Chapter 4: Informatica Global Customer Support. 8

Abstract

This document contains important information about the package contents, REST Adapter API installation and compatibility, and known limitations of Informatica RulePoint SDK 6.2.

CHAPTER 1

Package Contents

The RulePoint SDK version 6.2 (`RulePoint_SDK_6.2.zip`) contains the following files:

RulePoint_Java_Adapter_6.2.zip file

The RulePoint Java Adapter version 6.2 is a software module that simplifies the task of interacting with the RulePoint REST APIs. Use the Java adapter to communicate with the REST API. The `RulePoint_Java_Adapter_6.2.zip` file consists of the following components:

samples folder

Sample source files that you can use as a reference to communicate with the RulePoint REST APIs.

RulePointJavaAdapterJavaDoc.zip file

The API reference documentation that you can use to get information about specific classes and methods in the REST Adapter API.

lib folder

The libraries required by the REST Adapter API.

config.properties file

A sample configuration file for the REST Adapter API.

RP_61_DeveloperGuide_en.pdf file

The *RulePoint Developer Guide* version 6.2 provides detailed information about the various components of the SDK.

CHAPTER 2

REST Adapter API 6.2 Installation and Compatibility

You need to install RulePoint 6.2 to use the REST Adapter API 6.2. For more information about installing RulePoint 6.2, see the *RulePoint 6.2 Installation and Upgrade Guide*. For more information about using the REST Adapter API, see the *RulePoint 6.2 Developer Guide*.

For more information about product requirements and supported platforms, see the Product Availability Matrix on the Informatica My Support Portal:
https://mysupport.informatica.com/community/my-support/product-availability-matrices

CHAPTER 3

Known Limitations

The following table describes known limitations:

CR	Description
360741	When you use the deploy API in the RulePoint Java Adapter to deploy a primary object which has a dependent secondary object that is referenced by another primary object in the Needs_Deployment state, an exception is thrown. Workaround: Pass the referenced secondary object as an argument in the deploy API instead of passing the primary object. This action deploys all the referenced primary objects that are in the Needs_Deployment state.

CHAPTER 4

Informatica Global Customer Support

You can contact a Customer Support Center by telephone or through the Online Support.

Online Support requires a user name and password. You can request a user name and password at http://mysupport.informatica.com.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at http://www.informatica.com/us/services-and-training/support-services/global-support-centers/.
