Upgrade Paths

Version 10.5

When you upgrade from a previous version, follow the supported upgrade paths to ensure a smooth and successful upgrade. If the domain contains multiple products supported by the 10.5 installer, verify the upgrade path for each product and upgrade them all to the same version before you upgrade to 10.5. This article includes upgrade paths for all products supported in the 10.5 Informatica installer.

Data Engineering Integration & Data Engineering Quality

Data Engineering Streaming

Enterprise Data Catalog

Enterprise Data Preparation

Data Privacy Management

PowerCenter & Data Quality

Test Data Management

Note: Effective in version 10.4, Informatica changed the numbering scheme for product versions. The use of HotFix and Service Pack are dropped from the version number. Informatica uses the following scheme for version numbers:

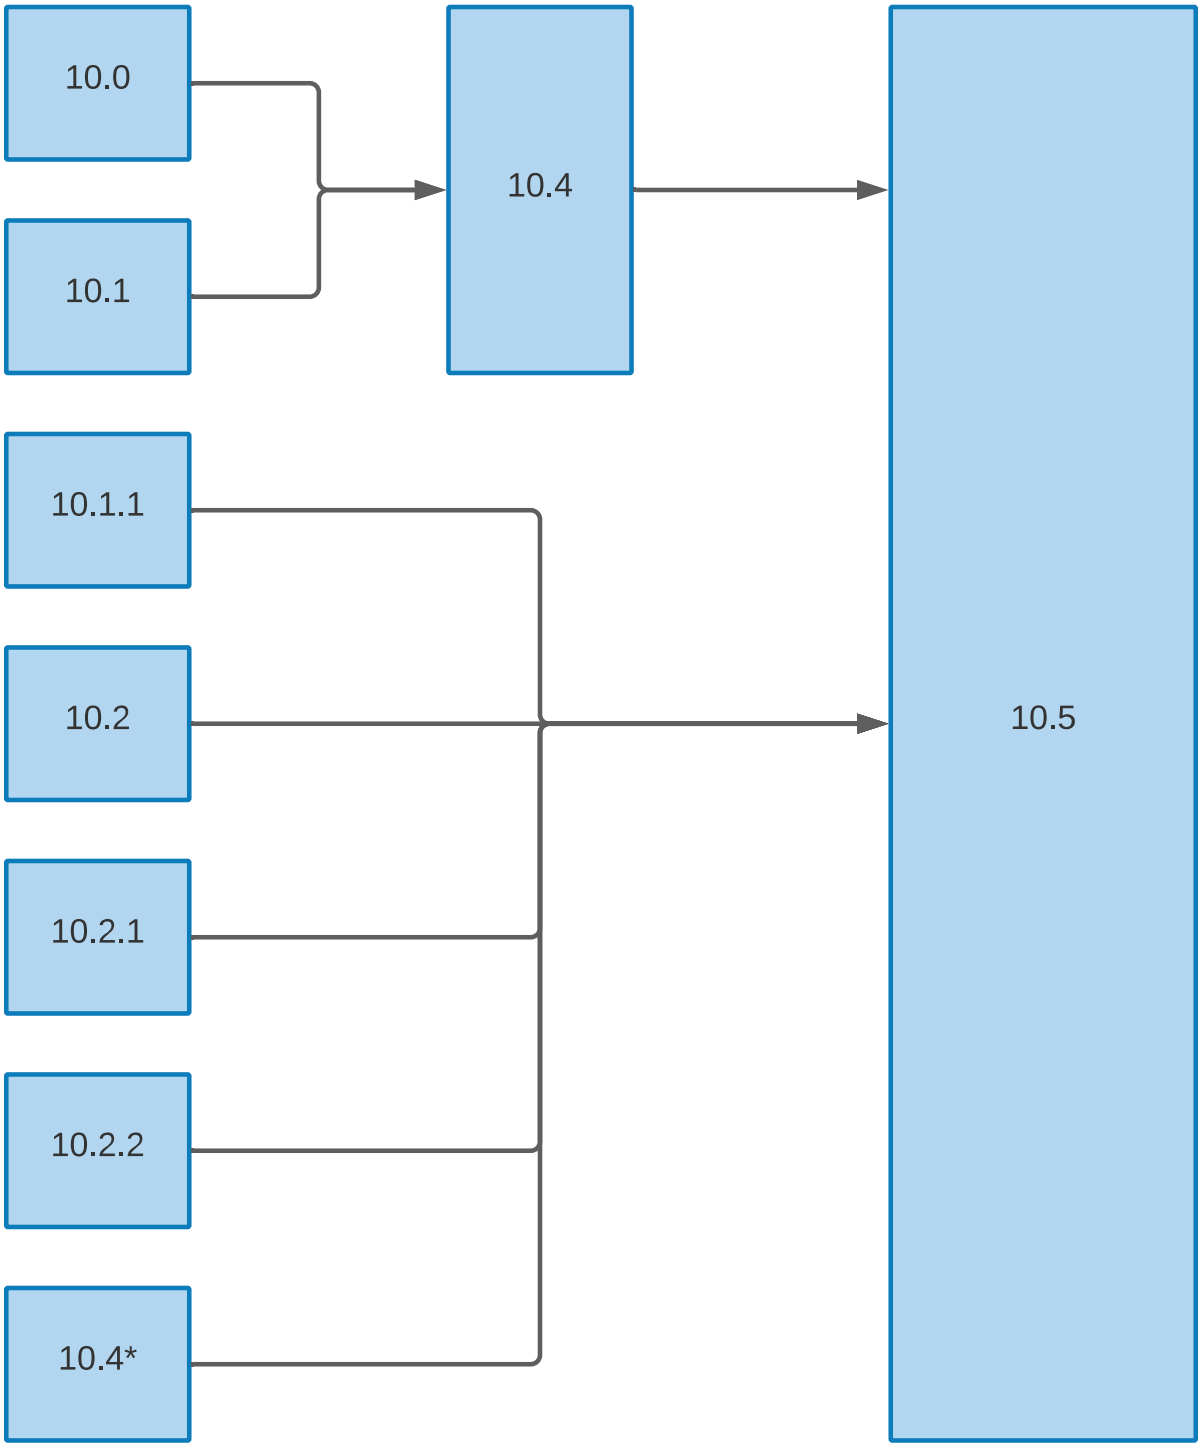

