookup	NA	infas360esg_ghgEmissionsHFCsUnitofMeasure	Unit of measurement of HFCs emission concentration.
Measurement Unit of GHG Emissions - N2O	infas360esg_ghgEmissionsN2OUnitofMeasure	Lookup	NA	infas360esg_ghgEmissionsN2OUnitofMeasure	Unit of measurement of N2O emission concentration.
Measurement Unit of GHG Emissions - PFCs	infas360esg_ghgEmissionsPFCsUnitofMeasure	Lookup	NA	infas360esg_ghgEmissionsPFCsUnitofMeasure	Unit of measurement of PFCs emission concentration.
Measurement Unit of sGHG Emissions - SF6	infas360esg_ghgEmissionsSF6UnitofMeasure	Lookup	NA	infas360esg_ghgEmissionsPFCsUnitofMeasure	Unit of measurement of SF6 emission concentration.
Reporting Period End Date	infas360esg_reportingperiodEndDate	Date	NA	NA	Date until when the reporting period is effective.

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Reporting Period Start Date	infas360esg_reportingperiodStartDate	Date	NA	NA	Date from when the reporting period is effective.
Scope	infas360esg_scope	Text	255	NA	Type of emission to identify whether the emissions are owned or controlled by the company or are a consequence of the activities of the company but occur from sources not owned or controlled by the company.
Supplier Allocation	infas360esg_supplierAllocation	Boolean	NA	NA	Allocation of emission from a supplier of the company.

Activity Data field group of the Emission business entity

The Activity Data field group stores the quantitative measure of a level of activity that results in GHG emissions.

The following table describes the fields that the Activity Data field group of the Emission business entity contains:

Display Name	Internal ID	Field Type	Length	Reference Data	Description
Activity Name	infas360esg_activityName	Text	255	NA	Name of the activity the company is involved.
Emission Factor	infas360esg_emissionFactor	Decimal	20	NA	Factor that converts activity data into GHG emissions data.
Emission Factor Description	infas360esg_emissionFactorDescription	Text	255	NA	Description of the emission factor.
Emission Factor Source	infas360esg_emissionFactorSource	Text	255	NA	Data source for the emission factor.
Measurement Unit	infas360esg_unitofMeasure	Lookup	NA	infas360esg_UnitofMeasure	Unit of measurement for the emission factor.
Quantity	infas360esg_quantity	Text	255	NA	Level of activity for GHG emission.

Predefined pages

The Supplier 360 Extension for ESG package contains predefined pages. You can use the predefined pages as a reference to manually create similar custom pages for the business entities.

Use the **Create** page type to create records. Use the **Edit** page type to view and edit records.

The following table describes the predefined pages for the Supplier and Emission business entities:

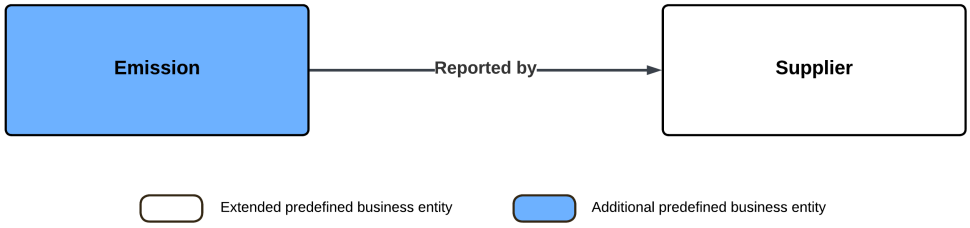

Page Name	Description	Assigned User Roles
Create Page Emission	A page to create a Emission record.	- Supplier 360 Commodity Manager - Supplier 360 Contract Manager - Supplier 360 Credit Manager - Supplier 360 Data Steward - Supplier 360 Risk Manager
Create Page Supplier	A page to create a Supplier record.	- Supplier 360 Commodity Manager - Supplier 360 Contract Manager - Supplier 360 Credit Manager - Supplier 360 Data Steward - Supplier 360 Risk Manager
Edit Page Emission	A page to view or edit a Emission record.	- MDM Business Users - Supplier 360 Analyst - Supplier 360 Credit Manager - Supplier 360 Data Steward - Supplier 360 Risk Manager
Edit Page Supplier	A page to view or edit a Supplier record.	- MDM Business Users - Supplier 360 Analyst - Supplier 360 Contract Manager - Supplier 360 Data Steward - Supplier 360 Read Only - Supplier 360 Risk Manager

For more information about creating pages, see *Design the User Interface*.

