Preface

Read the *What's New* for a brief overview of new features, enhancements and behavior changes in Data Quality.

Informatica Resources

Informatica provides you with a range of product resources through the Informatica Network and other online portals. Use the resources to get the most from your Informatica products and solutions and to learn from other Informatica users and subject matter experts.

Informatica Documentation

Use the Informatica Documentation Portal to explore an extensive library of documentation for current and recent product releases. To explore the Documentation Portal, visit https://docs.informatica.com.

If you have questions, comments, or ideas about the product documentation, contact the Informatica Documentation team at infa_documentation@informatica.com.

IDMC web site

You can access the Informatica® Intelligent Data Management Cloud™ (IDMC) web site at http://www.informatica.com/cloud.

IDMC Communities

Use the IDMC Community to discuss and resolve technical issues. You can also find technical tips, documentation updates, and answers to frequently asked questions.

Access the IDMC Community at:

https://network.informatica.com/community/informatica-network/products/cloud-integration

Developers can learn more and share tips at the Cloud Developer community:

https://network.informatica.com/community/informatica-network/products/cloud-integration/cloud-developers

IDMC Marketplace

Visit the Informatica Marketplace to try and buy Data Integration Connectors, templates, and mapplets:

https://marketplace.informatica.com/

Informatica Knowledge Base

Use the Informatica Knowledge Base to find product resources such as how-to articles, best practices, video tutorials, and answers to frequently asked questions.

To search the Knowledge Base, visit https://search.informatica.com. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

IDMC Trust Center

The IDMC Trust Center provides information about Informatica security, compliance, and privacy practices.

You can access the trust center at https://trust.informatica.com/.

IDMC Pulse Dashboard

The IDMC Pulse Dashboard provides system status and upgrade information for all PODs and services across IDMC.

Follow the services you use and subscribe to alerts to receive notifications about upgrades, maintenance, production incidents, and upcoming releases. The IDMC Pulse Dashboard displays the production status of all the IDMC products. All maintenance updates are posted to this page, and during an outage, it will have the most current information. To ensure you are notified of updates and outages, you can subscribe to receive updates for a single service or all IDMC services. Subscribing to all services is the best way to be certain you never miss an update.

For more information, see the Service Status and Communications guide.

Informatica Global Customer Support

You can contact a Global Support Center through the Informatica Network or by telephone.

To find online support resources on the Informatica Network, click **Contact Support** in the IDMC Help menu to go to the **Cloud Support** page. The **Cloud Support** page includes system status information and community discussions. Log in to Informatica Network and click **Need Help** to find additional resources and to contact Informatica Global Customer Support through email.

The telephone numbers for Informatica Global Customer Support are available from the Informatica web site at https://www.informatica.com/services-and-training/support-services/contact-us.html.

CHAPTER 1

October 2026

The following topics provide information about new features, enhancements, and changes in the October 2026 release of Data Quality.

Changelog October 2026

Read the changelog to learn about significant changes to this publication for this release.

The following table describes changes in this publication:

Publication Date	Type of Change	Section Title
November 05, 2026	Initial publication	-

Changed behavior

The October 2026 release of Data Quality includes the following changed behavior.

Verification engine upgrade

The verifier asset, Verifier transformation, and Cloud Address Verification API use version 6.9.0 of the Informatica Address Verification engine.

Previously, the verifier asset, Verifier transformation, and Cloud Address Verification API used version 6.8.0 of the engine.

CHAPTER 2

July 2026

The following topics provide information about new features, enhancements, and changes in the July 2026 release of Data Quality.

Changelog July 2026

Read the changelog to learn about significant changes to this publication for this release.

The following table describes changes in this publication:

Publication Date	Type of Change	Section Title
July 10, 2026	Initial publication	

New features and enhancements

The July 2026 release of Data Quality includes the following new feature:

New performance optimization option for address verification mappings

You can configure the number of child instances of the address verification engine that the Secure Agent can create at run time for an address verification mapping. To set the number of instances, create the **NumFunctionServers** custom property on the Secure Agent. Set the **NumFunctionServers** value in coordination with other address verification property values on the Secure Agent and with the number of partitions on the mapping Source transformation.

For more information about the performance options, see "Verification properties in the CDQAV property set" in *Data Quality Assets*.

CHAPTER 3

April 2026

The following topics provide information about new features, enhancements, and changes in the April 2026 release of Data Quality.

Changelog April 2026

Read the changelog to learn about significant changes to this publication for this release.

The following table describes changes in this publication:

Publication Date	Type of Change	Section Title
April 27, 2026	Updated	"Verification engine upgrade" on page 10
April 10, 2026	Added	"Documentation enhancements" on page 11
April 10, 2026	Added	"Product objective updates in the deduplicate asset" on page 11
March 11, 2026	Initial publication	-

New features and enhancements

The April 2026 release of Data Quality includes the following new features and enhancements.