x.x = major release
x.x.x = hot fix
x.x.x.x = service pack
x.x.x.x.x = cumulative patch

Unless otherwise noted, upgrade paths in this article include hot fixes, service packs, and cumulative patches.

Data Engineering Integration & Data Engineering Quality

The following image shows the upgrade paths to version 10.5 for Data Engineering Integration and Data Engineering Quality. To open the guide, click on any box on the left or scroll to the resources section.

*Version 10.4.1 is a hotfix for version 10.4.

Data Engineering Integration & Data Engineering Quality

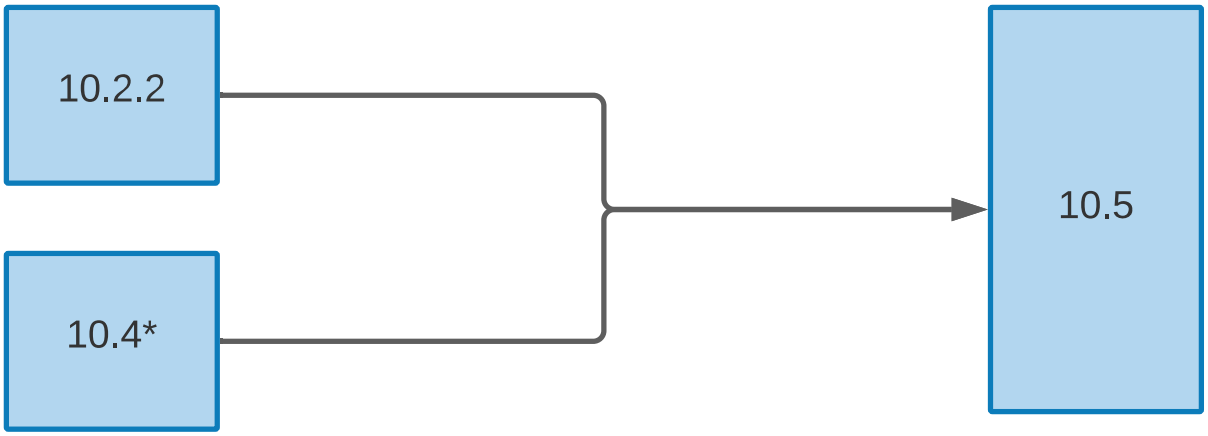

Resources

Upgrading from Version 10.0 to 10.4
Upgrading from Version 10.2 to 10.4

Upgrading from Version 10.1.1 to 10.5
Upgrading from Version 10.2 to 10.5
Upgrading from Version 10.2.1 to 10.5
Upgrading from Version 10.2.2 to 10.5
Upgrading from Version 10.4 to 10.5

