Read the Informatica® SSA-NAME3 Release Notes to learn about fixed limitations and known limitations of the release.

Installing or Upgrading SSA-NAME3

To install or upgrade SSA-NAME3, you must install or upgrade MDM Registry Edition. Before you install or upgrade MDM Registry Edition, see the following documents:

- *Informatica MDM Registry Edition 10.5 HotFix 3 Installation and Configuration Guide*
- *Informatica MDM Registry Edition 10.5 HotFix 3 Release Notes*
- *Informatica SSA-NAME3 10.5 HotFix 3 Release Notes*

For more information about product requirements and supported platforms, see the Product Availability Matrix: https://network.informatica.com/community/informatica-network/product-availability-matrices.

10.5 HotFix 3 Fixed Limitations

The following table describes fixed limitations:

Reference Number	Description
IR-3301	When you specify a search radius in `N3SCT Geocode matching`, `SSA-NAME3` might match key ranges that are outside the specified radius. For example, if you specify the radius as 1000 meters, `SSA-NAME3` might return key ranges between 1200 and 5000 meters.
IR-3188	When you don't specify the weight parameter for a field, `SSA-NAME3` causes parsing error. Additionally, `SSA-NAME3` doesn't process search layout options, such as `below`, `above`, or `max_score`, with match types, such as `RANGE` or `DICE`, and displays the following error: `Invalid search data layout.`

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through the Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link:
https://www.informatica.com/services-and-training/customer-success-services/contact-us.html.

To find online support resources on the Informatica Network, visit https://network.informatica.com and select the Support option.