Watch the following What's New video to learn about the new features and enhancements in the April 2026 release:

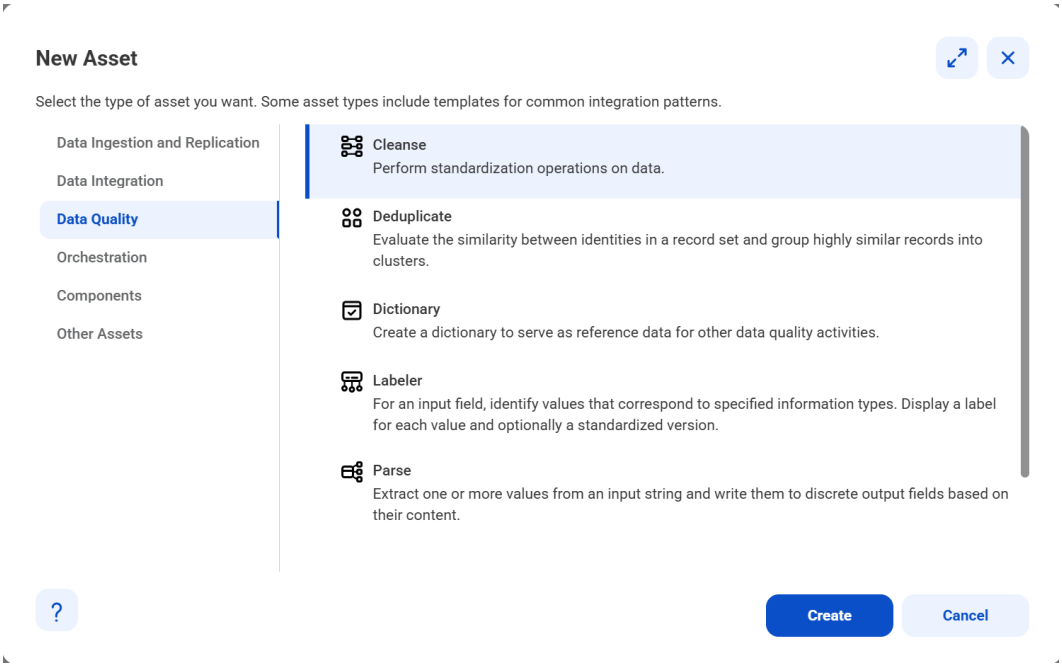

Improved integration with Data Integration

You can create and update the following data quality assets in Data Integration in addition to Data Quality:

- cleanse
- deduplicate
- dictionary
- labeler
- parse
- rule specification
- verifier

The enhanced behavior enables you to create and configure a data quality asset and add it to a transformation in a mapping wholly within Data Integration. The functionality and behavior of the assets and the Data Quality service remain unchanged.

The following image shows the **New Asset** dialog box in Data Integration:

Individual deduplication thresholds for input fields

You can set a custom deduplication threshold for each input field. Use the field-level threshold options to change the emphasis on individual fields within a deduplication process and deliver more precise results in your deduplication projects.

Use the **Manage Field Thresholds** button on the **Deduplication** tab of a deduplication asset to enable custom deduplication thresholds for individual input fields.

For more information about how you can configure custom deduplication thresholds, see the deduplicate asset advanced options in *Data Quality Assets*.

New index keys for deduplicate asset objectives

You can select from a wider range of index keys on several deduplicate objectives in the deduplicate asset. The new keys include an **Exact** value that enables a more precise match with geocode data values, which can result in fewer but more relevant matches.

For more information about the various objectives that you can use in deduplicate assets, see the deduplicate asset objectives in *Data Quality Assets*.

Changed behavior

The April 2026 release of Data Quality includes the following changed behavior.

Verification engine upgrade

The verifier asset, Verifier transformation, and Cloud Address Verification API use version 6.8.0 of the Informatica Address Verification engine. Additionally, the engine now supports up to 2000 API calls per minute while maintaining the same response time.

Previously, the verifier asset, Verifier transformation, and Cloud Address Verification API used version 6.7.0 of the engine.

Product objective updates in the deduplicate asset

The Product Name and Product Description index keys are required fields for the Product objective.

Previously, the Product Name index key was a mandatory field and the Product Description index key was an optional field.

Documentation enhancements

The contents of the following documentation modules are available in the newly created *Data Quality Assets* module:

- *Cleanse assets*
- *Deduplicate assets*
- *Labeler assets*
- *Parse assets*
- *Rule specification assets*
- *Verifier assets*

The *Dictionaries* module is renamed to *Data Quality Dictionaries*.