Data Engineering Streaming

The following image shows the upgrade paths to version 10.5 for Data Engineering Streaming. To open the guide, click on any box on the left or scroll to the resources section.

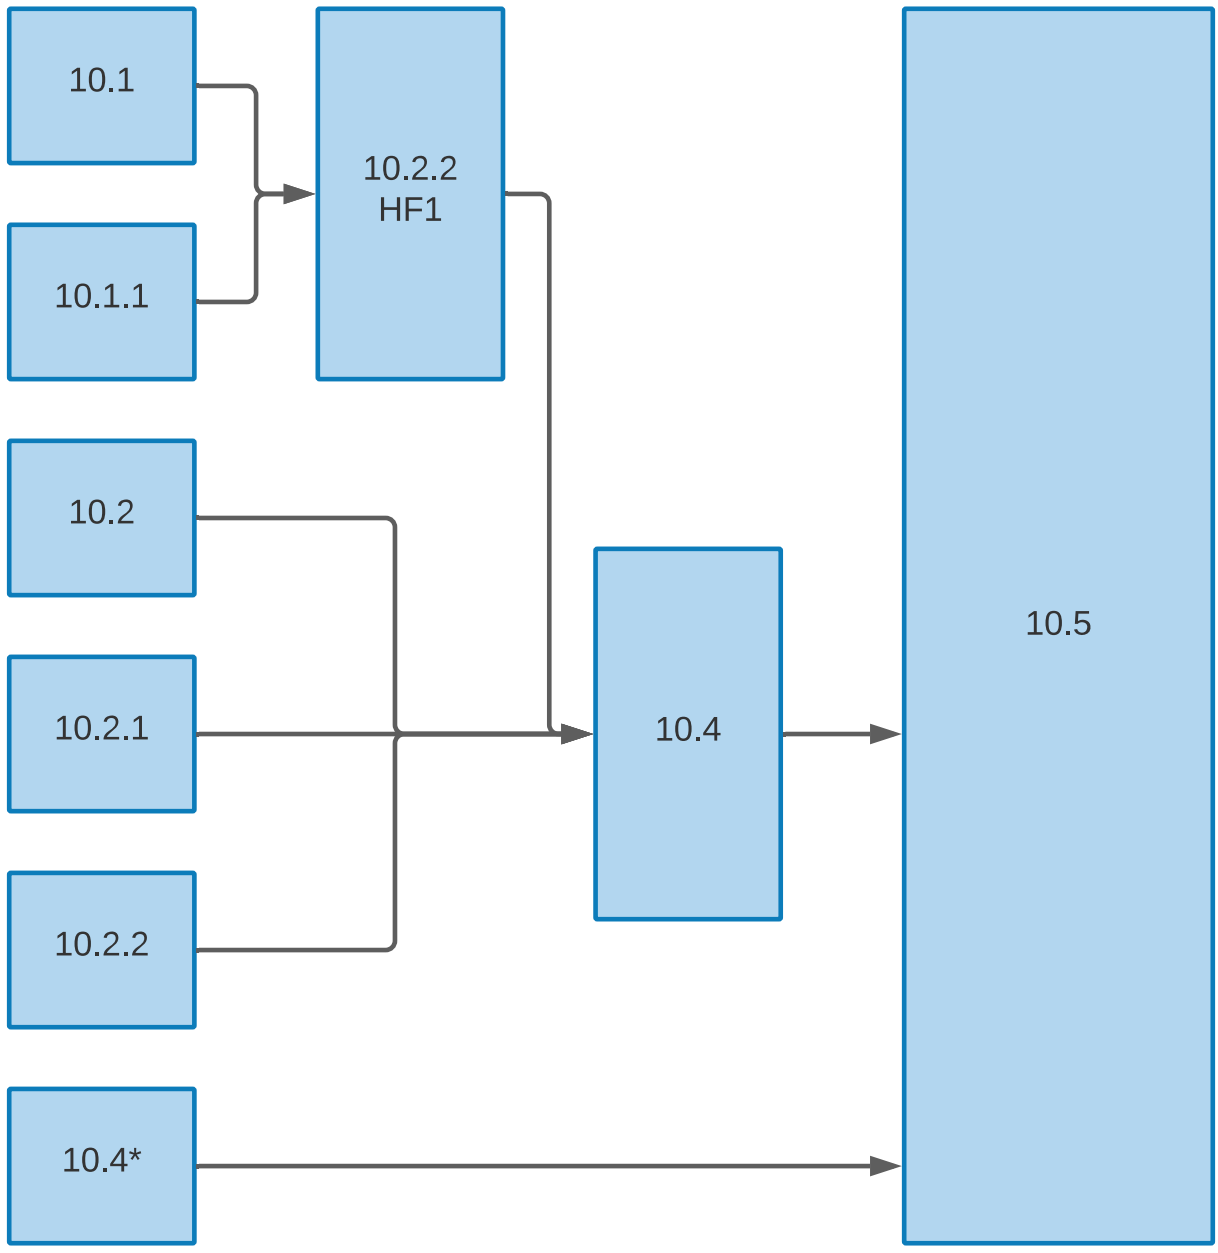

Resources

Upgrading from Version 10.2.2 to 10.5
Upgrading from Version 10.4 to 10.5

*Version 10.4.1 is a hotfix for version 10.4.

Enterprise Data Catalog

The following image shows the upgrade paths to version 10.5 for Enterprise Data Catalog. To open the guide, click on any box on the left or scroll to the resources section.

If Enterprise Data Catalog and Data Engineering are in the same domain of a version earlier than 10.4, upgrade them both to version 10.4 before you upgrade to 10.5.

*Version 10.4.1 is a hotfix for version 10.4.