Relationships

You can use the predefined relationships between the Supplier and Emission business entities that are included in Supplier 360 Extension for ESG.

The following image shows the predefined relationship types between the business entities and the direction of the relationships:

The following table describes the relationship for Supplier 360 Extension for ESG:

Relationship Name	Internal ID	Business Entity 1	Business Entity 2	Direction
Reported by	infas360esg_reportedby	Emission	Supplier	Emission -> Supplier

Reports

Use the predefined reports to help you visualize data in the form of charts and report tables in Supplier 360 SaaS.

The following table describes the predefined reports for Supplier 360 Extension for ESG:

Report Name	Internal ID	Description
Supplier by ESG Peer Percentile Group - D&B	infas360esg_supplier_by_esg_peer_percentile_group_dnb	Displays the number of Supplier 360 records based on the peer percentile group for D&B.
Supplier by ESG Risk Percentile - Sustainalytics	infas360esg_supplier_by_esg_risk_percentile_sustainalytics	Displays the number of Supplier 360 records based on the ESG risk percentile in a subindustry for Sustainalytics.
Supplier by Industry Sector	infas360esg_supplier_by_industry_sector	Displays the number of Supplier 360 records based on the industry sector.

Search result layout components

The Supplier 360 Extension for ESG package contains predefined search result layout components.

The following table describes the search components for the Supplier and Emission business entities:

Search Component Name	Description	Assigned User Roles
Search Layout Emission	Search layout to display search results of the Emission business entity records.	- MDM Business Users - Supplier 360 Analyst - Supplier 360 Contract Manager - Supplier 360 Data Steward - Supplier 360 Read Only - Supplier 360 Risk Manager
Search Layout ESG Score (D&B)	To search a record for the Supplier business entity ESG Score (D&B).	- MDM Business Users - Supplier 360 Analyst - Supplier 360 Contract Manager - Supplier 360 Data Steward - Supplier 360 Read Only - Supplier 360 Risk Manager

For more information about creating pages, see *Design the User Interface*.

CHAPTER 3

Deploying Supplier 360 Extension for ESG

Before you deploy Supplier 360 Extension for ESG, ensure that you have the license for the Integration Components for Business 360 and Supplier 360 SaaS Edition.

To deploy Supplier 360 Extension for ESG on Supplier 360, perform the following tasks:

1. Download and extract the extension package.
2. Import the data model, the predefined custom pages, and the source systems.
3. Add predefined pages and search result layout components.
4. Import reference data code values into reference data assets.

Note: Before importing the data model, pages, and reference data assets, ensure that you are assigned to the Designer, MDM Designer, Reference 360 User, and Reference 360 Business Steward user roles, and not to the Admin user role.

Downloading and extracting the Supplier 360 Extension for ESG package

Download the Supplier 360 Extension for ESG package from the download site to a directory on your machine.

To get the link to the download site, contact Informatica Global Customer Support.

After you download the Supplier 360 Extension for ESG package, extract the package on your machine. The package contains additional data model attributes, relationships, and predefined custom pages for Supplier 360.

The extracted package contains the following files and folders:

File or Folder Name	Description
`1_MDM_Assets.zip`	Contains the following attributes: - Business entities with additional data model attributes. - Relationships. - Reference data assets. - Predefined custom pages. - Search components.
`Reference_Data`	Contains files that store code lists and values related to source system.

Importing the Supplier 360 Extension for ESG assets

After you extract the Supplier 360 Extension for ESG package, import the Supplier 360 Extension for ESG assets to Supplier 360. When you import the assets of the extension, the import process overwrites the existing Supplier 360 assets and your customization.

Note: Before you customize the Supplier 360 data model, ensure that you import the assets of the extension.

You can import the following assets:

- Reference data tables
- Business entities with additional data model attributes
- Predefined custom pages
- Relationships
- Search components

Note: Before importing the data model, pages, and reference data assets, ensure that you are assigned to the Designer, MDM Designer, Reference 360 User, and Reference 360 Business Steward user roles, and not to the Admin user role.