Enterprise Data Catalog

Resources

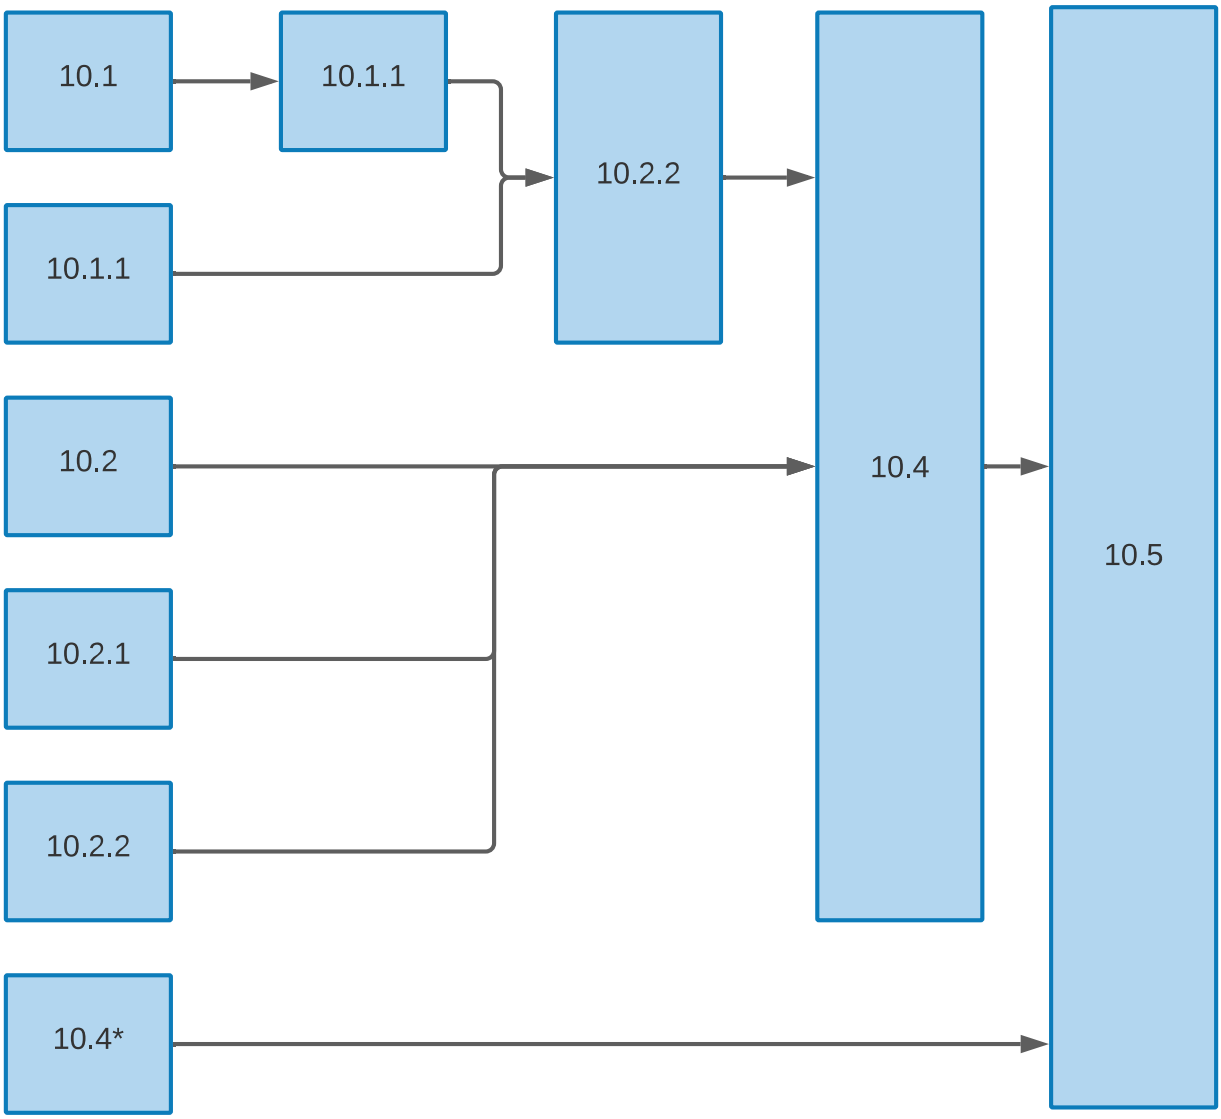

Upgrading from Version 10.1 to 10.2.2 HotFix 1
Upgrading from Version 10.1.1 to 10.2.2 HotFix 1

Upgrading from Version 10.2 to 10.4
Upgrading from Version 10.2.1 to 10.4
Upgrading from Version 10.2.2 to 10.4

Upgrading from Version 10.4 to 10.5

Enterprise Data Preparation

The following image shows the upgrade paths to version 10.5 for Enterprise Data Preparation. To open the guide, click on any box on the left or scroll to the resources section.

If Data Engineering, Enterprise Data Catalog, and Enterprise Data Preparation are in the same domain of a version earlier than 10.4, upgrade them all to version 10.4 before you upgrade to 10.5.

*Version 10.4.1 is a hotfix for version 10.4.

Enterprise Data Preparation

Resources

Upgrading from Version 10.1 to 10.1.1

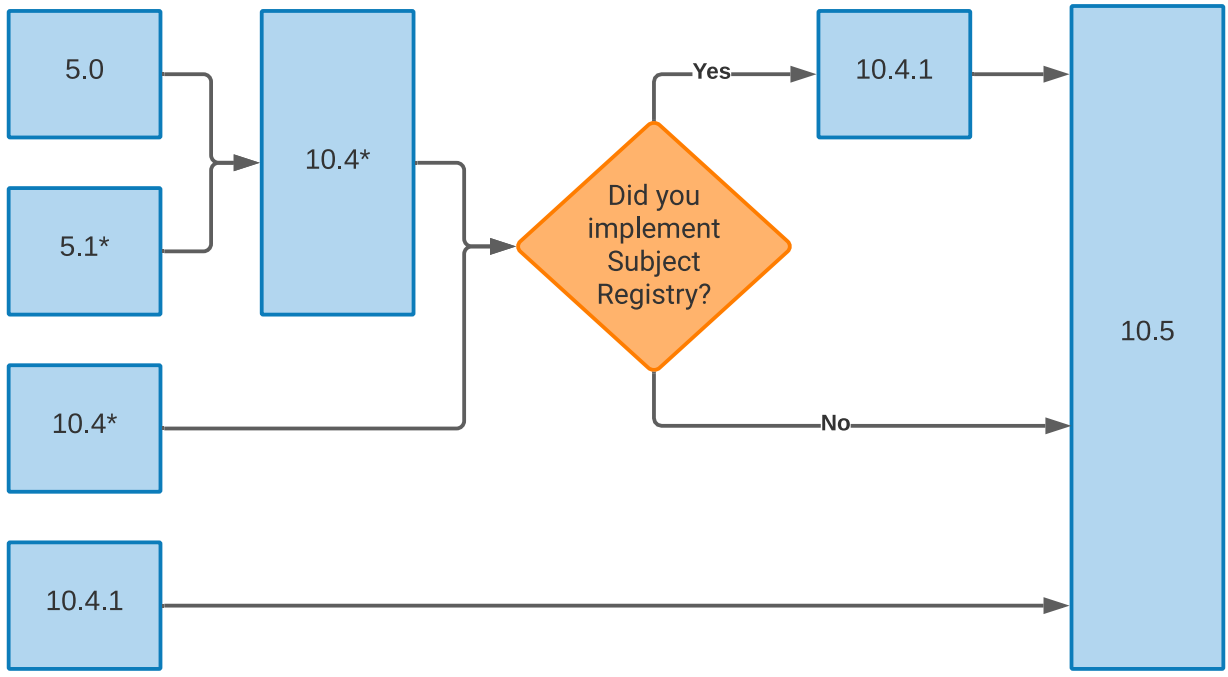

Upgrading from Version 10.1.1 to 10.2.2

Upgrading from Version 10.2 to 10.4
Upgrading from Version 10.2.1 to 10.4
Upgrading from Version 10.2.2 to 10.4

Upgrading from Version 10.4 to 10.5

Data Privacy Management

The following image shows the upgrade paths to version 10.5 for Data Privacy Management. To open the guide, click on any box on the left or scroll to the resources section.