Importing MDM assets

Import the data model attributes related to the extension, the predefined custom pages, reference data sets, search components, custom reports, and relationships.

1. In Business 360 Console, click **Explore** > **Import**.
2. Navigate to the following file:

   `<Extracted extension package>/1_MDM_Assets.zip`
3. Click **Open**.
4. On the **Import Assets** page, ensure that all the assets are selected, and click **Import**.
5. On the **My Import/Export Logs** page, verify whether the import job is successful.

Adding predefined pages and components

You can add the predefined pages and search components of the Supplier and Emission business entities to the Supplier 360 business application. Ensure that you belong to the administrator user role.

1. In Business 360 Console, click **Explore** > **Supplier360**.
2. Click **Supplier 360**.
3. On the **Pages** tab, select **Supplier**.
4. On the **Create** tab, click **Add Page**.

   A blank row appears.
5. To select a page, click the asset picker.

   The **Select a page** window appears.
6. Select the **Create Page Supplier** page, and click **Select**.

   The selected page appears in the row.
7. To assign user roles to the page, from the list of user roles, select one or more user roles.

   For more information about assigned user roles, see "Predefined pages" on page 40.
8. On the **View and Edit** tab, click **Add Page**.

   A blank row appears.
9. To select a page, click the asset picker.

   The **Select a page** window appears.
10. Select the **Edit Page Supplier** page, and assign the page to one or more user roles.

    For more information about assigned user roles, see "Predefined pages" on page 40.
11. In the left pane, select **Emission**, and repeat steps 4 through 10.

    Note: Use **Create Page Emission** and **Edit Page Emission** as the pages for the Emission business entity.
12. On the **Seach** tab, in the **Business Entities** section, select **Supplier**.
13. In the **Search Result Layouts: Supplier** section, click **Add Search Result Layout**.

    A blank row appears.
14. To select a component, click the asset picker.

    The **Select a Component** window appears.
15. Select the component, and assign the component to one or more user roles.

    The following table lists the business entities and the component names:

Business Entity	Component Name
Supplier	Search Layout ESG Score (D&B)
Supplier	Search Layout Supplier

    For more information about assigned user roles, see "Search result layout components" on page 42.

    Note: When you select the **Emission** business entity, select the component.
16. In the **Business Entities** section, select **Emission**, and repeat steps 12 through 15.

    Note: Use **Search Layout Emission** component for the Emission business entity.
17. Click **Save**.

For more information about how to assign pages to user roles, see *Assign pages to user roles*.

Importing reference data

After you import the assets for the source systems that you plan to use, import reference data code values in bulk from CSV files into reference data assets.

The following table describes the files and folders in the extracted reference data directory:

File or Folder Name	Description
_1	Folder that contains the lookup code values.
LoadReferenceData.py	Python script to import reference data.

To import code values in bulk from CSV files that are available in the extracted reference data directory, run the LoadReferenceData.py Python script.

Prerequisites

Before you import reference data into your system, ensure that you meet the prerequisites.

Complete the following prerequisite tasks:

- Ensure that you have permission to import reference data.
- Install Python version 3 or later on your machine.
- To verify whether the cURL library files are pre-installed and to check the cURL library version, run the following command from a command prompt:
  ```
  curl --version
  ```
  Note: If cURL isn't available in your operating system, ensure that you install it. You can download the cURL library for your operating system from the cURL website:
  ```
  http://curl.haxx.se/download.html
  ```

Importing the reference data

To import all the reference data in bulk, run the Python script.

1. Open a command prompt, and navigate to the following directory:
   ```
   <Extracted extension package>/Reference Data
   ```
2. Run the following command:
   - On Windows.
     ```
     python LoadReferenceData.py --podHostName <POD host name>.informaticacloud.com --
     userName <user name> --password <password> --region <POD region>
     ```
   - On Linux.
     ```
     python3 LoadReferenceData.py --podHostName <POD host name>.informaticacloud.com --
     userName <user name> --password <password> --region <POD region>
     ```

   The jobs to import reference data code values run.
3. To monitor the status of a job, click **My Jobs** in Reference 360.

   The My Jobs page lists the job instances that are currently running, failed, and successfully completed.