Resources

Upgrading from Version 5.0 to 10.4
Upgrading from Version 5.1 to 10.4

Upgrading from Version 10.4 to 10.4.1

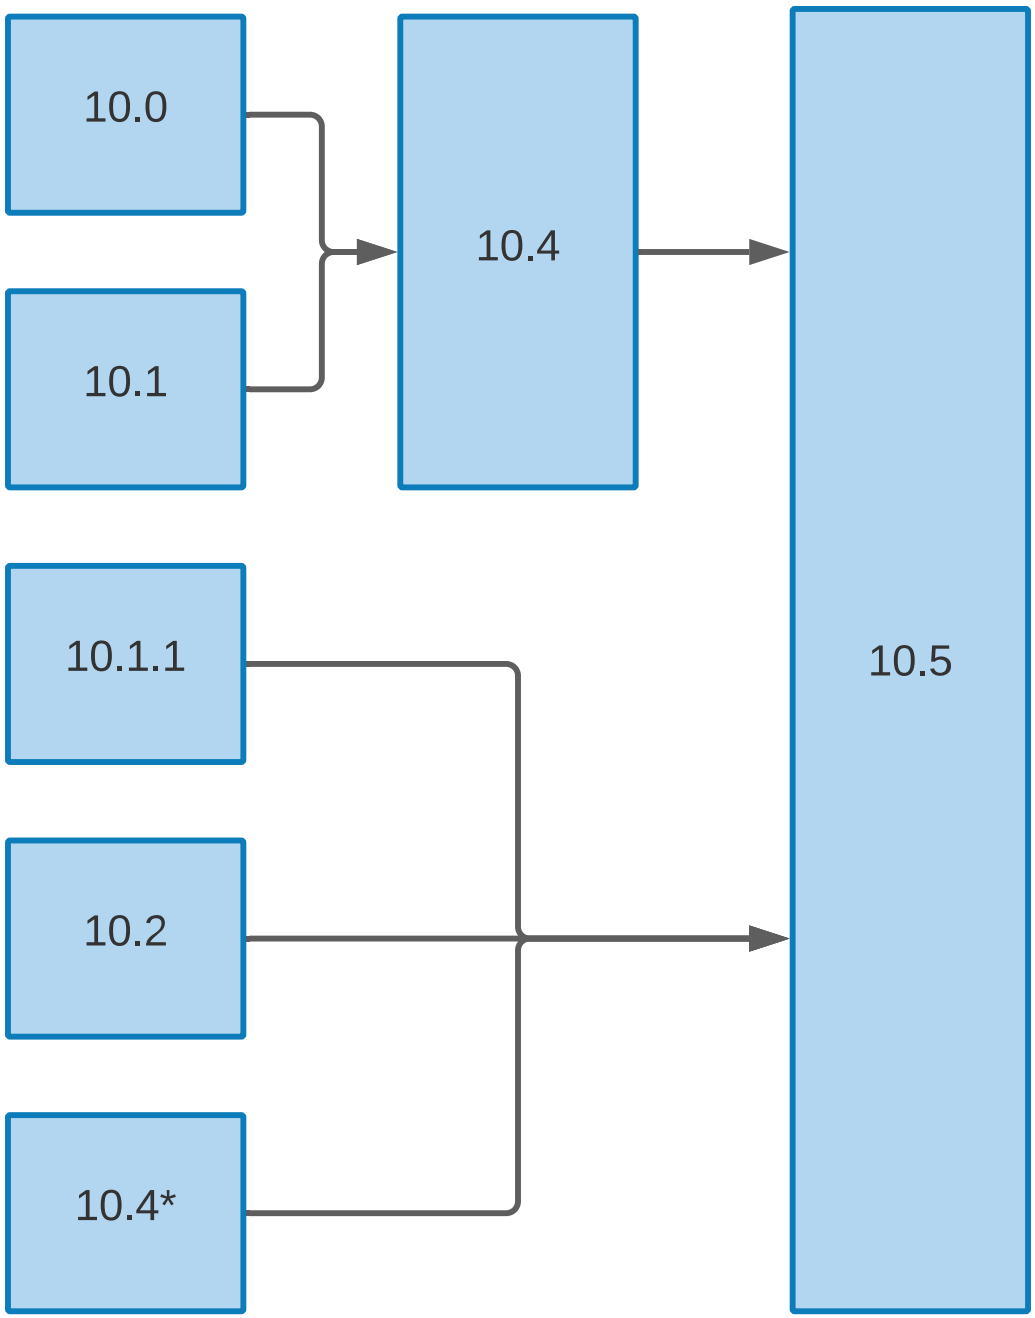

Upgrading from Version 10.4.1 to 10.5

If Data Engineering, Enterprise Data Catalog, and Data Privacy Management are in the same domain of a version earlier than 10.4, upgrade them all to version 10.4 before you upgrade to 10.5.

*If you implemented Subject Registry in 5.1 or 10.4, you need to apply the 10.4.1 hotfix before you upgrade to 10.5. If you did not implement Subject Registry, you can upgrade directly from 10.4 to 10.5.

PowerCenter & Data Quality

The following image shows the upgrade paths to version 10.5 for PowerCenter and Data Quality. To open the guide, click on any box on the left or scroll to the resources section.

*Version 10.4.1 is a hotfix for version 10.4.

PowerCenter & Data Quality

Resources

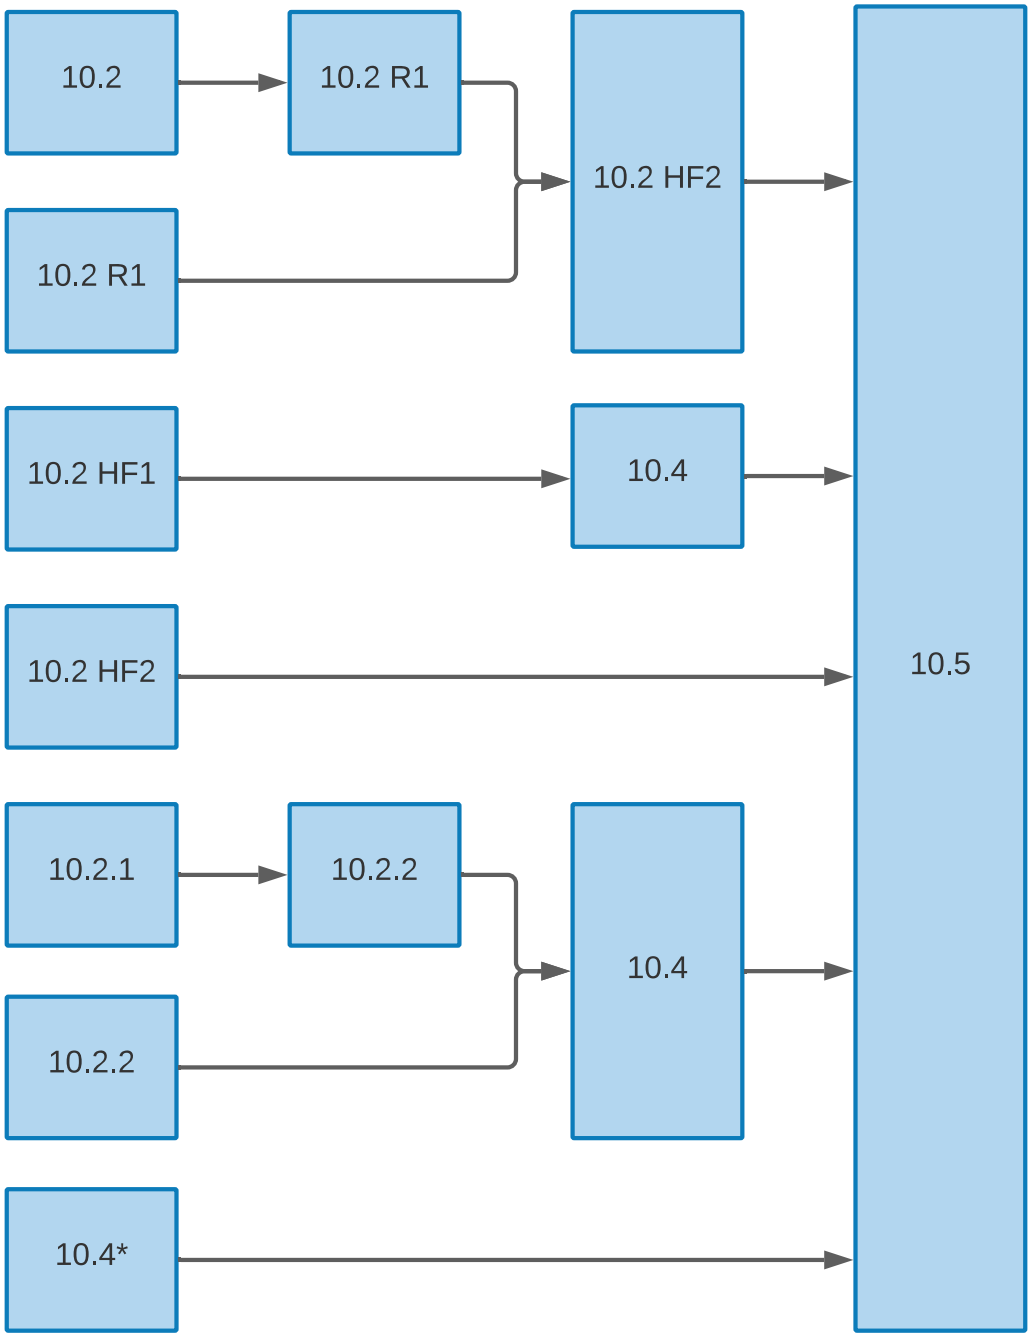

Upgrading from Version 10.0 to 10.4
Upgrading from Version 10.1 to 10.4

Upgrading from Version 10.1.1 to 10.5
Upgrading from version 10.2 to 10.5
Upgrading from Version 10.4 to 10.5

If PowerCenter or Data Quality is in the same domain as Data Engineering Integration, refer to Data Engineering Integration for upgrade paths and links to guides.

Test Data Management

The following image shows the upgrade paths to version 10.5 for Test Data Management. To open the guide, click on any box on the left or scroll to the links section:

If Test Data Management is in the same domain as PowerCenter or Data Engineering Integration or both, verify that they are upgraded to the same version before you upgrade to 10.5.

*Version 10.4.1 is a hotfix for version 10.4.
